Minority Admissions:

Minority Admissions Robert Leslie Bailey, Anne L. Hafner, 1978 **Bakke, DeFunis, and Minority Admissions** Allan P. Sindler, 1978 Examines law school and medical school admissions the concept of a racial quota and the Bakke and DeFunis cases to analyze policies concerning preferential admissions of minorities into universities Affirmative Action and Minority Enrollments in Medical and Law Schools Susan Welch, John Gruhl, 1998-05-11 Considers the impact of the Bakke decision regarding minority enrollment in professional schools *Access to the Legal Profession in Colorado by Minorities and Women* United States Commission on Civil Rights. Colorado Advisory Committee, 1976 Race and College Admissions Jamillah Moore, 2024-07-29 In the United States elite colleges and universities have historically catered primarily to wealthy predominantly white Americans creating barriers to entry for students of color Legal statutes have entrenched discriminatory practices within the admissions process perpetuating the underrepresentation of students of color at top tier institutions Given this reality the imperative for institutions to promote diversity through affirmative action remains crucial However recent legal challenges against affirmative action threaten to reinforce the status quo potentially perpetuating the dominance of predominantly white institutions in higher education This book takes an historical look at the pivotal role affirmative action has played in higher education It examines the admissions process through the eyes of a beneficiary of affirmative action and is the first text to share insights on the role eligibility plays in allowing universities to consider race in admitting applicants Detailed are the different types of affirmative action and how some colleges and universities use the policy as a tool to consider race and ethnicity as part of a holistic evaluation of applicants This work makes the case that race conscious admissions practices remain necessary in the fight for racial equity in higher education *A Is for Admission* Michele A. Hernández, 2010-10-28 A former admissions officer at Dartmouth College reveals how the world's most highly selective schools really make their decisions Affirmative Action and Minority Enrollments in Medical and Law Schools Susan Welch, John Gruhl, 2010-05-07 Affirmative action is one of the central issues of American politics today and admission to colleges and universities has been at the center of the debate While this issue has been discussed for years there is very little real data on the impact of affirmative action programs on admissions to institutions of higher learning Susan Welch and John Gruhl in this groundbreaking study look at the impact on admissions of policies developed in the wake of the United States Supreme Court's landmark 1978 Bakke decision In Bakke the Court legitimized the use of race as one of several factors that could be considered in admissions decisions while forbidding the use of quotas Opponents of affirmative action claim that because of the Bakke decision thousands of less qualified minorities have been granted admission in preference to more qualified white students proponents claim that without the affirmative action policies articulated in Bakke minorities would not have made the gains they have made in higher education Based on a survey of admissions officers for law and medical schools and national enrollment data the authors give us the first analysis of the real impact of the Bakke decision and

affirmative action programs on enrollments in medical and law schools Admission to medical schools and law schools is much sought after and is highly competitive In examining admissions patterns to these schools the authors are able to identify the effects of affirmative action programs and the Bakke decision in what may be the most challenging case This book will appeal to scholars of race and gender in political science sociology and education as well as those interested in the study of affirmative action policies Susan Welch is Dean of the College of Liberal Arts and Professor of Political Science Pennsylvania State University John Gruhl is Professor of Political Science University of Nebraska Lincoln

A Conflict of Principles Carl Cohen,2014-11-07 No state shall deny to any person within its jurisdiction the equal protection of the laws So says the Equal Protection Clause of the U S Constitution a document held dear by Carl Cohen a professor of philosophy and longtime champion of civil liberties who has devoted most of his adult life to the University of Michigan So when Cohen discovered after encountering some resistance how his school in its admirable wish to increase minority enrollment was actually practicing a form of racial discrimination calling it affirmative action he found himself at odds with his longtime allies and colleagues in an effort to defend the equal treatment of the races at his university In *A Conflict of Principles* Cohen tells the story of what happened at Michigan how racial preferences were devised and implemented there and what was at stake in the heated and divisive controversy that ensued He gives voice to the judicious and seldom heard liberal argument against affirmative action in college admission policies In the early 1970s as a member of the Board of Directors of the American Civil Liberties Union Cohen vigorously supported programs devised to encourage the recruitment of minorities in colleges and in private employment But some of these efforts gave deliberate preference to blacks and Hispanics seeking university admission and this Cohen recognized as a form of racism however well meaning In his book he recounts the fortunes of contested affirmative action programs as they made their way through the legal system to the Supreme Court beginning with *DeFunis v Odegaard* 1974 at the University of Washington Law School then *Bakke v Regents of the University of California* 1978 at the Medical School on the UC Davis campus and culminating at the University of Michigan in the landmark cases of *Grutter v Bollinger* and *Gratz v Bollinger* 2003 He recounts his role in the initiation of the Michigan cases explaining the many arguments against racial preferences in college admissions He presents a principled case for the resultant amendment to the Michigan constitution of which he was a prominent advocate which prohibited preference by race in public employment and public contracting as well as in public education An eminently readable personal consistently fair minded account of the principles and politics that come into play in the struggles over affirmative action *A Conflict of Principles* is a deeply thoughtful and thought provoking contribution to our national conversation about race

Profession in Colorado by Minorities and Women United States Commission on Civil Rights. Colorado Advisory Committee,1976 *Minorities in Science* Vijaya L. Melnick,2013-04-17 Change is the essence of progress We now stand at the crossroads of our civilization where change is essential in the conduct of our institutions in the plans and models we project for the future and in the very patterns of our thinking if we are to survive as one nation under God with liberty and justice for all Opportunity to participate and fulfill the responsibility of building the nation must be available to all citizens in a true republic For the viability of governmental institutions in a modern democratic nation state rests on the diversity of the genius of her citizens and this enables the nation to accommodate herself better to changes of the times But if the nation becomes impervious to change and resistant to modify its institutions to keep in pace with the times then the nation will indeed be doomed to wither and perish History is replete with examples of civilizations that have gone that course It is therefore our responsibility to insure that our government institutions are kept receptive to change and reflective of the needs and concerns of her citizenry In America today economic and social powers generally go to those who can claim a superior education and professional experience As our society and indeed the world becomes increasingly dependent on science and technology education in those fields becomes imperative to the power equation Affirmative Action and Preferential Admissions in Higher Education Kathryn Swanson,1981 Winner of the 1981-82 Joseph L Andrews Bibliographical Award presented by the American Association of Law Librarians an excellent bibliography which addresses a very important contemporary issue It deserves a place in the collections of large public libraries law libraries and most academic institutions RQ
