Krausz,2023-04-14 These essays address Jewish identity Jewish survival and Jewish continuity The authors account for and analyze trends in Jewish identification and the reciprocal effects of the relationship between the Diaspora and Israel at the end of the twentieth century Jewish identification in contemporary society is a complex phenomenon Since the emancipation of Jews in Europe and the major historic events of the Holocaust and the establishment of the State of Israel there have been substantial changes in the collective Jewish identity As a result Jewish identity and the Jewish process of identification had to confront the new realities of an open society its economic globalization and the impacts of cultural pluralism The trends in Jewish identification are toward fewer and weaker points of attachment fewer Jews who hold religious beliefs with such beliefs held less strongly less religious ritual observance attachment to Zionism and Israel becoming diluted and ethnic communal bonds weakening Jews are also more involved in the wider society in the Diaspora due to fewer barriers and less overt anti-Semitism This opens up possibilities for cultural integration and assimilation In Israel too there are signs of greater interest in the modern world culture The major questions addressed by this volume is whether Jewish civilization will continue to provide the basic social framework and values that will lead Jews into the twenty first century and ensure their survival as a specific social entity The book contains special contributions by Professor Julius Gould and Professor Irving Louis Horowitz and chapters on Sociological Analysis of Jewish Identity Jewish Community Boundaries and Factual Accounts from the Diaspora and Israel

Perspectives on Artistic Research in Music Robert Burke,Andrys Onsman,2017-01-23 The increasing interest in artistic research especially in music is throwing open doors to exciting ideas about how we generate new musical knowledge and understanding This book examines the wide array of factors at play in innovative practice and how by treating it as research we can make new ideas more widely accessible Three key ideas propel the book First it argues that artistic research comes from inside the practice and exists in a space that accommodates both objective and subjective observation and analyses because the researcher is the practitioner It is a space for dialogue between apparently opposing binaries the composer and the performer the past and the present the fixed and the fluid the intellectual and the intuitive the abstract and the embodied the prepared and the spontaneous the enduring and the transitory and so on It is not so much constructed in a logical sequential

manner in the way of the scientific method of doing research but more as a braided space woven from many disparate elements Second the book articulates the notion that artistic research in music has its own verification procedures that need to be brought into the academy especially in terms of the moderation of non traditional research outputs including the description of the criteria for allocation of research points for the purposes of data collection as well as real world relevance and industry engagement Third by way of numerous examples of original and creative music making it demonstrates in practical terms how exploration and experimentation functions as legitimate academic research Many of the case studies deliberately cross boundaries that were previously assumed to be rigid and definite in order to blaze new musical trails creating new collaborations and synergies
