International Labour Review , Current Practices in Workplace and Organizational Learning Bente

Elkjaer, Maja Marie Lotz, Niels Christian Mossfeldt Nickelsen, 2022-01-01 The central assumption that guides this book is that research and practice about learning at the workplace has recently lost its critical edge This book explores what has happened to workplace learning and organizational learning and studies what has replaced it In addition the book discusses to what extent there are reasons to revitalize it Today themes such as innovation co creation and knowledge sharing seem to have become preferred and referred to as theoretical fields as well as fields of practice In several chapters of this book it is argued that the critical power of learning could be regained by starting a new discussion of how these new fields of practice can be substantiated by topics such as learning arrangements learning mechanisms and learning strategies Hence the aim of this book is to both advance and recapture our knowledge of learning in today s increasingly complex world of work and organizing The contributions in this work do so by revisiting classic research on workplace and organizational learning and discussing how insights from this body of literature evokes new meaning It sets the stage for new agendas and rethinks current practices that are entangled in activities such as innovation co creation knowledge sharing or other currently widespread fields of practice

pursuit of private profit maximization and with little regard for social concerns Its influence over so much of societal life and effects on the natural environment raise critical questions about the firm and its governance in democratic society Various voices seek reforms of regulation and corporate governance practices to those shaped by the neoliberal policies persisting in the current decades But prospects for amelioration within our current horizons of thinking appear elusive This book contributes a distinctly social theoretical approach to the social problem of governing the firm Its discussions complement debates in economics politics and law Its critical social theorizations challenge conventional understandings of the firm and neoliberal legitimacies of its governance and posit alternatives The book explores the social relations and moral fabric of the firm and the creativity of human action at work It proposes a reimagined corporate governance premised on just recognition of that social vitality It invites unprecedented collaboration for a robust participatory democracy for governing the firm and market action oriented to ecological and social sustainability
