Effective Presentation Skills Robert Dilts, 1994 The demands of the Information Age make it increasingly necessary and likely that we will need to make presentations as part of our normal activities Making an

effective presentation requires the ability to communicate and relate to other people. These are very basic skills yet they are not usually taught to us as part of our traditional classroom education or professional training. The purpose of this book is to provide some of the key practical communication and relational skills necessary to make effective presentations; the focus is on people who make presentations for professional reasons. In particular, it focuses on presentations for teaching and training purposes, i.e. those related to organizational learning. In addition to professional trainers and teachers, it includes managers, consultants, and others who need to share knowledge and information. The book covers three general areas involved in making effective presentations in a learning context, including: 1. basic principles for forming an effective communication strategy; 2. designing and planning effective presentations and presentation materials; and 3. managing issues related to motivation and interactions with a group or audience.
