Eugenics and Physical Culture

Performance in the Progressive Era Shannon L. Walsh, 2020-11-16 This book strives to unmask the racial inequity at the root of the emergence of modern physical culture systems in the US Progressive Era 1890s 1920s This book focuses on physical culture systematic non competitive exercise performed under the direction of an expert because tracing how people practiced physical culture in the Progressive Era especially middle and upper class white women reveals how modes of popular performance institutional regulation and ideologies of individualism and motherhood combined to sublimate whiteness beneath the veneer of liberal progressivism and reform The sites in this book give the fullest picture of the different strata of physical culture for white women during that time and demonstrate the unracialization of whiteness through physical culture practices By illuminating the ways in which whiteness in the US became a default identity category absorbed into the universal ideals of culture arts and sciences the author shows how physical culture circulated as a popular performance form with its own conventions audience and promised profitability Finally the chapters reveal troubling connections between the daily habits physical culturists promoted and the eugenics movement s drive towards more reproductively efficient white bodies By examining these written visual and embodied texts the author insists on a closer scrutiny of the implicit whiteness of physical culture and forwards it as a crucial site of analysis for performance scholars interested in how corporeality is marshaled by and able to contest local and global systems of power

Benjamin Franklin Johnson,1900 *Body and Nation* Emily S. Rosenberg,Shanon Fitzpatrick,2014-07-31 Body and Nation interrogates the connections among the body the nation and the world in twentieth century U S history The idea that bodies and bodily characteristics are heavily freighted with values that are often linked to political and social spheres remains underdeveloped in the histories of America s relations with the rest of the world Attentive to diverse state and nonstate actors the contributors provide historically grounded insights into the transnational dimensions of biopolitics Their subjects range from the regulation of prostitution in the Philippines by the U S Army to Cold War ideals of American feminine beauty and from body counts as metrics of military success to cultural representations of Mexican migrants in the United States as public health threats By considering bodies as complex fluctuating and interrelated sites of meaning the contributors to this collection offer new insights into the workings of both soft and hard power Contributors Frank Costigliola Janet M Davis Shanon Fitzpatrick Paul A Kramer Shirley Jennifer Lim Mary Ting Yi Lui Natalia Molina Brenda Gayle Plummer Emily S Rosenberg Kristina Shull Annessa C Stagner Marilyn B Young Electrical Experimenter ,1923 **The Making of Sporting Cultures** John Hughson,2013-09-13 The Making of Sporting Cultures presents an analysis of western sport by examining how the collective passions and feelings of people have contributed to the making of sport as a way of life The popularity of sport is so pronounced in some cases that we speak of certain sports as national pastimes Baseball in the United States soccer in Britain and cricket in the Caribbean are among the relevant examples discussed Rather than regarding the historical development of sport as the outcome of passive spectator reception this work is interested in how sporting cultures have been made and developed over time through the active engagement of its enthusiasts This is to study the history of sport not only from below but also from within as a means to understanding the deep relationship between sport and people within class contexts the middle class as well as the working class Contestation over the making of sport along axes of race gender and class are discussed where relevant A range of cultural writers and theorists are examined in regard to both how their writing can help us understand the making of sport and as to how sport might be located within an overall cultural context in different places and times The book will appeal to students and academics within humanities disciplines such as cultural studies history and sociology and to those in sport studies programmes interested in the historical cultural and social aspects of sport This book was published as a special issue of Sport in Society **Annual Catalogue** University of Chicago,1919 *Rhetoric, History, and Women's Oratorical Education* David Gold,Catherine L. Hobbs,2013-05-02 Historians of rhetoric have long worked to recover women s education in reading and writing but have only recently begun to explore women s speaking practices from the parlor to the platform to the varied types of institutions where women learned elocutionary and oratorical skills in preparation for professional and public life This book fills an important gap in the history of rhetoric and suggests new paths for the way histories may be told in the future tracing the shifting arc of women s oratorical training as it develops from forms of eighteenth century rhetoric into institutional and extrainstitutional settings at

the end of the nineteenth century and diverges into several distinct streams of community embodied theory and practice in the twentieth Treating key rhetors genres settings and movements from the early republic to the present these essays collectively challenge and complicate many previous claims made about the stability and development of gendered public and private spheres the decline of oratorical culture and the limits of women s oratorical forms such as elocution and parlor rhetorics and women s responses to rhetorical constraints on their public speaking Enriching our understanding of women s oratorical education and practice this cutting edge work makes an important contribution to scholarship in rhetoric and communication Annual Report United States. heads of common Russian and regional sport federations sport clubs managers athletes coaches sports physicians as well as all those who are interested in the legal regulation of physical culture and sports in Russia Plan of Scientific Research in the Field of Medicine in the USSR for the Years 1961-1962 Akademii meditsinskikh nauk SSSR, 1964 **Cultivating the Masses** David L. Hoffmann, 2011-10-18 Under Stalin's leadership the Soviet government carried out a massive number of deportations incarcerations and executions Paradoxically at the very moment that Soviet authorities were killing thousands of individuals they were also engaged in an enormous pronatalist campaign to boost the population Even as the number of repressions grew exponentially Communist Party leaders enacted sweeping social welfare and public health measures to safeguard people's well being Extensive state surveillance of the population went hand in hand with literacy campaigns political education and efforts to instill in people an appreciation of high culture In *Cultivating the Masses* David L. Hoffmann examines the Party leadership's pursuit of these seemingly contradictory policies in order to grasp fully the character of the Stalinist regime a regime intent on transforming the socioeconomic order and the very nature of its citizens To analyze Soviet social policies Hoffmann places them in an international comparative context He explains Soviet technologies of social intervention as one particular constellation of modern state practices These practices developed in conjunction with the ambitions of nineteenth century European reformers to refashion society and they subsequently prompted welfare programs public health initiatives and reproductive regulations in countries around the world The mobilizational demands of World War I impelled political leaders to expand even further their efforts at population management via economic controls surveillance propaganda and state violence Born at this moment of total war the Soviet system institutionalized these wartime methods as permanent features of governance Party leaders whose dictatorship included no checks on state power in turn attached interventionist practices to their ideological goal of building socialism
