Information Within New Product Development Teams Mark F. Schar,2011 Functionally diverse team members bring unique sets of cognitive styles to team interaction it is less clear how these differences affect the exchange of critical mutually required team information This cognitive diversity in new product design NPD teams increases the likelihood that individual team members will perceive the team s task differently leading to cognitive representational gaps between teammates interpretations of both the task and potential solution This research shows that cognitively diverse NPD teams develop representational gaps based on individual cognitive preferences between convergent and divergent information types and these cognitive preferences influence both task definition and solution A second experiment shows that team leadership that bridges cognitive preferences called pivot thinking can overcome this limiting behavior Understanding these general mechanisms deepens understanding of group information processing and conflict in cognitively diverse NPD teams Implications for design education are discussed **Human-Computer Interaction & Emerging Technologies** Tareq Z.

Memory and Control of Action ,2011-10-10 Memory and Control of Action **Maximum Brainpower** Shlomo Breznitz,Collins Hemingway,2013-07-30 A wonderfully helpful book After reading it you will understand what you must do for your brain and why you must do it Norman Doidge M D New York Times bestselling author of The Brain That Changes Itself Did you know that experts are often less mentally agile than jacks of all trades That crossword puzzles and sudoku are of minimal help in building brainpower That multitasking poses unique dangers to the brain Cognitive psychologist Shlomo

Breznitz knows and what's more he knows what to do about it. In *Maximum Brainpower*, Breznitz and technologist Collins Hemingway provide both an in-depth look at how the brain works and proven methods to increase its capabilities. Armed with the results of cutting-edge research, they champion the stimulus of continual change over the deadening effects of comfortable routine, show how to separate good mental stress from bad, and demonstrate how hope and socialization can help defend against forgetfulness, memory loss, even dementia. Filled with colorful real-life stories and fascinating psychological experiments, this revelatory work will help adults of any age keep their minds sharp, healthy, and cognitively fit throughout life. It's a no-brainer. Praise for *Maximum Brainpower*: Everyone knows the importance of physical fitness; less appreciated is the necessity of cognitive fitness. How do you maintain an exercised, stimulated, flexible brain? Start by reading this book. David Eagleman, New York Times bestselling author of *Incognito*: Profound, rich, and enriching. Because of its forceful suggestions, its analyses, and its wide knowledge, this book is well worth reading. And rereading. Elie Wiesel, Nobel Peace Prize Laureate and author. Many of us are petrified of Alzheimer's disease, strokes, and other maladies that impair the functioning of the brain. Breznitz and Hemingway can deliver no magic bullet to prevent dementia. But their book does get you thinking about what you can do to develop and maintain your gray matter, build on the plasticity of the brain, and increase the likelihood that you'll live not just a longer but a fuller life. The Huffington Post. Most books about healthy brain maintenance just give you the how; this one tells you why. And it helps you do it. Rita Carter, author of *Mapping the Mind*.
