

THE FIVE STEP MANIFESTATION PROCESS

Step 1. Get clear on your desire

What do you actually want? Get specific. What feelings do you believe you will feel once you receive your desire?

Step 3. Embody the version of yourself who already has the desire

Be the person now who already has your desire and already feels the feelings of having the desire. By embodying that version your desire can't help but manifest.

Step 2. Upgrade your mind

Get rid of everything standing in your way and everything that says you can't have your desire. Crush the limiting beliefs and negative thoughts with new empowering beliefs.

Step 4. Take inspired action

You will find yourself receiving intuitive nudges of actions to take. Trust your intuition and follow those sweet nudges. Take the action that feels good in the moment.

Step 5. Surrender to your desire

Believe that the Universe knows exactly what you desire and it will show up in your physical reality in divine timing. Get ready to receive your desire by letting go of any expectations for when, where and how it will show up.

Handbook of Potentiality Kristina Engelhard, Michael Quante, 2018-04-18

This volume congregates articles of leading philosophers about potentials and potentiality in all areas of philosophy and the empirical sciences in which they play a relevant role It is the first encompassing collection of articles on the metaphysics of potentials and potentiality Potentials play an important role not only in our everyday understanding of objects persons and systems but also in the sciences An example is the potential to become an adult human person Moreover the attribution of potentials involves crucial ethical problems Bioethics makes references to the theoretical concept potential without being able to clarify its meaning However despite its relevance it has not been made subject of philosophical investigation Mostly potentials are regarded as a subspecies of dispositions Whilst dispositions are a flourishing field of research potentials as such have not come into focus Potentials like dispositions are modal properties But already a first glance at the metaphysics of potentials shows that concerning their ascription potentials are more problematic than dispositions since potential means that an entity has the potential to acquire a property in the future Therefore potentials involve a time structure of the entities in question that is much more complex than those of dispositions This handbook brings this important concept into focus in its various aspects for the first time It covers the history of the concept as well as contemporary systematic problems and will be of special interest for philosophers in the fields of general metaphysics philosophy of science and ethics especially bioethics It will also be of interest to scientists and persons concerned with bioethical problems
