Making Human Rights Work Globally:

Making Human Rights Work Globally Anthony Woodiwiss, 2012-09-10 This book is one of the first studies in the new field of the sociology of human rights and it centres its analysis on labour rights Such rights are of critical importance in this field work being the defining aspect of many peoples lives and a central concern of sociology **Making Human Rights a Reality** Emilie M. Hafner-Burton, 2013-03-21 In the last six decades one of the most striking developments in international law is the emergence of a massive body of legal norms and procedures aimed at protecting human rights In many countries though there is little relationship between international law and the actual protection of human rights on the ground Making Human Rights a Reality takes a fresh look at why it s been so hard for international law to have much impact in parts of the world where human rights are most at risk Emilie Hafner Burton argues that more progress is possible if human rights promoters work strategically with the group of states that have dedicated resources to human rights protection These human rights stewards can focus their resources on places where the tangible benefits to human rights are greatest Success will require setting priorities as well as engaging local stakeholders such as nongovernmental organizations and national human rights institutions To date promoters of international human rights law have relied too heavily on setting universal goals and procedures and not enough on assessing what actually works and setting priorities Hafner Burton illustrates how with a different strategy human rights stewards can make international law more effective and also safeguard human rights for more of the world population **Human Rights in Transition** Nehal Bhuta, 2024 Human Rights in Transition combines rich theoretical reflections with practice informed observations about human rights to consider the present the recent and distant past and the future of human rights **Making Human Dignity Central to International Human Rights Law** Matthew McManus, 2019-09-15 In recent years there has been an explosion of writing on the topic of human dignity across a plethora of different academic disciplines Despite this explosion of interest there is one group critical legal scholars that has devoted little if any attention to human dignity This book argues that these scholars should attend to human dignity a concept rich enough to support a whole range of progressive ambitions particularly in the field of international law It synthesizes certain liberal arguments about the good of self authorship with the critical legal philosophy of Roberto Unger and the capabilities approach to agency of Amartya Sen to formulate a unique conception of human dignity The author argues how human dignity flows from an individual s capacity for self authorship as defined by the set of expressive capabilities s he possesses and the book demonstrates how this conception can enrich our understanding of international human rights law by making the amplification of human dignity its fundamental orientation *Interpreting Human Rights* Rhiannon Morgan, Bryan Turner, 2009-05-07 Written by an international group of leading social science scholars in the field of human rights this volume situates the study of human rights in an open interdisciplinary terrain Ranging over diverse topics and pathways in the theory and practice of human rights this volume will be an invaluable aid to those seeking to understand the complex

meanings institutions and practices of human rights

The Transformation of the Prohibition of Torture in International Law Lutz Oette, 2024-07-05 The prohibition of torture and other cruel inhuman degrading treatment or punishment has a special status It is the foremost international human rights norm protecting persons from attacks on their dignity and integrity Consequently it has been at the forefront of a series of developments in international human rights law and international law more broadly Having withstood sustained challenges to its absolute nature in the war on terror it has broadened its scope of application becoming more sophisticated and complex in the process The prohibition of torture increasingly interacts with other fields of human rights law such as non discrimination law international criminal law international humanitarian law and international migration law The Transformation of the Prohibition of Torture in International Law analyses the nature and significance of this transformation and looks into the scope of the prohibition its further evolution Empirical scholarship innovative human rights body practice and challenges from activists particularly from the Global South have focused on the relational nature of torture and other ill treatment its embeddedness in wider structures of power and the role of international law in legitimizing if not facilitating widespread suffering from mass incarceration to poverty and climate change This analysis reveals an inherent tension in the prohibition between a conventional narrow focus on direct State violence and a wide lens encompassing myriad forms of suffering To retain its validity and effectiveness in the twenty first century argues Lutz Oette the prohibition on torture must navigate this tension and successfully address and transform abusive power asymmetries

Why Human Rights Still Matter in Contemporary Global Affairs Mahmood Monshipouri, 2020-04-29 This book elucidates why human rights still matter in contemporary global affairs and what can lead to better protection of international human rights in a post liberal order It blends theoretical empirical and normative perspectives while providing much needed analysis in light of the perils of populism authoritarianism and toxic nationalism as well as highlighting the hopes with which people around the world view human rights in the new millennium Systematically combining theoretical perspectives from across the disciplines with numerous case studies it demonstrates not only the complexities of the domestic conditions involved but also the ways in which human dignity can be preserved and promoted during periods of rapid change and uncertainty Finally the book addresses the question of how to protect human rights in such a world in which the active promotion of democratic values and enforcement of human rights may not be necessarily aligned with evolving economic and geopolitical interests of many great and diverse powers on the global scene As such it is a timely intervention for human rights as a concept as it has been attacked and eroded by the instability in our world today This book will be of key interest to scholars and students of human rights in politics law philosophy sociology and

history and to humanitarian bodies practitioners and policy makers *Human Rights in the World Community* Richard Pierre Claude, Burns H. transformations in international relations in recent decades Proliferating cross border challenges including global financial crises climate change environmental degradation irregular migration and COVID 19 require governance structures that transcend the nation state and take both global and regional interplay as well as problem solving capacities into account Contributing authors investigate the effectiveness of international cooperation and performance in a diverse range of policy fields *The Oxford Handbook of History and International Relations* Mlada Bukovansky, Edward Keene, Christian Reus-Smit, Maja Spanu, 2023-08-03 Historical approaches to the study of world politics have always been a major part of the academic discipline of International Relations and there has recently been a resurgence of scholarly interest in this area This Oxford Handbook examines the past and present of the intersection between history and IR and looks to the future by laying out new questions and directions for research Seeking to transcend well worn disciplinary debates between historians and IR scholars the Handbook asks authors from both fields to engage with the central themes of modernity and granularity Modernity is one of the basic organising categories of speculation about continuity and discontinuity in the history of world politics but one that is increasingly questioned for privileging one kind of experience and marginalizing others The theme of granularity highlights the importance of how decisions about the scale and scope of historical research in IR shape what can be seen and how one sees it Together these themes provide points of affinity across the wide range of topics and approaches presented here The Handbook is organized into four parts The first Readings gives a state of the art analysis of numerous aspects of the disciplinary encounter between historians and IR theorists Thereafter sections on Practices Locales and Moments offer a wide variety of perspectives from the longue durée to the ephemeral individual moment and challenge many conventional ways of defining the contexts of historical enquiry about international relations Contributors come from a range of academic backgrounds and present a diverse array of methodological and philosophical ideas as well as their various historical interests The Oxford Handbooks of International Relations is a twelve volume set of reference books offering authoritative and innovative engagements with the principal sub fields of International Relations The series as a whole is under the General Editorship of Christian Reus Smit of the University of Queensland and Duncan Snidal of the University of Oxford with each volume edited by specialists in the field The series both surveys the broad terrain of International Relations scholarship and reshapes it pushing each sub field in challenging new directions Following the example of Reus Smit and Snidal s original Oxford Handbook of International Relations each volume is organized around a strong central thematic by

scholars drawn from different perspectives reading its sub field in an entirely new way and pushing scholarship in challenging new directions *Tipping Points in International Law* Jean d'Aspremont, John Haskell, 2021-10-28 Addressing some of the most perilous controversial issues in international law and governance this volume brings together legal scholars from diverse geographic personal and scholarly perspectives They reflect on the pervasive feeling of crisis in the world today and share their views on the possibilities and limits of the international legal architecture and its expert communities in shaping the world of tomorrow What exactly is this feeling that the contemporary international legal architecture is at a tipping point What do these possible risks expose about the fragility and limits of our current conceptual and institutional order What commitments drive our hopes and anxieties Authors explore these questions across a wide range of possible tipping points and offer readers a unique snapshot of the lived experience of what it means to be an expert engaged right now in international law and governance Each chapter covers both theory and practice in analysing a current problem

International Encyclopedia of Economic Sociology Jens Beckert, Milan Zafirovski, 2005-10-27 The International Encyclopedia of Economic Sociology is the first encyclopedia in the field and a timely response to the surge of interest in economic sociology over the last 30 years Economic Sociology deals with the multiple and complex relations between economy and society In particular it focuses on the impact of social political and cultural **Reconstructing Human Rights** Joe Hoover, 2016-05-27 We live in a human rights world The language of human rights claims and numerous human rights institutions shape almost all aspects of our political lives yet we struggle to know how to judge this development Scholars give us good reason to be both supportive and sceptical of the universal claims that human rights enable alternatively suggesting that they are pillars of cross cultural understanding of justice or the ideological justification of a violent and exclusionary global order All too often however our evaluations of our human rights world are not based on sustained consideration of their complex ambiguous and often contradictory consequences Reconstructing Human Rights argues that human rights are only as good as the ends they help us realise We must attend to what ethical principles actually do in the world to know their value So for human rights we need to consider how the identity of humanity and the concept of rights shape our thinking structure our political activity and contribute to social change Reconstructing Human Rights defends human rights as a tool that should enable us to challenge political authority and established constellations of political membership by making new claims possible Human rights mobilise the identity of humanity to make demands upon the terms of legitimate authority and challenges established political memberships In this work it is argued that this tool should be guided by a democratising ethos in pursuit of that enables claims for more democratic forms of politics and more inclusive political communities While this work directly engages with debates about human rights in philosophy and political theory in connecting our evaluations of the value of human rights to their worldly consequences it will also be of interest to scholars considering human rights across disciplines including Law Sociology and Anthropology
