Modern Control Theory and the Limits of Criminal Justice Michael R. Gottfredson, Travis Hirschi, 2020. In 1990 when Michael Gottfredson and Travis Hirschi published *A General Theory of Crime* now often referred to as self control theory, it quickly became among the most discussed and researched perspectives in criminology. In *Modern Control Theory and the Limits of Criminal Justice*, Gottfredson and Hirschi develop and extend the theory of self control advanced in their classic work. Focusing on the methodology of testing crime theory and measuring behavioral research on crime and delinquency, they critically review the evidence about self control theory. Gottfredson and Hirschi further discuss evidence about the positive consequences of higher levels of self control from education, economics and public health that, along with evidence from delinquency and crime, show substantial support for the theory of self control. Illustrating the theory through predictions about policing, incarceration, juvenile justice and the connection of immigration policy to crime, this book connects self control theory to the structure and function of the criminal justice system, then applies the theory to pressing issues of public policy about delinquency and crime.

Modern Policing Pierce Vertucci, 2013. Includes bibliographical references and index.

The Policing of Flows Anthony Amicelle, Karine Côté-Boucher, Benoît Dupont, Massimiliano Mulone, Clifford Shearing, Samuel Tanner, 2020-05-21. Rectifying the fact that little criminological attention has been paid to the notion that the security of flows increasingly embodies concerns at the heart of contemporary policing practices, this book makes a significant contribution to knowledge about the policing and security governance of flows. The book focuses on how the growing centrality of flows affects both contemporary risks and the policing organisations in charge of managing them. The contributors analyse flows such as event security, border controls and migration, the movement of animal parts, security-related intelligence and organisational flows. The emerging criminology of these as well as flows of money, information and numerous commodities from pharmaceuticals to minerals or malicious software is leading to critical advances in the understanding of the changing harm landscapes and the practices that have developed to manage them. Taken as a whole, the book opens up the conversation and encourages the invention of new conceptual, theoretical and methodological tools to help criminology tackle and better understand the mobile world in which we live. This book was originally published as a special issue of *Global Crime*.

[The Technology of Policing](#) Peter K. Manning, 2008-03-01. With the rise of surveillance technology in the last decade, police departments now have an

array of sophisticated tools for tracking monitoring even predicting crime patterns In particular crime mapping a technique used by the police to monitor crime by the neighborhoods in their geographic regions has become a regular and relied upon feature of policing Many claim that these technological developments played a role in the crime drop of the 1990s and yet no study of these techniques and their relationship to everyday police work has been made available Noted scholar Peter K Manning spent six years observing three American police departments and two British constabularies in order to determine what effects these kinds of analytic tools have had on modern police management and practices While modern technology allows the police to combat crime in sophisticated detail oriented ways Manning discovers that police strategies and tactics have not been altogether transformed as perhaps would be expected In *The Technology of Policing* Manning untangles the varying kinds of complex crime control rhetoric that underlie much of today's police department discussion and management and provides valuable insight into which are the most effective and which may be harmful in successfully tracking criminal behavior *The Technology of Policing* offers a new understanding of the changing world of police departments and information technology's significant and undeniable influence on crime management
