**The Making of a Cybertariat** Ursula Huws, 2003-07 A new global labour force is being created working in call centres homes and electronic sweatshops New technologies are also transforming daily life This book presents a coherent conceptual framework within which these developments can be understood

*Labor in the Global Digital Economy* Ursula Huws, 2014-12-05 For every person who reads this text on the printed page many more will read it on a computer screen or mobile device It s a situation that we increasingly take for granted in our digital era and while it is indicative of the novelty of twenty first century capitalism it is also the key to understanding its driving force the relentless impulse to commodify our lives in every aspect Ursula Huws ties together disparate economic cultural and political phenomena of the last few decades to form a provocative narrative about the shape of the global capitalist economy at present She examines the way that advanced information and communications technology has opened up new fields of capital accumulation in culture and the arts in the privatization of public services and in the commodification of human sociality by way of mobile devices and social networking These trends are in turn accompanied by the dramatic restructuring of work arrangements opening the way for new contradictions and new forms of labor solidarity and struggle around the planet Labor in the Global Digital Economy is a forceful critique of our dizzying contemporary moment one that goes beyond notions of mere connectedness or free flowing information to illuminate the entrenched mechanisms of exploitation and control at the core of capitalism

**The Digital Continent** Mohammad Amir Anwar, Mark Graham, 2022-02-03 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations As recently as the early 2010s there were more internet users in countries like France or Germany than in all of Africa put together But much changed in that decade and 2018 marked the first year in human history in which a majority of the world s population is now connected to the internet This mass connectivity means that we have an internet that no longer connects only the world s wealthy Workers from Lagos to Johannesburg to Nairobi and everywhere in between can now apply for and carry out jobs coming from clients who themselves can be located anywhere in the world Digital outsourcing firms can now also set up operations in the most unlikely of places in order to tap into hitherto disconnected labour forces With CEOs in the Global North proclaiming that location is a concern of the past and governments and civil society in Africa promising to create millions of jobs on the continent The Digital Continent investigates what this new world of digital work means to the lives of African workers Anwar and Graham draw on a five year long field study in South Africa Kenya Nigeria Ghana and Uganda and over 200 interviews conducted with participants including gig workers call and contact centre workers small self

employed freelancers business owners government officials labour union officials and industry experts Focusing on both platform based remote work and call and contact centre work the book examines the job quality implications of digital work for the lives and livelihoods of African workers

**The Digital Transformation of Labor** Anthony Larsson, Robin Teigland, 2019-11-11 Through a series of studies the overarching aim of this book is to investigate if and how the digitalization digital transformation process causes or may cause the autonomy of various labor functions and its impact in creating or stymieing various job opportunities on the labor market This book also seeks to illuminate what actors groups are mostly benefited by the digitalization digital transformation and which actors groups that are put at risk by it This book takes its point of departure from a 2016 OECD report that contends that the impact digitalization has on the future of labor is ambiguous as on the one hand it is suggested that technological change is labor saving but on the other hand it is suggested that digital technologies have not created new jobs on a scale that it replaces old jobs Another 2018 OECD report indicated that digitalization and automation as such does not pose a real risk of destroying any significant number of jobs for the foreseeable future although tasks would by and large change significantly This would affects welfare as most of its revenue stems from taxation and particularly so from the taxation on labor directly or indirectly For this reason this book will set out to explore how the future technological and societal advancements impact labor conditions The book seeks to provide an innovative enriching and controversial take on how various aspects of the labor market can be and are affected the ongoing digitalization trend in a way that is not covered by extant literature As such this book intends to cater to a wider readership from a general audience and students to specialized professionals and academics wanting to gain a deeper understanding of the possible future developments of the labor market in light of an accelerating digitalization digital transformation of society at large

*Invisible Labour* Indranil Chakraborty, 2020-10-05 This book investigates the life working conditions and urban experiences of support service workers such as janitors security guards culinary workers and carpool drivers in the information technology IT sector of India Largely omitted from academic discourse support service workers are crucial to the Indian IT industry Drawing on interviews with such workers in seven Indian cities with a large concentration of software service companies this volume Uses quantitative and qualitative analyses to map and assess workers responses to migration from rural occupations to a modern urban employment setting Explores the everyday grind of migrant workers in the context of the homogenizing effects of globalization in an alienating urban environment and discusses how their dislodgment from the structures of rural life gender and caste roles has placed them in a space of contestation between traditions and the opportunities and challenges offered by digital society in the form of freedom individualism flexibility and innovation Traces the evolution of new areas of class and identity formations as well as the hegemonic relations within that ethos imposed by contractors and corporations The volume will be of great interest to scholars and researchers of sociology and social anthropology urban studies development studies labour studies social exclusion and South Asian studies

**Capitalism,**

**Citizenship and the Arts of Thinking** Kathryn Dean, 2014-03-26 Capitalism Citizenship and the Arts of Thinking proposes a historical materialist ethic of human flourishing understood in terms of the practice of citizenship It focuses on the ways in which capitalism s necessary mode of thinking analytical thinking impedes the nurturing of capabilities for citizenship as understood from a Marxian Aristotelian point of view It includes a systematic discussion of the Aristotelian resonances in Marx s critique of capitalism as well as an elaboration and critique of Alfred Sohn Rethel s account of the origins of analytical thinking in his book Intellectual and Manual Labor A Critique of Epistemology Dean s critique of this book draws on the language theories of Lev Vygotsky Alexander Luria Jack Goody Eric Havelock and Walter Ong so as to identify the origins of analytical thinking in literacy rather than in monetised exchange relations as claimed by Sohn Rethel Having traced the development of analytical thinking so as to bring out the ways in which this thinking was a condition of possibility for the division of head and hand in nineteenth century England Dean brings the analysis into the contemporary world by examining the changes effected by digitalised communication in terms citizenship capabilities now drawing on the work of Michael Hardt and Antonio Negri in order to do so The book s ground breaking content is in the fusion of Marxian Aristotelian and linguistic elements to develop a critique of capitalism s hegemonic mode of thinking analytical thinking as manifested in the modern sciences and to show how the draining of intelligibility from the everyday world permitted by this thinking becomes an obstacle to the practice of meaningful citizenship Its main appeal will be to Marxist thinkers whose main concern is with the alienating as opposed to exploitative character of capitalist modes of life It is written to complement the work of such Marxists these being in the main writers such as Michael Hardt and Antonio Negri and is pitched at researchers in the field It could be used on post graduate courses in political theory as well as social and cultural theory [Encyclopedia of Gender and Information Technology](#) Trauth, Eileen M., 2006-06-30 This two volume set includes 213 entries with over 4 700 references to additional works on gender and information technology Provided by publisher [Capital and Its Discontents](#) Sasha Lilley, 2011-03-07 Capitalism is stumbling empire is faltering and the planet is thawing Yet many people are still grasping to understand these multiple crises and to find a way forward to a just future Into the breach come the essential insights of Capital and Its Discontents which cut through the gristle to get to the heart of the matter about the nature of capitalism and imperialism capitalism s vulnerabilities at this conjuncture and what can we do to hasten its demise Through a series of incisive conversations with some of the most eminent thinkers and political economists on the Left including David Harvey Ellen Meiksins Wood Mike Davis Leo Panitch Tariq Ali and Noam Chomsky Capital and Its Discontents illuminates the dynamic contradictions undergirding capitalism and the potential for its dethroning The book challenges conventional wisdom on the Left about the nature of globalization neoliberalism and imperialism as well as the agrarian question in the Global South It probes deeply into the roots of the global economic meltdown the role of debt and privatization in dampening social revolt and considers capitalism s dynamic ability to find ever new sources of accumulation whether through imperial or

ecological plunder or the commodification of previously unpaid female labor The Left luminaries in *Capital and Its Discontents* look at potential avenues out of the mess as well as wrong turns and needless detours drawing lessons from the history of post colonial states in the Global South struggles against imperialism past and present the eternal pendulum swing of radicalism the corrosive legacy of postmodernism and the potentialities of the radical humanist tradition At a moment when capitalism as a system is more reviled than ever here is an indispensable toolbox of ideas for action by some of the most brilliant thinkers of our times

Moore,Martin Upchurch,Xanthe Whittaker,2017-10-06 This edited collection provides a series of accounts of workers local experiences that reflect the ubiquity of work s digitalisation Precarious gig economy workers ride bikes and drive taxis in China and Britain call centre workers in India experience invasive tracking warehouse workers discover that hidden data has been used for layoffs and academic researchers see their labour obscured by a data foam that does not benefit them These cases are couched in historical accounts of identity and selfhood experiments seen in the Hawthorne experiments and the

lineage of automation This book will appeal to scholars in the Sociology of Work and Digital Labour Studies and anyone interested in learning about monitoring and surveillance automation the gig economy and the quantified self in the workplace

**No Place Like Home , Academic Labour, Unemployment and Global Higher Education** Suman Gupta,Jernej Habjan,Hrvoje Tutek,2016-05-27 This book explores how the kinds of world wide restructurings of higher education and research work that are underway today have not only increased employment insecurity in academia but may actually be producing unemployment both for those within academia and for graduate job seekers in other sectors Recent and current reorganisations of higher education and research work and re orientations of academic life as students researchers teachers generally which are taking place around the world achieve exactly the opposite of what they claim though ostensibly undertaken to facilitate employment these moves actually produce unemployment both for those within academia and for graduate job seekers in other sectors

Policy Implications of Virtual Work Pamela Meil,Vassil Kirov,2017-04-07 This collection presents an array of policy debates and implications emerging from virtual work The authors cover a range of areas including conceptual debates measuring virtual work discourses and levels of policy intervention the role of the sharing and collaborative economy and resultant challenges for organized labour law and regulation The authors of the chapters analyse the ways in which processes of digitalization leading to virtual work impact so many aspects of our lives the way we buy sell network communicate participate create consume and of course the way we work In turn they focus on the subsequent implications for the future of work as well as the viability of existing social protection systems The developments examined here are salient for both policy stakeholders and for the academic community in areas such as labour sociology industrial relations gender studies political economy and economic geography

**Reverse Engineering Social Media** Robert W Gehl,2014-06-27 Robert Gehl s timely critique Reverse Engineering Social Media rigorously analyzes the ideas of social media and software engineers using these ideas to find contradictions and fissures beneath the surfaces of glossy sites such as Facebook Google and Twitter Gehl adeptly uses a mix of software studies science and technology studies and political economy to reveal the histories and contexts of these social media sites Looking backward at divisions of labor and the process of user labor he provides case studies that illustrate how binary Like consumer choices hide surveillance systems that rely on users to build content for site owners who make money selling user data and that promote a culture of anxiety and immediacy over depth Reverse Engineering Social Media also presents ways out of this paradox illustrating how activists academics and users change social media for the better by building alternatives to the dominant social media sites

**Managerial Control of American Workers** Mel van Elteren,2017-03-04 Today surveillance and regulation of employees are pervasive at all levels except the highest in a wide variety of American workplaces Digital information systems have become important tools of managerial control The constraints built into these systems by so called business process reengineering are a continuation of scientific management principles developed during the late 19th century Additional

means of control have included employment based welfare capitalism and human relations and corporate culture approaches This book provides fresh insight into various practices of managerial control from the 1880s to the present and their effects on work organization and quality and worker skill requirements The author highlights current developments including those focused on highly skilled knowledge workers accounting for enhanced automation offshoring and related changes in the production and distribution of goods and services

**Rethinking Markets in Modern India** Ajay Gandhi, Barbara Harriss-White, Douglas E. Haynes, Sebastian Schwecke, 2020-10-01 To people operating in India's economy actually existing markets are remarkably different from how planners and academics conceive them From the outside they appear as demarcated arenas of exchange bound by state imposed rules As historical and social realities however markets are dynamic adaptative and ambiguous spaces This book delves into this intricate context exploring Indian markets through the competition and collaboration of those who frame and participate in markets Anchored in vivid case studies from colonial property and advertising milieus to today's bazaar and criminal economies this volume underlines the friction and interdependence between commerce society and state Contributors from history anthropology political economy and development studies synthesize existing scholarly approaches add new perspectives on Indian capitalism's evolution and reveal the transactional specificities that underlie the real world functioning of markets
