by examining inductively the drivers of the experiences Given the evolutionary treatment of each economic good and service as different this book examines technological catch up with a strong focus on the industries contributing significantly to the economic growth of the countries selected in Asia The evidence produced supports the evolutionary logic of macro meso and micro interactions between several institutions depending on the actors involved structural location and typology of taxonomies and trajectories The book carefully picks out experiences from the populous economies of China India and Indonesia the high income economies of Korea and Taiwan the middle income economies of Malaysia and Thailand and the transitional least developed country of Myanmar Chapters 1 7 of this book were originally published as a special issue of Journal of the Asia Pacific Economy
