Lost Laborers In Colonial California Native Americans And The Archaeo:

Lost Laborers in Colonial California Stephen W. Silliman, 2008-10-01 Native Americans who populated the various ranchos of Mexican California as laborers are people frequently lost to history The rancho period was a critical time for California Indians as many were drawn into labor pools for the flourishing ranchos following the 1834 dismantlement of the mission system but they are practically absent from the documentary record and from popular histories This study focuses on Rancho Petaluma north of San Francisco Bay a large livestock agricultural and manufacturing operation on which several hundred perhaps as many as two thousand Native Americans worked as field hands cowboys artisans cooks and servants One of the largest ranchos in the region it was owned from 1834 to 1857 by Mariano Guadalupe Vallejo one of the most prominent political figures of Mexican California While historians have studied Vallejo few have considered the Native Americans he controlled so we know little of what their lives were like or how they adjusted to the colonial labor regime Because Vallejo's Petaluma Adobe is now a state historic park and one of the most well protected rancho sites in California this site offers unparalleled opportunities to investigate nineteenth century rancho life via archaeology Using the Vallejo rancho as a case study Stephen Silliman examines this California rancho with a particular eye toward Native American participation Through the archaeological record tools and implements containers beads bone and shell artifacts food remains he reconstructs the daily practices of Native peoples at Rancho Petaluma and the labor relations that structured indigenous participation in and experience of rancho life This research enables him to expose the multi ethnic nature of colonialism counterbalancing popular misconceptions of Native Americans as either non participants in the ranchos or passive workers with little to contribute to history *Lost Laborers in Colonial California* draws on archaeological data material studies and archival research and meshes them with theoretical issues of labor gender and social practice to examine not only how colonial worlds controlled indigenous peoples and practices but also how Native Americans lived through and often resisted those impositions The book fills a gap in the regional archaeological and historical literature as it makes a unique contribution to colonial and contact period studies in the Spanish Mexican borderlands and beyond

what their lives were like or how they adjusted to the colonial labor regime Because Vallejo s Petaluma Adobe is now a state historic park and one of the most well protected rancho sites in California this site offers unparalleled opportunities to investigate nineteenth century rancho life via archaeology Using the Vallejo rancho as a case study Stephen Silliman examines this California rancho with a particular eye toward Native American participation Through the archaeological record tools and implements containers beads bone and shell artifacts food remains he reconstructs the daily practices of Native peoples at Rancho Petaluma and the labor relations that structured indigenous participation in and experience of rancho life This research enables him to expose the multi ethnic nature of colonialism counterbalancing popular misconceptions of Native Americans as either non participants in the ranchos or passive workers with little to contribute to history Lost Laborers in Colonial California draws on archaeological data material studies and archival research and meshes them with theoretical issues of labor gender and social practice to examine not only how colonial worlds controlled indigenous peoples and practices but also how Native Americans lived through and often resisted those impositions The book fills a gap in the regional archaeological and historical literature as it makes a unique contribution to colonial and contact period studies in the Spanish Mexican borderlands and beyond

Routledge Handbook of the Archaeology of

Indigenous-Colonial Interaction in the Americas Lee M. Panich,Sara L. Gonzalez,2021-07-19 The Routledge Handbook of the Archaeology of Indigenous Colonial Interaction in the Americas brings together scholars from across the hemisphere to examine how archaeology can highlight the myriad ways that Indigenous people have negotiated colonial systems from the fifteenth century through to today The contributions offer a comprehensive look at where the archaeology of colonialism has been and where it is heading Geographically diverse case studies highlight longstanding theoretical and methodological issues as well as emerging topics in the field The organization of chapters by key issues and topics rather than by geography fosters exploration of the commonalities and contrasts between historical contingencies and scholarly interpretations Throughout the volume Indigenous and non Indigenous contributors grapple with the continued colonial nature of archaeology and highlight Native perspectives on the potential of using archaeology to remember and tell colonial histories This volume is the ideal starting point for students interested in how archaeology can illuminate Indigenous agency in colonial settings Professionals including academic and cultural resource management archaeologists will find it a convenient reference for a range of topics related to the archaeology of colonialism in the Americas

Engaged Archaeology in the Southwestern United States and Northwestern Mexico Kelley A. Hays-Gilpin,Sarah A. Herr,Patrick D. Lyons,2021-07-01 This volume of proceedings from the fifteenth biennial Southwest Symposium makes the case for engaged archaeology an approach that considers scientific data and traditional Indigenous knowledge alongside archaeological theories and methodologies Focusing on the southwestern United States and northwestern Mexico the contributors show what can be gained when archaeologists engage with Indigenous communities and natural scientists improved contemporary

archaeological practice through better understandings of heritage and identity anthropogenic landscapes and societal potential for resilience Organized around the theme of interdisciplinary perspectives the book highlights collaborations with those who have other ways of knowing the past from the traditional and proprietary knowledge of communities to new scientific methods and considers the social context of archaeological practice and the modern relationships that inform interpretations of the past Chapters show how cutting edge practices lead to new archaeological understandings when archaeologists work in partnership with descendant and stakeholder communities and across international and disciplinary borders Authors work across anthropological subfields and with the sciences demonstrating that anthropological archaeology's methods are starting points for investigation that allow for the expansion of understanding by incorporating long remembered histories with innovative analytic methods Engaged Archaeology in the Southwestern United States and Northwestern Mexico identifies current and near future trends in archaeological practice in the US Southwest and northwestern Mexico including repatriation community engagement and cross disciplinary approaches and focuses on Native American archaeologists and their communities research collaborations and interests It will be of interest to archaeologists and anthropologists working in the Southwest and to any researchers interested in interdisciplinary approaches to archaeology heritage studies and the natural sciences Contributors Christopher Caseldine Chip Colwell Guillermo Córdova Tello Patrick Cruz T J Ferguson Cécile R Ganteaume Vernelda Grant Neysa Grider Potter Christopher Grivas Michael Heilen Jane H Hill Leigh J Kuwanwisiwma Teresita Majewski Debra L Martin Estela Martínez Mora John A McClelland Emiliano Ricardo Melgar Tsoh Darsita R North Scott Ortman Peter J Pilles Jr Susan Sekaquaptewa Arleyn W Simon Kimberly Spurr Sarah Striker Kerry F Thompson John A Ware Peter M Whiteley Lisa C Young

The Menial Art of Cooking Sarah R. Graff, Enrique Rodríguez-Alegría, 2012-05-15 Although the archaeology of food has long played an integral role in our understanding of past cultures the archaeology of cooking is rarely integrated into models of the past The cooks who spent countless hours cooking and processing food are overlooked and the forgotten players in the daily lives of our ancestors The Menial Art of Cooking shows how cooking activities provide a window into other aspects of society and as such should be taken seriously as an aspect of social cultural political and economic life This book examines techniques and technologies of food preparation the spaces where food was cooked the relationship between cooking and changes in suprahousehold economies the religious and symbolic aspects of cooking the relationship between cooking and social identity and how examining foodways provides insight into social relations of production distribution and consumption Contributors use a wide variety of evidence including archaeological data archival research analysis of ceramics fauna botany glass artifacts stone tools murals and painted ceramics ethnographic analogy and the distribution of artifacts across space to identify evidence of cooking and food processing left by ancient cooks The Menial Art of Cooking is the first archaeological volume focused on cooking and food preparation in prehistoric and historic settings around the world and will interest archaeologists social

anthropologists sociologists and other scholars studying cooking and food preparation or subsistence Pestilence and Persistence Kathleen Louann Hull, 2009 This innovative examination of the Yosemite Indian experience in California poses broad challenges to our understanding of the complex destructive encounters that took place between colonists and native peoples across North America Looking closely at archaeological data native oral tradition and historical accounts Kathleen Hull focuses in particular on the timing magnitude and consequences of the introduction of lethal infectious diseases to Native communities The Yosemite Indian case suggests that epidemic disease penetrated small scale hunting and gathering groups of the interior of North America prior to face to face encounters with colonists It also suggests however that even the catastrophic depopulation that resulted from these diseases was insufficient to undermine the culture and identity of many Native groups Instead engagement in colonial economic ventures often proved more destructive to traditional indigenous lifeways Hull provides further context for these central issues by examining ten additional cases of colonial era population decline in groups ranging from Iroquoian speakers of the Northeast to complex chiefdoms of the Southeast and Puebloan peoples of the Southwest **Frontiers of Colonialism** Christine D. Beaulieu, 2017-07-11 For decades archaeologists have limited studies of frontiers and colonialism to a single polity empire or epoch This has been especially true of historical archaeologists but in this intriguing collection Beaulieu assembles archaeologists from around the world to determine the commonalities and differences of colonialism across the self imposed divide of contact v pre contact The work considers the expanding frontiers of the Romans Iroquois Egyptians Filipinos and the more familiar Mayan and Incan empires The goal of this volume is to expand the theoretical interpretations and perspectives to all archaeologists working in frontier colonial contexts not just those of the European empires Metini Village Kent G. Lightfoot, Sara L. Gonzalez, 2018 Synthesizing over two decades of collaborative archaeological research carried out by UC Berkeley the Kashia Band of Pomo Indians and California State Parks at Fort Ross California this volume makes the case for an archaeology of colonialism that bridges studies of early colonial encounters with analysis of settler colonial relations **Journal of the West** Lorrin L. Morrison, Carroll Spear Morrison, 2006 *America, History and Life*, 1988 Provides historical coverage of the United States and Canada from prehistory to the present Includes information abstracted from over 2 000 journals published worldwide **Directory of American Scholars** Rita C. Velázquez, 1999 Completely updated this 9th edition presents biographical profiles of United States and Canadian scholars currently active in teaching research and publishing in the fields of philosophy religion and law **Collaborating at the Trowel's Edge** Stephen W. Silliman, 2008-12-15 A fundamental issue for twenty first century archaeologists is the need to better direct their efforts toward supporting rather than harming indigenous peoples Collaborative indigenous archaeology has already begun to stress the importance of cooperative community based research this book now offers an up to date assessment of how Native American and non native archaeologists have jointly undertaken research that is not only politically aware and historically minded but fundamentally

better as well Eighteen contributors many with tribal ties cover the current state of collaborative indigenous archaeology in North America to show where the discipline is headed Continent wide cases from the Northeast to the Southwest demonstrate the situated nature of local practice alongside the global significance of further decolonizing archaeology And by probing issues of indigenous participation with an eye toward method theory and pedagogy many show how the archaeological field school can be retailored to address politics ethics and critical practice alongside traditional teaching and research methods These chapters reflect the strong link between politics and research showing what can be achieved when indigenous values perspectives and knowledge are placed at the center of the research process They not only draw on experiences at specific field schools but also examine advances in indigenous cultural resource management and in training Native American and non native students Theoretically informed and practically grounded *Collaborating at the Trowel's Edge* is a virtual guide for rethinking field schools and is an essential volume for anyone involved in North American archaeology professionals students tribal scholars or avocationalists as well as those working with indigenous peoples in other parts of the world It both reflects the rapidly changing landscape of archaeology and charts new directions to ensure the ongoing vitality of the discipline **Arts & Humanities Citation Index** ,2002 **Subject Guide to Books in Print** ,1991

Forging Communities in Colonial Alta California Kathleen L. Hull, John G. Douglass, 2018-10-16 Between 1769 and 1834 an influx of Spanish Russian and then American colonists streamed into Alta California seeking new opportunities Their arrival brought the imposition of foreign beliefs practices and constraints on Indigenous peoples *Forging Communities in Colonial Alta California* reorients understandings of this dynamic period which challenged both Native and non Native people to reimagine communities not only in different places and spaces but also in novel forms and practices The contributors draw on archaeological and historical archival sources to analyze the generative processes and nature of communities of belonging in the face of rapid demographic change and perceived or enforced difference Contributors provide important historical background on the effects that colonialism missions and lives lived beyond mission walls had on Indigenous settlement marriage patterns trade and interactions They also show the agency with which Indigenous peoples make their own decisions as they construct and reconstruct their communities With nine different case studies and an insightful epilogue this book offers analyses that can be applied broadly across the Americas deepening our understanding of colonialism and community Contributors Julianne Bernard James F Brooks John Dietler Stella D Oro John G Douglass John Ellison Glenn Farris Heather Gibson Kathleen L Hull Linda Hylkema John R Johnson Kent G Lightfoot Lee M Panich Sarah Peelo Seetha N Reddy David W Robinson Tsim D Schneider Christina Spellman Benjamin Vargas **Colonial Worlds, Indigenous Practices** Stephen Walter Silliman, 2000 **Native Americans at Mission Santa Cruz, 1791-1834** Rebecca Allen, 1998 Recent historical archaeological works have concentrated on the economies of the Alta California mission system within the larger world system The Santa Cruz Mission Adobe is one of the few standing neophyte residences left from the Mission period in

California As such it offers a unique framework for studying the dynamic social and economic interrelationships between the native and Hispanic people at a particular mission It also presents an opportunity to focus on neophyte economic activities

Indians, Missionaries, and Merchants Kent Lightfoot, 2004-11-29 California's earliest European colonists Russian merchants and Spanish missionaries depended heavily on Native Americans for labor to build and maintain their colonies but they did so in very different ways This richly detailed book brings together disparate skeins of the past including little known oral histories native texts ethnohistory and archaeological excavations to present a vivid new view of how native cultures fared under these two colonial systems Kent Lightfoot's innovative work which incorporates the holistic methods of historical anthropology explores the surprising ramifications of these long ago encounters for the present day political status of native people in California Lightfoot weaves the results of his own significant archaeological research at Fort Ross a major Russian mercantile colony into a cross cultural comparison showing how these two colonial ventures one primarily mercantile and one primarily religious contributed to the development of new kinds of native identities social forms and tribal relationships His lively account includes personal anecdotes from the field and a provocative discussion of the role played by early ethnographers such as Alfred Kroeber in influencing which tribes would eventually receive federal recognition Indians Missionaries and Merchants takes a fascinating yet troubling look at California's past and its role in shaping the state today

The Archaeology of Refuge and Recourse Tsim D. Schneider, 2021-10-19 The Archaeology of Refuge and Recourse explores the dual practices of refuge and recourse among Indigenous peoples of California From the eighteenth to the twentieth century Indigenous Coast Miwok communities in California persisted throughout multiple waves of colonial intrusion But to what ends Applying theories of place and landscape social memory and mobility to the analysis of six archaeological sites Tsim D Schneider argues for a new direction in the archaeology of colonialism This book offers insight about the critical and ongoing relationships Indigenous people maintained to their homelands despite colonization and systematic destruction of their cultural sites Schneider is a citizen of the Federated Indians of Graton Rancheria the sovereign and federally recognized tribe of Coast Miwok and Southern Pomo people whose ancestral homelands and homewaters are the central focus of The Archaeology of Refuge and Recourse Viewing this colonial narrative from an Indigenous perspective Schneider focuses on the nearly one quarter of Coast Miwok people who survived the missions and created outlets within and beyond colonial settlements to resist and endure colonialism Fleeing these colonial missions and other establishments and taking refuge around the San Francisco Bay Area Coast Miwok people sought to protect their identities by remaining connected to culturally and historically significant places Mobility and a sense of place further enabled Coast Miwok people to find recourse and make decisions about their future through selective participation in colonial projects In this book Tsim D Schneider argues that these distancing and familiarizing efforts contribute to the resilience of Coast Miwok communities and a sense of relevance and belonging to stolen lands and waters Facing death

violence and the pervading uncertainty of change Indigenous people of the Marin Peninsula balanced the pull and persistence of place against the unknown possibilities of a dynamic colonial landscape and the forward thinking required to survive History change and the future can be read in the story of Coast Miwok people

Narratives of Persistence Lee Panich, 2020-04-21 The Ohlone of the San Francisco Bay area and the Paipai of northern Baja California occupy opposite ends of the spectrum of Native Californian identities Or so it would appear While the Ohlone lack popular recognition and official acknowledgement from the United States government the Paipai occupy a large reserve and celebrate their ongoing cultural traditions throughout Baja California and southern California Yet the two groups share a similar colonial history entanglements with early European explorers labor and enculturation at Spanish missions and sustained interactions with American and Mexican settler colonialism Based on fifteen years of archaeological and historical research in the two regions *Narratives of Persistence* charts the remarkable persistence of the Ohlone and Paipai alongside a synthesis of Native Californian endurance over the past five centuries As the case studies demonstrate Ohlone and Paipai people made intelligent and culturally appropriate choices to cope with the impact of colonialism on their communities even as they took different pathways to the present day Lee M Panich illustrates how changes in Native identity and practice within these colonial contexts were made to best conduct the groups lives within shifting sets of colonial constraints He draws connections between the events and processes of the deeper past and the way the Ohlone and Paipai today understand their own histories and identities offering a model for how scholars of Indigenous histories may think about the connections between the past and the present
