Purposes, Committee on National
Statistics, Division of Behavioral and
Social Sciences and
Education, National Research Council**

Privacy And Access To Government Data For Research:

Privacy and Access to Government Data for Research David H. Flaherty, Edward H. Hanis, S. Paula Mitchell, 1979

Private Lives and Public Policies National Research Council, Division of Behavioral and Social Sciences and

Education, Commission on Behavioral and Social Sciences and Education, Panel on Confidentiality and Data

Access, 1993-01-01 Americans are increasingly concerned about the privacy of personal data yet we demand more and more information for public decision making This volume explores the seeming conflicts between privacy and data access an issue of concern to federal statistical agencies collecting the data research organizations using the data and individuals providing the data A panel of experts offers principles and specific recommendations for managing data and improving the balance between needed government use of data and the privacy of respondents The volume examines factors such as the growth of computer technology that are making confidentiality an increasingly critical problem The volume explores how data collectors communicate with data providers with a focus on informed consent to use data and describes the legal and ethical obligations data users have toward individual subjects as well as toward the agencies providing the data In the context of historical practices in the United States Canada and Sweden statistical techniques for protecting individuals identities are evaluated in detail Legislative and regulatory restraints on access to data are examined including a discussion about their effects on research This volume will be an important and thought provoking guide for policymakers and agencies working with statistics as well as researchers and concerned individuals

The Promise of Evidence-based Policymaking United

States. Commission on Evidence-Based Policymaking, 2017

Expanding Access to Research Data National Research

Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Data Access for Research Purposes, 2005-11-11 Policy makers need information about the nation ranging from trends in the overall economy down to the use by individuals of Medicare in order to evaluate existing programs and to develop new ones This information often comes from research based on data about individual people households and businesses and other organizations collected by statistical agencies The benefit of increasing data accessibility to researchers and analysts is better informed public policy To realize this benefit a variety of modes for data access including restricted access to confidential data and unrestricted access to appropriately altered public use data must be used The risk of expanded access to potentially sensitive data is the increased probability of breaching the confidentiality of the data and in turn eroding public confidence in the data collection enterprise Indeed the statistical system of the United States ultimately depends on the willingness of the public to provide the information on which research data are based Expanding Access to Research Data issues guidance on how to more fully exploit these tradeoffs The panel's recommendations focus on needs highlighted by legal social and technological changes that have occurred during the last decade

The

Promise of Evidence-based Policymaking United States. Commission on Evidence-Based Policymaking, 2017

OECD

Health Policy Studies Health Data Governance Privacy, Monitoring and Research OECD,2015-10-05 This report identifies eight key data governance mechanisms to maximise benefits to patients and to societies from the collection linkage and analysis of health data and to minimise risks to both patient privacy and the security of health data *Sharing Research Data* National Research Council,Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Committee on National Statistics,1985-01-01 *Expanding Access to Research Data* Panel on Data Access for Research Purposes,Committee on National Statistics,Division of Behavioral and Social Sciences and Education,National Research Council,2005-11-11 Policy makers need information about the nation ranging from trends in the overall economy down to the use by individuals of Medicare in order to evaluate existing programs and to develop new ones This information often comes from research based on data about individual people households and businesses and other organizations collected by statistical agencies The benefit of increasing data accessibility to researchers and analysts is better informed public policy To realize this benefit a variety of modes for data access including restricted access to confidential data and unrestricted access to appropriately altered public use data must be used The risk of expanded access to potentially sensitive data is the increased probability of breaching the confidentiality of the data and in turn eroding public confidence in the data collection enterprise Indeed the statistical system of the United States ultimately depends on the willingness of the public to provide the information on which research data are based *Expanding Access to Research Data* issues guidance on how to more fully exploit these tradeoffs The panel s recommendations focus on needs highlighted by legal social and technological changes that have occurred during the last decade **Federal Statistics, Multiple Data Sources, and Privacy Protection** National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Panel on Improving Federal Statistics for Policy and Social Science Research Using Multiple Data Sources and State-of-the-Art Estimation Methods,2017-12-27 The environment for obtaining information and providing statistical data for policy makers and the public has changed significantly in the past decade raising questions about the fundamental survey paradigm that underlies federal statistics New data sources provide opportunities to develop a new paradigm that can improve timeliness geographic or subpopulation detail and statistical efficiency It also has the potential to reduce the costs of producing federal statistics The panel s first report described federal statistical agencies current paradigm which relies heavily on sample surveys for producing national statistics and challenges agencies are facing the legal frameworks and mechanisms for protecting the privacy and confidentiality of statistical data and for providing researchers access to data and challenges to those frameworks and mechanisms and statistical agencies access to alternative sources of data The panel recommended a new approach for federal statistical programs that would combine diverse data sources from government and private sector sources and the creation of a new entity that would provide the foundational elements needed for this new approach including legal authority to access data and protect privacy

This second of the panel's two reports builds on the analysis conclusions and recommendations in the first one. This report assesses alternative methods for implementing a new approach that would combine diverse data sources from government and private sector sources including describing statistical models for combining data from multiple sources examining statistical and computer science approaches that foster privacy protections evaluating frameworks for assessing the quality and utility of alternative data sources and various models for implementing the recommended new entity. Together the two reports offer ideas and recommendations to help federal statistical agencies examine and evaluate data from alternative sources and then combine them as appropriate to provide the country with more timely actionable and useful information for policy makers businesses and individuals.
