Making Parents The Ontological Choreography Of Reproductive Technologies Inside Technology:

Making Parents Charis Thompson, 2005 Reproductive technologies says Thompson are part of the increasing tendency to turn social problems into biomedical questions and can be used as a lens to see the resulting changes in the relations between science and society **BOOK JACKET** **Women, Science, and Technology** Mary Wyer, Mary Barbercheck, Donna Cookmeyer, Hatice Ozturk, Marta Wayne, 2013-09-11 Women Science and Technology is an ideal reader for courses in feminist science studies This third edition fully updates its predecessor with a new introduction and twenty eight new readings that explore social constructions mediated by technologies expand the scope of feminist technoscience studies and move beyond the nature culture paradigm **Bioethics and Biopolitics in Israel** Hagai Boas, Yael Hashiloni-Dolev, Shai J. Lavi, Dani Filc, Nadav Davidovitch, 2018-01-11 A collection of studies in bioethics and society that goes beyond conventional medical ethics and suggests political socio legal and empirical analysis *Revisiting the Regulation of Human Fertilisation and Embryology* Kirsty Horsey, 2015-06-19 The Human Fertilisation and Embryology Act 2008 was a major update to the UK s laws on the use and regulation of reproductive technology and assisted reproduction Since the enactment of the new law the sector s regulatory body the Human Fertilisation and Embryology Authority HFEA has also consulted on various related topics including barriers to egg and sperm donation in the UK multiple births single embryo transfer and using IVF technology to prevent mitochondrial disease This book critically considers recent developments in human fertilisation legislation asking whether the 2008 Act has achieved its stated aim of being fit for purpose Bringing together a range of international experts the book evaluates the fresh risks and challenges emerging from both established and existing technologies and techniques in the field of human fertilisation and embryology as well as offering valuable insights into the social and regulatory challenges that lie ahead Key topics include problems with DIY assisted conception the lack of reform in respect of the regulation of surrogacy arrangements and mitochondrial DNA transfer As a review of the status of assisted reproduction legislation this book will be of great use and interest to students researchers and practitioners in medical law bioethics medicine and child welfare *The Routledge Handbook of Feminist Bioethics* Wendy A. Rogers, Jackie Leach Scully, Stacy M. Carter, Vikki A. Entwistle, Catherine Mills, 2022-07-28 The Routledge Handbook of Feminist Bioethics is an outstanding resource for anyone with an interest in feminist bioethics with chapters covering topics from justice and power to the climate crisis Comprising forty two chapters by emerging and established scholars the volume is divided into six parts I Foundations of feminist bioethics II Identity and identifications III Science technology and research IV Health and social care V Reproduction and making families VI Widening the scope of feminist bioethics The volume is essential reading for anyone with an interest in bioethics or feminist philosophy and will prove an invaluable resource for scholars teachers and advanced students Chapters 2 22 and 30 of this book will soon be freely available as downloadable Open Access PDFs under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license at www.taylorfrancis.com *Eggonomics* Diane

M. Tober, 2024-10-18 What happens when people are reduced to products By pulling back the clinical curtain on the multi billion dollar per year global egg industry that is the central question Eggonomics seeks to address Tracing the emotional and physical journeys egg donors embark upon as suppliers of valuable commodities this book reveals uncomfortable realities at the heart of the industry Donors and the eggs they provide are absolutely essential to helping others create the families of their dreams But not all clinics treat their donors as well as their paying patients and many donors suffer as a result Technological innovations allow the egg donation industry to expand fueling the private equity incursion into fertility medicine turning once private clinics into highly profitable multinational conglomerates Drawing upon international anthropological fieldwork Eggonomics reveals the clinical spaces where egg donor s bodies are tested prodded and poked for ever increasing sums of profit eugenic forces drive donor selection and the unrelenting pressures of global capitalism threaten medicine s prime directive of do no harm Timely meticulously researched and written with surgical precision Eggonomics is a crucial read for researchers medical professionals policymakers and anyone considering becoming or using an egg donor *Rethinking Disability Theory and Practice* K. Lesnik-Oberstein, 2015-06-03 Drawing from work in a wide range of fields this book presents novel approaches to key debates in thinking about and defining disability Differing from other works in Critical Disability Studies it crucially demonstrates the consequences of radically rethinking the roles of language and perspective in constructing identities Intimate Economies Susanne Hofmann, Adi Moreno, 2017-01-03 This book illustrates how intimate workers in different socio cultural contexts negotiate the commercial uses of their sexuality identity affect and bodies thereby often defying inequality impoverishment and resource depletion in their regions The studies shed light on the multi faceted experiences of subjects involved in intimate economies oscillating between personal empowerment and agency as well as the required subjection to the demands of the current market regime entailing participation in precarious employment often involving bodily risk economic exploitation and stigmatization The contributions demonstrate the interrelatedness of market intimacy family economies and transnational care arrangements and thereby challenge Western notions of the subject and the free market *The New Kinship* Naomi R. Cahn, 2013-01-07 No federal law in the United States requires that egg or sperm donors or recipients exchange any information with the offspring that result from the donation Donors typically enter into contracts with fertility clinics or sperm banks which promise them anonymity The parents may know the donor s hair color height IQ college and profession they may even have heard the donor s voice But they don t know the donor s name medical history or other information that might play a key role in a child s development And until recently donor conceived offspring typically didn t know that one of their biological parents was a donor But the secrecy surrounding the use of donor eggs and sperm is changing And as it does increasing numbers of parents and donor conceived offspring are searching for others who share the same biological heritage When donors recipients and donor kids find each other they create new forms of families that exist outside of the law *The New Kinship*

details how families are made and how bonds are created between families in the brave new world of reproductive technology Naomi Cahn a nationally recognized expert on reproductive technology and the law shows how these new kinship bonds dramatically exemplify the ongoing cultural change in how we think about family The issues Cahn explores in this book will resonate with anyone and everyone who has struggled with questions of how to define themselves in connection with their own biological legal or social families

Conceiving Christian America Risa Cromer, 2023-09-05 Winner of the 2024 Eileen Basker Memorial Prize from the Society for Medical Anthropology How embryo adoption advances the Christian Right's political goals for creating a Christian nation In 1997 a group of white pro life evangelical Christians in the United States created the nation's first embryo adoption program to save the thousands of frozen human embryos remaining from assisted reproduction procedures which they contend are unborn children While a small part of US fertility services embryo adoption has played an outsized role in conservative politics from high profile battles over public investment in human embryonic stem cell research to the overturning of Roe v Wade Based on six years of ethnographic research with embryo adoption staff and participants Risa Cromer uncovers how embryo adoption advances ambitious political goals for expanding the influence of conservative Christian values and power Conceiving Christian America is the first book on embryo adoption tracing how this powerful social movement draws on white saviorist tropes in their aims to reconceive personhood with drastic consequences for reproductive rights and justice Documenting the practices narratives and beliefs that move embryos from freezers to uteruses this book wields anthropological wariness as a tool for confronting the multiple tactics of the Christian Right Timely and provocative Conceiving Christian America presents a bold and nuanced examination of a family making process focused on conceiving a Christian nation

The Right to Life and the Value of Life Jon Yorke, 2016-03-03 This groundbreaking book is the first collection to investigate the law political science and ethical perspectives collectively in relation to the right and value of life Its contributions from international roster of scholars are organized around five themes a theoretical positioning of life and death War armed conflict and detention Death as punishment Medical parameters for ending life and medical policies for the preservation of life In studying this issue in its contemporary contexts of right and value the volume fills the current scholarly lacuna in the general subject of the orientations of life It presents a much needed examination of key issues in a broad practical and theoretical context and holds broad appeal for scholars researchers and students occupied with issues of war armed conflict the death penalty and various contemporary medico legal scenarios

Relatedness in Assisted Reproduction Tabitha Freeman, Susanna Graham, Fatemeh Ebtehaj, Martin Richards, 2014-08-14 Assisted reproduction challenges and reinforces traditional understandings of family kinship and identity Sperm egg and embryo donation and surrogacy raise questions about relatedness for parents children and others involved in creating and raising a child How socially morally or psychologically significant is a genetic link between a donor conceived child and their donor What should children born through assisted reproduction be told about their origins Does it matter if a parent is genetically

unrelated to their child How do experiences differ for men and women using collaborative reproduction in heterosexual or same sex couples single parent families or co parenting arrangements What impact does the wider cultural socio legal and regulatory context have In this multidisciplinary book an international team of academics and clinicians bring together new empirical research and social science legal and bioethical perspectives to explore the key issue of relatedness in assisted reproduction *The Cambridge Companion to Gender and the Law* Stéphanie Hennette Vauchez, Ruth

Rubio-Marín, 2023-01-26 With systematic thematic chapters this volume demonstrates how law and gender co produce gendered legal subjects *The Palgrave Handbook of Infertility in History* Gayle Davis, Tracey Loughran, 2017-09-01 This ground breaking interdisciplinary volume provides an overdue assessment of how infertility has been understood treated and experienced in different times and places It brings together scholars from disciplines including history literature psychology philosophy and the social sciences to create the first large scale review of recent research on the history of infertility Through exploring an unparalleled range of chronological periods and geographical regions it develops historical perspectives on an apparently transhistorical experience It shows how experiences of infertility access to treatment and medical perspectives on this condition have been mediated by social political and cultural discourses The handbook reflects on and interrogates different approaches to the history of infertility including the potential of cross disciplinary perspectives and the uses of different kinds of historical source material and includes lists of research resources to aid teachers and researchers It is an essential go to point for anyone interested in infertility and its history Chapter 19 is open access under a CC BY 4.0 license via link [springer.com](https://www.springer.com) *Gender, Health, and History in Modern East Asia* Angela Ki Che Leung, Izumi Nakayama, 2017-11-22 This groundbreaking volume captures and analyzes the exhilarating and at times disorienting experience when scientists government officials educators and the general public in East Asia tried to come to terms with the introduction of Western biological and medical sciences to the region The nexus of gender and health is a compelling theme for this is an area in which private lives and personal characteristics encounter the interventions of public policies The nine empirically based studies by scholars of history of medicine sociology anthropology and STS science technology and society spanning Japan Korea China Taiwan and Hong Kong from the 1870s to the present demonstrate just how tightly concerns with gender and health have been woven into the enterprise of modernization and nation building throughout the long twentieth century The concepts of gender and health have become so commonly used that one might overlook that they are actually complicated notions with vexed histories even in their native contexts Transposing such terminologies into another historical or geographical dimension is fraught with problems and what makes the East Asian cases in this volume particularly illuminating is that they present concepts of gender and health in motion The studies show how individuals and societies made sense of modern scientific discourses on diseases body sex and reproduction redefining existing terms in the process and adopting novel ideas to face new challenges and demands Whether reviewing the comparative national histories

of birth control debating early cases of transsexual surgery or highlighting the resurgence of traditional Asian medical commodities this volume provides accessible and productive studies on these intriguing topics in Asia Scholars of modern East Asia and indeed anyone concerned with the analysis of gender and health in light of intersecting postcolonial studies will find the book rewarding Rayna Rapp New York University A bold and important volume that explores the interweaving of gender body and modernity throughout East Asia With vivid articles on sexuality reproductive technologies and sexual identities the book opens multiple possibilities for how Asia as method can shine new light on persistent theoretical questions from biopower to biocitizenship Ruth Rogaski Vanderbilt University

Selective Reproduction in the 21st Century Ayo Wahlberg, Tine M. Gammeltoft, 2017-08-12 This book explores how conditions for childbearing are changing in the 21st century under the impact of new biomedical technologies Selective reproductive technologies SRTs technologies that aim to prevent or promote the birth of particular kinds of children are increasingly widespread across the globe Wahlberg and Gammeltoft bring together a collection of essays providing unique ethnographic insights on how SRTs are made available within different cultural socio economic and regulatory settings and how people perceive and make use of these new possibilities as they envision and try to form their future lives Topics covered include sex selective abortions termination of pregnancies following detection of fetal anomalies during prenatal screening the development of preimplantation genetic diagnosis techniques as well as the screening of potential gamete donors by egg agencies and sperm banks This is invaluable reading for scholars of medical anthropology medical sociology and science and technology studies as well as for the fields of gender studies reproductive health and genetic disease research

Sex Itself Sarah S. Richardson, 2013-12-13 Human genomes are 99.9 percent identical with one prominent exception Instead of a matching pair of X chromosomes men carry a single X coupled with a tiny chromosome called the Y Tracking the emergence of a new and distinctive way of thinking about sex represented by the unalterable simple and visually compelling binary of the X and Y chromosomes *Sex Itself* examines the interaction between cultural gender norms and genetic theories of sex from the beginning of the twentieth century to the present postgenomic age Using methods from history philosophy and gender studies of science Sarah S Richardson uncovers how gender has helped to shape the research practices questions asked theories and models and descriptive language used in sex chromosome research From the earliest theories of chromosomal sex determination to the mid century hypothesis of the aggressive XYY supermale to the debate about Y chromosome degeneration to the recent claim that male and female genomes are more different than those of humans and chimpanzees Richardson shows how cultural gender conceptions influence the genetic science of sex Richardson shows how sexual science of the past continues to resonate in ways both subtle and explicit in contemporary research on the genetics of sex and gender With the completion of the Human Genome Project genes and chromosomes are moving to the center of the biology of sex *Sex Itself* offers a compelling argument for the importance of ongoing critical dialogue on how cultural conceptions of gender operate within the science of sex

Altering

Nature B. A. Lustig, B.A. Brody, Gerald P. McKenny, 2008-11-01 B Andrew Lustig Baruch A Brody and Gerald P McKenny In this second volume of the Altering Nature project we situate specific religious and policy discussions of four broad areas of biotechnology within the context of our interdisciplinary research on concepts of nature and the natural in the first volume *Altering Nature Concepts of Nature and the Natural in Biotechnology Debates* In the first volume we invited five groups of scholars to explore the diverse conceptions of nature and the natural that shape moral judgments about human alterations of nature as especially exemplified by recent developments in biotechnology A careful reading of such developments reveals that assessments of them whether positive or negative are often informed by different conceptual interpretations of nature and the natural with differing implications for judgments about the appropriateness of particular alterations of nature These varying interpretations of nature and the natural often result from the distinctive perspectives that characterize various scholarly disciplines Therefore in an effort to explore the variety of meanings that attend discussions of the concepts of nature and the natural the contributors to the first volume of *Altering Nature* addressed those concepts from five different disciplinary vantages A first group of scholars analyzed a range of religious and spiritual perspectives on concepts of nature and the natural Their research highlighted the thematic historical and methodological touchstones in those traditions that shape their perspectives on nature

Kinship as Fiction Anindita Majumdar, Yoko Taguchi, 2024-10-25 Bringing together emerging ethnographies on kinship in South Asia this book explores the idea of kinship as fiction in intimate relationships Fictions and fictive kinship within anthropology are contested ideas Increasingly research suggests the idea of intimate relationships has to extend beyond the biological assumption of kinship relations The idea of fiction is also not free from the biological imagination or the persistent dichotomy of nature culture nurture nature This edited volume resurrects the idea of fiction and fictiveness to understand how intimate relationships may use these particular labels translate into practices or create an experiential understanding around relationships The chapters in this book reengage the idea of fiction by exploring the ambiguity within household relationships the process of making and engaging with a craft and skill and the intricacies of making children through IVF and third party involvement They challenge societal norms of marriage and being married by reframing shared substances and the relationality they carry and by remembering deceased ties through acts of resurrection Through vivid illustrations of life and living in South Asia each chapter contributes to an understanding of how fiction and reality are mutually creating each other This book will be beneficial to students academics and scholars of anthropology particularly those interested in kinship and the sociology of the family The chapters in this book were originally published as a special issue of *Contemporary South Asia*

Bodies in Formation Rachel Prentice, 2013 In *Bodies in Formation* anthropologist Rachel Prentice enters surgical suites increasingly packed with new medical technologies to explore how surgeons are made in the early twenty first century
