Unpaid Care Policies in the UK Liz

Lloyd,2024-12-10 This book examines policies on unpaid care throughout the UK since the 1990 NHS and Community Care Act It questions why after decades of policies and strategies unpaid care remains in a marginal position in the social care system and in society more broadly as demonstrated during the COVID 19 pandemic It provides critical analysis of key policies and professional practice over three decades and highlights the continuing challenges faced by people in caring relationships as well as reflecting on developments in the position of unpaid carers in the system of social care By

questioning why this crucially important sphere of human life remains under resourced it sheds light on the ways in which care is understood and how policy makers and service providers perceive the need for support

Transport and accessibility to public services Great Britain: Parliament: House of Commons: Environmental Audit Committee,2013-06-24 This report looks at progress on improving accessibility since 2003 and ways of improving accessibility Problems with transport provision and the location of services can reinforce social exclusion by preventing people from accessing key local services and undermines government policies to tackle worklessness increase participation in education reduce crime and narrow health inequalities Insufficient progress has been made since the 2003 Social Exclusion Unit s Making the Connections report many findings of which are relevant today There is evidence that accessibility is worsening driven by tight budgets in central and local government Accessibility statistics show travel times to key services steadily increasing over time particularly for access to hospitals The Department for Transport needs to focus more closely on improving accessibility as well as on supporting the economy Existing transport funding could be better coordinated and directed to accessibility focused initiatives which will have a swifter impact on people s well being than large infrastructure projects The social value of transport and accessibility needs to be explicitly considered in policy making and in the planning system and should no longer be seen as a second order criterion The Committee believes it will take time for any improvements to make a noticeable difference Their recommendations focus on improving how government operates rather than funding Central government cannot abdicate its role in coordinating action across departmental silos and helping local authorities and service providers to share best practice Accessibility planning introduced by Making the Connections has had limited success and needs to be re energised
