New Ecological Order

Morris Brian Morris

New Ecological Order:

The New Ecological Order Luc Ferry, 1995-08-15 Is ecology in the process of becoming the object of our contemporary passions in the same way that Fascism was in the 30s or Communism under Stalin In The New Ecological Order Luc Ferry offers a penetrating critique of the ideological root of the Deep Ecology movement spreading throughout the United States Germany and France Traditional ecological movements or democratic ecology seek to protect the environment of human societies they are pragmatic and reformist But another movement has become the refuge both of nostalgic counterrevolutionaries and of leftist illusions This is deep ecology Its followers go beyond practical critique of human greed and waste they call into question the very possibility of human coexistence with nature Ferry launches his critique by examining early European legal cases concerning the status and rights of animals including a few notorious cases where animals were brought to trial found guilty and publicly hanged He then demonstrates that German Romanticism embraced certain key ideas of the deep ecology movement concerning the protection of animals and the environment Later adopted by the Nazis many of these ideas point to a profoundly antihumanistic component of deep ecology that is compatible with totalitarianism Ferry shows how deep ecology casts aside all the gains of human autonomy since the Enlightenment Far from denying our duty in relation to nature The New Ecological Order offers a bracing caution against the dangers of environmental claims and more important against the threat to democracy contained in the deep ecology doctrine when pushed to its extreme

A New Ecological Order Ștefan Dorondel, Stelu Șerban, 2022-05-03 The rise of industrial capitalism in the nineteenth century forged a new ecological order in North American and Western European states radically transforming the environment through science and technology in the name of human progress Far less known are the dramatic environmental changes experienced by Eastern Europe in many ways a terra incognita for environmental historians and anthropologists A New Ecological Order explores from a historical and ethnographic perspective the role of state planners bureaucrats and experts engineers agricultural engineers geographers biologists foresters and architects as agents of change in the natural world of Eastern Europe from 1870 to the early twenty first century Contributors consider territories engulfed by empires from the Habsburg to the Ottoman to tsarist Russia territories belonging to disintegrating empires and countries in the Balkan Peninsula Central and Eastern Europe and Eurasia Together they follow a rhetoric of correcting nature a desire to exploit the natural environment and put its resources to work for the sake of developing the economies and infrastructures of modern states They reveal an eagerness among newly established nation states after centuries of imperial economic and political impositions to import scientific knowledge and new technologies from Western Europe that would aid in their economic development and how those imports and ideas about nature ultimately shaped local projects and policies

The Civilized Organization Ad van Iterson, 2002-01-01 Topics covered in this title include organizing discourse negotiating boundaries crossing cultures and theorizing practice

Ecopolitics Verena Andermatt Conley, 2006-07-13

Ecopolitics is a study of environmental awareness or non awareness in contemporary French theory Arguing that it is now impossible not to think in an ecological way Verena Andermatt Conley traces the roots of today s concern for the environment back to the intellectual climate of the late 50s and 60s The author considers key texts by influential figures such as Michael Serres Paul Virilio Gilles Deleuze and Felix Guattari Michel de Certeau H l ne Cixous and Luce Irigaray Ecopolitics rehabilitates some ecological components of French intellectual thought of the past thirty years and reassesses French poststructural thinkers who explicitly deal with ecology in their work *Pioneers Of Ecological Humanism* Morris Brian Morris,2020-07-16 e Brian Morris blazed a lot of trails He is a scholar of genuine daring and great humanity and his work deserves to be read and debated for a very long time to come e David Graeber author of Debt The First 5 000 Years In our world of ecological catastrophe and social crisis some roundly condemn modern civilisation as the source of our Promethean predicament What can follow is a rejection of humanism science and the City and a turn to either nostalgic primitivism or esoteric spirituality But do we really need to flee the city for the woods in order to build a free society In this triple intellectual biography Brian Morris lucidly discusses three intellectual giants who made an enormous though often overlooked contribution to modern ecology Lewis Mumford Rene Dubos and Murray Bookchin Morris argues that they have forged a third way beyond both industrialism and anti modernism ecological humanism also known as social ecology a tradition that embraces both ecological realities and the ethical and cultural wealth of humanism In examining their thought Professor Morris paves the way for fresh debate on ecology charting an optimistic vision for the profound reharmonisation of nature and culture as well as the ecological egalitarian and democratic transformation of our cities and society Essential reading for anyone with an interest or active role in ecology or philosophy and their associated disciplines *Pioneers of Ecological Humanism* is written in a clear and refreshingly direct style that will appeal to academics activists and armchair ecologists alike Leaving school at the age of fifteen Brian Morris had a varied career foundry worker seaman and tea planter in Malawi before becoming a university teacher Now Emeritus Professor of Anthropology at Goldsmiths College University of London he is the author of numerous articles and books on ethnobotany religion and symbolism hunter gatherer societies and concepts of the individual His books include *Richard Jefferies and the Ecological Vision* 2006 *Religion and Anthropology A Critical Introduction* 2006 *Insects and Human Life* 2004 and *Kropotkin The Politics of Community* 2004 Black Rose Books is also the publisher of his *Bakunin The Philosophy of Freedom* 1993 and the forthcoming *Anarchist Miscellany* *Pioneers of Ecological Humanism* is essential reading for anyone concerned with these issues Conversant with the history of ideas Morris places Bookchin especially in a context that has eluded other authors who have treated his work His writing style is lucid and accessible Highly recommended Janet Biehl author partner of Murray Bookchin 275 pages Bibliography and Index Paperback ISBN 978 1 55164 607 7 Hardcover ISBN 978 1 55164 609 1 eBook ISBN 978 1 55164 611 4 Table of Contents Preface Ecological Humanism An Introduction Part 1 Lewis Mumford and Organic Humanism 1 The Radical Scholar 2 Lewis

 Attempts to theorize contemporary globalization rarely stray beyond variations on old themes of superordination versus
 subordination Yet there are many new definers of our present global reality depletion of strategic resources degradation of
 our environment counter offensives against modern patterns of thought and action which suggest that a new framework of
 global relations is needed Nelson Keith challenges the presumptions upon which Western notions of the world have rested
 and sounds a call to forge a world order more sensitive to all of its representative voices Ecological Ethics Patrick
 Curry,2011-08-29 In this thoroughly revised and updated second edition of the highly successful Ecological Ethics Patrick
 Curry shows that a new and truly ecological ethic is both possible and urgently needed With this distinctive proposition in
 mind Curry introduces and discusses all the major concepts needed to understand the full range of ecological ethics He
 discusses light green or anthropocentric ethics with the examples of stewardship lifeboat ethics and social ecology the mid
 green or intermediate ethics of animal liberation rights and dark or deep green ecocentric ethics Particular attention is given
 to the Land Ethic the Gaia Hypothesis and Deep Ecology and its offshoots Deep Green Theory Left Biocentrism and the Earth
 Manifesto Ecofeminism is also considered and attention is paid to the close relationship between ecocentrism and virtue
 ethics Other chapters discuss green ethics as post secular moral pluralism and pragmatism green citizenship and human
 population in the light of ecological ethics In this new edition all these have been updated and joined by discussions of
 climate change sustainable economies education and food from an ecocentric perspective This comprehensive and wide
 ranging textbook offers a radical but critical introduction to the subject which puts ecocentrism and the critique of
 anthropocentrism back at the top of the ethical intellectual and political agenda It will be of great interest to students and
 activists and to a wider public **French 'Ecocritique'** Stephanie Posthumus,2017-01-01 *The Philosophical Roots of the
 Ecological Crisis* Joshtrom Isaac Kureethadam,2018-06-11 The Philosophical Roots of the Ecological Crisis Descartes and the
 Modern Worldview traces the conceptual sources of the present environmental degradation within the worldview of
 Modernity and particularly within the thought of Ren Descartes universally acclaimed as the father of modern philosophy The

book demonstrates how the triple foundations of the Modern worldview in terms of an exaggerated anthropocentrism a mechanistic conception of the natural world and the metaphysical dualism between humanity and the rest of the physical world can all be largely traced back to Cartesian thought with direct ecological consequences Ecocritical Approaches to Literature in French Douglas L. Boudreau, Marnie M. Sullivan, 2015-12-24 Ecocriticism is a critical approach that focuses on the representation in literature of the non human elements of the natural world a method of inquiry that has been largely limited to literature written in English The aim of Ecocritical Approaches to Literature in French is twofold to introduce ecocriticism to scholars of French language literature and to open ecocriticism to the vision and voices of French literature The chapters look at work not only from France but also from North America the Caribbean and Africa The discussions include fiction poetry film and pedagogy The goal of the collection is to demonstrate not only the applicability of ecocritical inquiry to literature in French but to demonstrate the possibilities of ecocritical theory on the study of French literature and also for ecocriticism itself This collection will be a useful resource both for scholars of French language literature and also for ecocritics who may have had only limited contact with literatures in languages other than English
