Control of Dynamic Bipedal Robot Locomotion Eric R. Westervelt, Jessy W. Grizzle, Christine Chevallereau, Jun Ho Choi, Benjamin Morris, 2018-10-03 Bipedal locomotion is among the most difficult challenges in control engineering Most books treat the subject from a quasi static perspective overlooking the hybrid nature of bipedal mechanics *Feedback Control of Dynamic Bipedal Robot Locomotion* is the first book to present a comprehensive and mathematically sound treatment of feedback design for achieving stable agile and efficient locomotion in bipedal robots In this unique and groundbreaking treatise expert authors lead you systematically through every step of the process including Mathematical modeling of walking and running gaits in planar robots Analysis of periodic orbits in hybrid systems Design and analysis of feedback systems for achieving stable periodic motions Algorithms for synthesizing feedback controllers Detailed simulation examples Experimental implementations on two bipedal test beds The elegance of the authors approach is evident in the marriage of control theory and mechanics uniting control based presentation and mathematical custom with a mechanics based approach to the problem and computational rendering Concrete examples and numerous illustrations complement and clarify the mathematical discussion A supporting Web site offers links to videos of several experiments along with MATLAB code for several of the models This one of a kind book builds a solid understanding of the theoretical and practical aspects of truly dynamic locomotion in planar bipedal robots **Robot-Proof** Joseph Aoun, 2017-08-25 How to educate the next generation of college students to invent to create and to discover filling needs that even the most sophisticated robot cannot Driverless cars are hitting the road powered by artificial intelligence Robots can climb stairs open doors win Jeopardy analyze stocks work in factories find parking spaces advise oncologists In the past automation was considered a threat to low skilled labor Now many high skilled functions including interpreting medical images doing legal research and analyzing data are within the skill sets of machines How can higher education prepare students for their professional lives when professions themselves are disappearing In Robot Proof Northeastern University president Joseph Aoun proposes a way to educate the next generation of college students to invent to create and to discover to fill needs in society that even the most sophisticated artificial intelligence agent cannot A robot proof education Aoun argues is not concerned solely with topping up students minds with high octane facts Rather it calibrates them with a creative mindset and the mental elasticity to invent discover or create something valuable to society a scientific proof a hip hop recording a web comic a cure for cancer Aoun lays out the

framework for a new discipline humanics which builds on our innate strengths and prepares students to compete in a labor market in which smart machines work alongside human professionals The new literacies of Aoun s humanics are data literacy technological literacy and human literacy Students will need data literacy to manage the flow of big data and technological literacy to know how their machines work but human literacy the humanities communication and design to function as a human being Life long learning opportunities will support their ability to adapt to change The only certainty about the future is change Higher education based on the new literacies of humanics can equip students for living and working through change

Robot-Assisted Radical Prostatectomy John W. Davis,2016-09-07 This book addresses knowledge gaps in RARP in 3 key sections 1 Step by step approach including multiple technique options and innovations 2 Patient selection safety outcomes and 3 Preparing the patient for surgery The order is more based upon knowledge priority rather than a chronologic sequence in which part 3 would go first Part two allows more summary and commentary on evidence and part three allows some creative content that is otherwise hard to find in one place medical evaluations imaging clinical trials patient education etc This textbook emphasizes content for the advanced skills surgeon in that multiple techniques are presented as well as state of the art evidence The learning curve is addressed and the authors clarify how this text is useful for learners The caveat is that they should be careful in patient selection and stick with what their mentors are showing them With experience they can then branch out into the many techniques presented here Robot Assisted Radical Prostatectomy Beyond the Learning Curve will also have cross over appeal for surgical assistants physician assistants nurses and anyone else involved in the surgical care of prostate cancer
