Making Markets Work For The Environment:

Making Environmental Markets Work Tabitha M. Benney, 2014-11-27 Perhaps the most defining characteristic of the global economy today is the rise of emerging market economies EMEs Many states have experienced rapid economic growth over the past two decades that has led to an increasing share of global wealth Such dramatic changes are highly relevant because they raise important issues about the distribution of global monetary and fiscal power As the EMEs have gained importance in the global economy their influence and significance have grown across a wide range of policy domains One particularly relevant example is the increasingly critical role of EMEs in addressing climate change Contrary to the popular belief that the level of development determines a country's ability to produce positive environmental outcomes this book shows that the variation in environmental outcomes among the EMEs is due to differences in the types of economic institutions prevalent in their economies Since EMEs differ dramatically on a number of variables examining national variations in economic institutions helps explain why international climate policy has been more successful in some countries than in others To assess how variations in capitalism may influence important outcomes this book explores a representative sample of 31 EMEs and employs a mixed method research design that incorporates both conventional regression analysis and Qualitative Comparative Analysis QCA to explain these outcomes The analysis shows that although liberal market economies were expected to perform better than other types of capitalism their performance fell below expectations On the contrary economic institutions related to coordinated types of capitalism like those found in China and Brazil have led to greater Clean Development Mechanism CDM market participation Theoretically informed this book employs innovative ways of understanding a broad set of increasingly important but under studied states in an effort to highlight the interactions found in complex socio political and ecological systems With the growing importance of the EMEs a better understanding of how to design market based policies with them in mind will be required if future efforts across a range of policy issues are to be meaningful and effective

Making Markets Work for Africa Eleanor M. Fox, Mor Bakhoun, 2019 This is a book on market law and policy in sub Saharan Africa It shows how markets can be harnessed by poorer and developing economies to help make the markets work for them to help them integrate into the world economy and raise the standard of living for their people while preserving their values of inclusive development It studies particular countries and particular regions delving deeply into the facts

Making Markets More Inclusive K. McKague, M. Siddiquee, 2014-07-24 Most studies of doing business at the bottom of the economic pyramid focus on viewing the poor as consumers as micro entrepreneurs or as potential employees of local companies Almost no analysis focuses on the poor as primary producers of agricultural commodities a striking omission given that primary producers are by far the largest segment of the working age population in developing economies *Making Markets More Inclusive* bridges the management literature with original research on agricultural value chains in developing and emerging economies This exciting work is the first to delve into the skills

capabilities strategies and approaches needed for inclusive value chain development McKague shows how NGOs and companies can connect poor producers in developing economies with the right markets to better create social and economic impact He also analyzes one of the leading agricultural value chain initiatives in the world which is being replicated by the Bill and Melinda Gates Foundation in several different value chains in Malawi Tanzania Ghana India and Mali Want more Check out these compelling videos which provide a glimpse into the stories and examples used throughout the book Video Trailer for Making Markets More Inclusive Farmer Training Kallani Rani increased the productivity of her cows become a cattle feed seller in her village Chapter 6 and opened a fresh milk canteen in her local market Chapter 7 She now trains other women farmers and works to improve opportunities for women in her community Chapter 5 Animal Health Care Services Asma Husna trained to be an animal health worker with CARE to provide important animal health services and education to local farmers on a fee for service basis Chapter 6 Cattle Feed Shops Fulera Akter started a business as a cattle feed seller after demand for nutritional animal feed grew due to farmers improved knowledge of nutrition Chapter 6 Savings Groups Coauthor Muhammad Siddiquee the Coordinator of Agriculture and Value Chain Programs at CARE Bangladesh discusses the value of farmer savings groups Chapter 6 Milk Collection Sarothi Rani became a milk collector to earn an improved income for her family and provide an important service to other dairy farmers in her community Chapter 7 Digital Fat Testing Introducing digital fat testing machines into the dairy value chain helped reward farmers for making investments in producing higher quality milk as well as ensuring transparent and timely payments Chapter 7 Microfranchising Supporting agricultural input shop owners with training relationships to suppliers common branding and standardized customer services improves the productivity of smallholder farmers and the profitability of shops Chapter 12 Bangladesh Dairy Value Chain Learning Reflections from some of the 40 CARE staff from 17 countries who came to Bangladesh to learn from the experience of the dairy value chain project Chapter 15

Protecting the Global Environment Gary C Bryner, 2015-11-17 Gary Bryner's brief readable capstone book Features a forward by Mark A Boyer Outlines the major environmental challenges facing the world today Applies international relations theory to these challenges Covers such key topics as development sustainability and market capitalism Offers a social justice perspective to environmental problems and solutions Borne of an amalgam of social science fieldwork and a passionate commitment to justice this book brings debates about climate change to a new level compelling readers and researchers to rethink the reasons for reversing global environmental trends The book lays out three inspirations for improving environmental prospects effective markets sustainable development and environmental justice for the most vulnerable It also projects three possible scenarios flowing from the success or failure of these inspirations one bleak one breakthrough and one of status quo Gary Bryner is not sanguine about humanity's ability to make the right choices but this does not deter him from asking us to think beyond our own generation and our own species in urging environmental action now

The Politics of Carbon Markets Benjamin Stephan, Richard Lane, 2014-08-27

The carbon markets are in the middle of a fundamental crisis a crisis marked by collapsing prices fleeing actors and ever increasing greenhouse gas levels Yet carbon trading remains at the heart of global attempts to respond to climate change Not only this but markets continue to proliferate particularly in the Global South *The Politics of Carbon Markets* helps to make sense of this paradox and brings two urgently needed insights to the analysis of carbon markets First the markets must be understood in relation to the politics involved in their development maintenance and opposition Second this politics is multiform and pervasive Implementation of new techniques and measuring tools policy development and contestation and the structuring context of institutional settings and macro social forces all involve a variety of political actors and create new forms of political agency The contributions study the total extent of the carbon markets from their prehistory to their contemporary expansion and wider impacts This wide ranging political perspective on the carbon markets is invaluable to those studying and interested in ecological markets climate change governance and environmental politics

Harperism

Donald Gutstein, 2014-08-31 Margaret Thatcher transformed British political life forever So did Ronald Reagan in the United States Now Canada has experienced a similar dramatic shift to a new kind of politics which author Donald Gustein terms Harperism Among its key tenets A weakened labour movement and preferably the disappearance of unions will contribute to Canada's economic prosperity Cutting back government scientific research and data collection will improve public policy making Eliminating First Nations reserves by converting them to private property will improve conditions of life for aboriginal peoples Inequality of incomes and wealth is a good thing and Canada needs more of it These and other essential elements of Harperism flow from neo liberal economic theories propounded by the Austrian economist Friedrich von Hayek and his U S disciples They inspired Thatcherism and Reaganism Stephen Harper has taken this neo liberalism much further in many key areas As Donald Gutstein shows Harper has successfully used a strategy of incremental change coupled with denial of the underlying neo liberal analysis that explains these hard to understand measures The success of Harperism is no accident Donald Gutstein documents the links between the politicians think tanks journalists academics and researchers who nurture

and promote each other's neo liberal ideas They do so using funds provided by ultra rich U S donors by Canadian billionaires like Peter Munk and by many big corporations all of whom stand to gain from the ideas and policies the Harperites develop and push This book casts new light on the last ten years of Canadian politics It documents the challenges that Harperism with or without Stephen Harper will continue to offer to the many Canadians who do not share this pro market world view

Integrating Climate, Energy, and Air Pollution Policies Gary C. Bryner, Robert J. Duffy, 2012 How policies aimed at addressing climate change air pollution and energy use can be effectively integrated

Governance of Integrated Product Policy Dirk Scheer, Frieder Rubik, 2017-09-08 European policy patterns are in a state of transformation New governance models are shifting power away from states and toward the involvement of all stakeholders and the idea of shared responsibility It's a move from command and control to push and pull What's in this new approach for the environment This book provides a detailed analysis of the example of integrated product policy IPP which aims to improve the environmental performance of products and services through their life cycle All products cause environmental degradation in some way whether from their manufacturing use or disposal The life cycle of a product is often long and complicated It covers all the areas from the extraction of natural resources through their design manufacture assembly marketing distribution sale and use to their eventual disposal as waste At the same time it also involves many different actors such as designers manufacturers marketers retailers and consumers IPP attempts to systematically stimulate each phase of this complicated chain to improve its environmental performance With the involvement of so many different products and actors there cannot be one simple policy measure for everything Instead IPP employs a whole variety of tools both voluntary and mandatory which are used to achieve identified objectives These include economic instruments the phase out of dangerous materials voluntary agreements eco labelling and product design guidelines IPP is still in relative infancy and can be seen as an ongoing process hugely dependent on effective governance measures to ensure its continued success This book presents a plethora of perspectives from policy makers researchers and consultancies representatives from business environmental and consumer associations on how to effectively conceptualise institutionalise and implement IPP The book is divided into four parts First the approach to the governance of IPP is examined in relation to other approaches to sustainable production and consumption Second the widely differing approaches to environmental product policy in practice at national supranational and global level are analysed Third the book explores the challenge of designing a coherent policy mix to support the integration of sustainable consumption and production patterns by sector and theme Finally the book concentrates on the key issue of how to involve stakeholders in IPP in order to encourage continuous innovations for sustainability throughout the value chain Governance of Integrated Product Policy aims to fill a clear gap in work to date on sustainable production and consumption by providing researchers and practitioners from politics business and civil society new insights into modern environmental governance in practice

Implementing the Precautionary Principle Nicolas

de Sadeleer, 2012-05-04 From fisheries to persistent organic pollutants to climate change itself no other environmental principle in environmental law has produced as much controversy as the precautionary principle Unlike a preventive approach in which action is taken provided that the threats to the environment are tangible with a precautionary approach authorities are prepared to tackle risks for which there is no definitive proof that the damage will materialize The ramifications of this increasingly apparent approach are profound and cut across all areas of risk assessment and management environmental law policy and regulation in every major sector However to date little thought has been dedicated to the implementation of the precautionary principle in a wide array of environmental circumstances This authoritative handbook addresses the legal aspects of how the precautionary principle is implemented in different sectors and examines its successes failures strengths and weaknesses Sectors and subjects covered include chemicals GMOs marine pollution fisheries and nature conservation and the book draws on cases in the EU in the USA and Nordic countries where the use of precaution has been gathering momentum Ultimately the book provides an indispensable appraisal of the question increasingly important in the era of human induced climate change of whether the precautionary principle is relevant indeed essential to avert major environmental and health risks and how and when it can be used successfully Published with MARIE CURIE ACTIONS

Making Markets Empower the Poor: Programme perspectives on using markets to empower women and men living in poverty Erinch Sahan, Julia Fischer-Mackey, Business Economics Rob Dransfield, 2013-08-20 The Eurozone crisis and the age of austerity as well as challenges to the environment as a result of economic growth have highlighted the need for a greater understanding of those facets of economics that are of most use to businesses and their decision makers This book introduces all of the relevant theoretical aspects of the subject and applies them to real life examples of economics that are of particular interest to students today including the impact of globalization the way in which green perspectives can be built into decision making and how the financial crisis has challenged economists politicians and business people to rethink their existing ideas Replete with illuminating case studies and benefitting from features such as activities review questions and further reading Business Economics introduces the theory and practice of economics for non specialist students new to the topic
