Regional Inequality And Structural Changes:

Regional Inequality and Structural Changes Eduardo A. Haddad, 2018-10-26 Published in 1999 The liberalization process in Latin America during the 1990s resulted in the increase and diversification of trade in the region Brazil as a major player strengthened its insertion into the world economy through the adoption of strategies for opening up markets and of new production technologies complemented more recently by the creation of a broadly based stabilization plan In this context issues related to structural changes in the economy such as those involving the complexity of new international trading agreements and their impact on the Brazilian economy warrant special attention The results of this study suggest that the interplay of market forces in the Brazilian economy favour the more developed region of the country **Regional Inequality and Structural Changes in the Brazilian Economy** Eduardo Amaral Haddad, 1998 Growth, Structural Change and Regional Inequality in Malaysia Asan Ali Golam Hassan, 2017-11-30 Economic development in the long run is seen as a process of structural change that is affected by economic growth Malaysia is one of the middle income economies that are going through rapid structural change Since the mid 1980s it has changed to an industrially based economy with large scale export of electrical and electronic components However thirty years after Malaysia's redistributive policies have been exercised regional inequality still exists This book examines the nature and impact of regional policies in relation to the patterns of demographic and economic structural change and in relation to growth distribution and income disparities across regions in Peninsular Malaysia The book also explores the degree to which differences in regional manufacturing distribution and concentration have contributed to regional inequality It concludes with a number of recommendations for regional policies that will reduce this inequality Regional Inequality and Development Takahiro Akita, Mitsuhiko Kataoka, 2022-07-14 This book addresses three main issues in regional income inequality and development meaning of regional inequality measurement of regional inequality and the relationship between national economic development and regional income inequality It provides analytical methods useful in exploring the determinants of regional inequality in income and productivity Some software commands in Stata statistical software package available for the measurement and analysis of income inequality are also introduced Some researchers have argued that spatial concentration of population in and around major cities and the concurrent increase in regional inequality do not hinder national economic development and may stimulate it Nevertheless many national governments seek to promote balanced regional economic development and reduce regional income inequality because unbalanced development and higher levels of regional inequality may cause political or ethnic conflicts between different regions of the country As the applications of the analytical methods introduced in the first part of the book the second part presents four independent empirical studies on regional inequality and development in Indonesia They offer very interesting case studies for the formulation of policies and programs to reduce regional inequalities because as the world's largest archipelagic country with more than 13 thousand islands and 300 ethnic

groups Indonesia is spatially diverse in terms of its ecology natural resource endowments economy ethnicity and culture This book can be used as a textbook for undergraduate and graduate students who are interested in national economic development and regional income inequality It is also beneficial for practitioners and policy makers who are in charge of the formulation implementation and evaluation of development policies and programs *Regional Inequality in Transitional China* Felix Haifeng Liao,Yehua Dennis Wei,Li Huang,2020-09-17 This book investigates uneven regional development in China with particular focus on the cases of Guangdong and Zhejiang provinces which have been at the forefront of debate since Chinese economic reform Rapid economic growth since the opening up of China has been accompanied by significant disparities in the regional distribution of income this book represents one of the most recent studies to present a picture of this inequality Built upon a multi scale and multi mechanism framework it provides systematic examination of both the patterns and mechanisms of regional development and inequality in provincial China emphasizing the effects of economic transition Approaching from a geographical perspective its authors consider the interplay between the local the state and the global forces in shaping the landscape of regional inequality in China Extensive empirical findings will prove useful to those researching other developing countries within the frontier of globalization and economic transition *Regional Inequality in Transitional China* will appeal to scholars and students of geography economics and Chinese studies more broadly

Structural Change and Income Distribution Guanghua Wan,2017 This study explores the relationship between inequality and structural transformation by constructing a theoretical model developing analytical frameworks and implementing a case study The general equilibrium model we develop demonstrates that inequality exhibits an inverted U shape as structural change proceeds from onset to completion Our analytical frameworks enable decomposition of total inequality into sector contributions and a change in total inequality into a component attributable to structural transformation and the other component to concentration or spatial agglomeration Applying the decomposition frameworks to data from the People's Republic of China yield various interesting findings and more importantly confirms the inverted U shape as predicted by our theoretical model *Openness, Economic Growth and Regional Disparities* Yanqing Jiang,2013-11-29 Substantial disparities across different Chinese regions are one of the most prominent features in China's development process This book investigates the mechanisms through which openness affects regional economic growth and interregional disparities in China Based on the latest data and employing a variety of panel data regression techniques it provides readers with new findings that shed light on the effects of openness on China's regional economic growth and the evolution of the country's interregional disparities The Effect of Migration Policy on Growth, Structural Change, and Regional Inequality in China Tongtong Hao,Ruiqi Sun,Trevor Tombe,Xiaodong Zhu,2020 **The Economic Development of Europe's Regions** Joan Ramón Rosés,Nikolaus Wolf,2018-11-06 This book is the first quantitative description of Europe's economic development at a regional level over the entire twentieth century Based on a new and comprehensive set of data it brings together a group of

leading economic historians in order to describe and analyze the development of European regions both for nation states and for Europe as a whole This provides a new transnational perspective on Europe s quantitative development offering for the first time a systematic long run analysis of national policies independent from the use of national statistical units The new transnational dimension of data allows for the analysis of national policies in a more thorough way than ever before The book provides a comprehensive database at the level of modern NUTS 2 regions for the period 1900 2010 in 10 year intervals and a panoramic view of economic development both below and above the national level It will be of great interest to economic historians economic geographers development economists and those with an interest in economic growth

Regional Disparities in Small Countries Daniel Felsenstein, Boris A. Portnov, 2005-12-28 1 2 Daniel Felsenstein and Boris A Portnov 1 Department of Geography Hebrew University of Jerusalem Israel 2 Department of Natural Resources and Environmental Management University of Haifa Israel During the Candiot War of 1645 1669 the Ottoman Sultan Ibrahim I ordered his chief admiral to attack Malta Fearing imminent defeat by the superior Venetian forces stationed on the island the admiral decided to trick the sultan out of the idea As the story goes he placed a candle on his naval map allowing the wax to drip on the tiny island until it was completely covered Then he exclaimed in false surprise Malta Yok There is no Malta and convinced the sultan to sail his fleet to the Island of Crete instead Although Malta is not featured in this volume most of the countries it covers are of wax drip size Intuitively it may be expected that everything in small countries is diminutive distances population economies and even regional inequalities Thus at a symposium on The Challenge of Development convened in Israel in 1957 to mark the inauguration of a new building for the Department of Economics at the Hebrew University of Jerusalem the eminent US economist Simon Kuznets stated that developed small states seem to have succeeded in spreading the fruits of economic growth more widely among their populations than the larger states at comparable levels of income per capita

Impact Evaluation of Infrastructure Interventions Henrik Hansen, Ole Winckler Andersen, Howard White, 2013-09-13 The focus on results in development agencies has led to increased focus on impact evaluation to demonstrate the effectiveness of development programmes This book illustrates the broad range of methods available for counterfactual analysis of infrastructure programmes such as establishment rehabilitation and maintenance of roads water supply and electrical power plants and grids Understanding the impact of interventions requires understanding of the context in which the intervention takes place and the channels through which it is expected to occur For infrastructure interventions it is particularly important to identify the links between the input and the outcomes and impacts because the well being of people the ultimate impact does not change directly as a consequence of the intervention Therefore impact evaluation of infrastructure programmes typically requires mixing both quantitative and qualitative approaches as illustrated in many of the contribution to this edited volume This book was originally published as a special issue of the Journal of Development Effectiveness

Coping with Regional Inequality in Sweden Kerstin Enflo, Joan Ramón Rosés, 2015 In many countries regional income

inequality has followed an inverted U shaped curve growing during industrialization and market integration and declining thereafter By contrast Sweden s regional inequality dropped from 1860 to 1980 and did not exhibit this U shaped pattern Accordingly today s regional income inequality in Sweden is lower than in other European countries We note that the prime mover behind the long run reduction in regional income differentials was structural change whereas neoclassical and technological forces played a relatively less important role However this process of regional income convergence can be divided into three major periods During the first period 1860 1940 the unrestricted action of market forces particularly the expansion of markets and high rates of internal and international migration led to the compression of regional income differentials During the next period 1940 80 regional convergence was even more intense In this period institutional arrangements favoured the reduction of productivity differentials across industries and successive governments aided the reallocation of the workforce from declining to thriving regions and economic sectors During the last period 1980 2000 when regional incomes diverged internal migration and structural change slowed Furthermore the development of knowledge intensive service industries favoured economic growth in the main metropolitan areas

Stough, 2011-06-10. The need for informed and effective insights into key concepts and models of regional development and growth from an endogenous growth perspective has risen over the past decade.
