Copyright Office, 1978 The Living Age, 1898 *The Bibliographical Dictionary of Russian and Soviet Economists* Robert Campbell, 2012-08-21 Despite the restrictions on their work and actions the economists of the Soviet period produced a great deal of bold and important work With the erosion of the old Stalinist controls economists in the Soviet Union themselves became very interested in the history of their profession not least in order to find authentic voices that might offer reinforcement or counterpoint to the policy analyses and

recommendations with which policy makers in the transition countries are today being bombarded This major new reference work pulls together many years of research in order to present a bio bibliographic dictionary of Russian and Soviet economists many of whom have previously had no coherent record compiled of their careers achievements and wider significance Through exploring this rich tradition of economic thought we can go some way in understanding the role of economists in the functioning of the Soviet system as well as bringing previously forgotten work to light raising new questions and providing a memorial to those who suffered as a result of the system This hugely detailed and important new volume takes into account all the nuances of the story of Russian and Soviet economic thought such as regional issues the reform and transition to a market economy and the economic output of non economists Featuring nearly 500 entries and including a detailed contextual introduction this landmark volume will be a vitally important reference work for all those with an interest in the history of economic thought the history of economics and Russian and Soviet history more generally

Flow and Heat and Mass Transfer in Laminar and Turbulent Mist Gas-Droplets Stream over a Flat Plate Victor I. Terekhov, Maksim A. Pakhomov, 2014-07-08 In this book the author presents selected challenges of thermal hydraulics modeling of two phase flows in minichannels with change of phase These encompass the common modeling of flow boiling and flow condensation using the same expression Approaches to model these two respective cases show however that experimental data show different results to those obtained by methods of calculation of heat transfer coefficient for respective cases Partially that can be devoted to the fact that there are non adiabatic effects present in both types of phase change phenomena which modify the pressure drop due to friction responsible for appropriate modelling The modification of interface shear stresses between flow boiling and flow condensation in case of annular flow structure may be considered through incorporation of the so called blowing parameter which differentiates between these two modes of heat transfer On the other hand in case of bubbly flows the generation of bubbles also modifies the friction pressure drop by the influence of heat flux Presented are also the results of a peculiar M

shape distribution of heat transfer coefficient specific to flow boiling in minichannels Finally some attention is devoted to mathematical modeling of dryout phenomena A five equation model enabling determination of the dryout location is presented where the mass balance equations for liquid film droplets and gas are supplemented by momentum equations for liquid film and two phase core

The ^ARussian Cosmists George M. Young, 2012-07-30 In the nineteenth and early twentieth century a controversial school of Russian religious and scientific thinkers emerged united in the conviction that humanity was entering a new stage of evolution and must assume a new active managerial role in the cosmos The ideas of the Cosmists have in recent decades been rediscovered and embraced by many Russian intellectuals In the first account in English of this fascinating tradition George M Young offers a dynamic and wide ranging examination of the lives and ideas of

the Russian Cosmists Red Cosmos James T. Andrews, 2009-07-24 Long before the space race captured the world's attention K E Tsiolkovskii first conceived of multi stage rockets that would later be adapted as the basis of both the U S and Soviet rocket programs Often called the grandfather of Russian rocketry this provincial scientist was even sanctioned by Stalin to give a speech from Red Square on May Day 1935 lauding the Soviet technological future while also dreaming and expounding on his own visions of conquering the cosmos Later the Khrushchev regime used him as a poster boy for Soviet excellence during its Cold War competition with the United States Ironically some revisionists have since pointed to such blatant promotion by the Communist Party in an attempt to downplay Tsiolkovskii's scientific contributions James T Andrews explores the complexities of this man to show that Tsiolkovskii was much more than either a rocket inventor or a propaganda tool He was a science popularizer novelist technical inventor and visionary whose science fiction writings included futuristic drawings of space stations long before they appeared on any engineer's drawing board Mining a myriad of Russian archives Andrews produces not only a biographical account but also a study of Soviet technological propaganda local science education public culture in the 1920s and 1930s and the cultural ramifications of space flight
