Trade, and Consumer Protection, 2001 *E-Business Innovation and Process Management* Lee, In, 2006-12-31 E business research is currently one of the most active research areas. With the rapid advancement in information technologies, e business is growing in significance and is having a direct impact upon ways of doing business. As e business becomes one of the most important areas in organizations, researchers and practitioners need to understand the implications of many technological and organizational changes taking place. *Advances in E Business Research: E Business Innovation and Process Management* provides researchers and practitioners with valuable information on recent advances and developments in emerging e business models and technologies. This book covers a variety of topics such as e business models, e business strategies, online consumer behavior, e business process modeling and practices, electronic communication adoption and service provider strategies, privacy policies and implementation issues. **Public Interest Profiles, 2001-2002** Foundation for Public Affairs, 2001 **Protecting Individual Privacy in the Struggle Against Terrorists** National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Division on Behavioral and Social Sciences and Education, Committee on National Statistics, Committee on Law and Justice, Committee on Technical and Privacy Dimensions of Information for Terrorism Prevention and Other National Goals, 2008-09-26 All U S agencies with counterterrorism programs that collect or mine personal data such as phone records or Web sites visited should be required to evaluate the programs' effectiveness, lawfulness and impacts on privacy. A framework is offered that agencies can use to evaluate such information based programs both classified and unclassified. The book urges Congress to re-examine existing privacy law to assess how privacy can be protected in current and future programs and recommends that any individuals harmed by violations of privacy be given a meaningful form of redress. Two specific technologies are examined: data mining and behavioral surveillance. Regarding data mining, the book concludes that although these methods have been useful in the private sector for spotting consumer fraud, they are less helpful for counterterrorism because so little is known about what patterns indicate terrorist activity. Regarding behavioral surveillance in a counterterrorist context, the book concludes that although research and development on certain aspects of this topic are warranted, there is no scientific consensus on whether these techniques are ready for operational use at all in counterterrorism.
