**The Royal Navy in the Cold War Years, 1966-1990** Edward Hampshire, 2024-07-30 During the period covered by this new book the Royal Navy faced some of its greatest challenges both at sea confronting the increasingly capable and impressive Soviet Navy and on shore when it faced policy crises that threatened the survival of much of the fleet During this remarkable period the Navy had rarely been so focussed on a single theater of war the Eastern Atlantic but also rarely so politically vulnerable The author sets out to analyze shadowing operations and confrontations at sea with Soviet ships and submarines the Navy's role in the enormous NATO and Warsaw Pact naval exercises that acted out potential war scenarios individual operations from the Falklands and the 1990 91 Gulf War to the Beira and Armilla patrols the development of advanced naval technologies to counter Soviet capabilities policy making controversies as the three services fought for resources including the controversial 1981 Nott defense review and what life was like in the Cold War navy for ratings and officers The book the first to cover this subject in depth for more than thirty years will make use of the full range of archival sources that have been publicly available over the last two decades but of which little use has been made by historians This work is destined to become a definitive naval history of the period and also provide a fascinating and gripping narrative of a navy under threat from many directions but which survived and eventually prospered winning a remarkable victory in the far South Atlantic more than 7 000 miles from its expected battleground in the North Atlantic Elegantly written for a wide audience it will be a very significant volume for professional and enthusiast alike

The British Seaborne Empire Jeremy Black, Professor Jeremy Black, 2004-01-01 Britain's seaborne tradition is used to throw light on the British themselves the people with whom they came into contact and the British perception of empire The oceans and their shores rather than the mysterious interiors of continents certainly dominated the English perception of the transoceanic world in the sixteenth seventeenth and eighteenth centuries climaxing in the fascination with the Pacific in the age of Captain Cook and continuing into the nineteenth century with Franklin in the Arctic and Ross in the Antarctic The oceans offered much more than fascination In England from the late sixteenth century maritime conflict and imperial strength were seen as important to national morale and reputation and without it there would have been no empire or at least not in the form it actually took

**Arms, Economics and British Strategy** G. C. Peden, 2007-02-08 This book integrates strategy technology and economics and presents a new way of looking at twentieth century military history and Britain's decline as a great power G C Peden explores how from the Edwardian era to the 1960s warfare was transformed by a series of innovations including dreadnoughts submarines aircraft tanks radar nuclear weapons and guided missiles He shows that the cost of these new weapons tended to rise more quickly than national income and argues that strategy had to be adapted to take account of both the increased potency of new weapons and the economy's diminishing ability to sustain armed forces of a given size Prior to the development of nuclear weapons British strategy was based on an ability to wear down an enemy through blockade attrition in the First World War and strategic bombing in the Second and therefore power rested as much on economic strength as on armaments

**British Amphibious Assault Ships** Edward Hampshire, 2019-12-26 Amphibious assault ships have been at the centre of nearly all of Britain's expeditionary campaigns since World War II from the Suez crisis of 1956 to operations as far afield as Borneo 1963-66 the Falklands 1982 Sierra Leone 2000 and Iraq 2003 In major operations such as Suez and the Falklands the use of amphibious assault ships was essential to the military success of the campaigns The Suez Crisis saw two of the Royal Navy's former light fleet carriers converted into commando carriers to specialise in amphibious warfare In the 1960s these were followed by the famous Fearless class ships the first purpose built amphibious assault ships in the Royal Navy With an internal dock headquarters capability and multiple landing craft these Landing Platform Docks were built to project power around the world When the Falklands were invaded HMS Fearless was the key to the successful landing in San Carlos In the 1990s a new generation was ordered the helicopter carrier HMS Ocean and the Albion class LPDs In recent years Ocean Albion and Bulwark have been the largest fighting ships of the Royal Navy and have acted as the navy's flagships as well as being

The British Carrier Strike Fleet after 1945 David Hobbs, 2015-10-30 A comprehensive study of the bittersweet post WWII history of British naval aviation will become a standard reference for its subject Firetrench In 1945 the most powerful fleet in the Royal Navy's history was centered on nine aircraft carriers This book charts the post war fortunes of this potent strike force its decline in the face of diminishing resources its final fall at the hands of uncomprehending politicians and its recent resurrection in the form of the Queen Elizabeth class carriers the largest ships ever built for the Royal Navy After 1945 experts prophesied that nuclear weapons would make conventional forces obsolete but British carrier borne aircraft were almost continuously employed in numerous conflicts as far apart as Korea Egypt the Persian Gulf the South Atlantic East Africa and the Far East often giving successive British Governments options when no others were available In the process the Royal Navy invented many of the techniques and devices crucial to modern carrier operations angled decks steam catapults and deck landing aids while also pioneering novel forms of warfare like helicopter borne assault and tactics for countering such modern plagues as insurgency and terrorism This book combines narratives of these poorly understood operations with a clear analysis of the strategic and political background benefiting from the author's personal experience of both carrier flying and the workings of Whitehall It is an important but largely untold story of renewed significance as Britain once again embraces carrier aviation Makes a timely and welcome appearance will make compelling reading for those with serious concern for our naval affairs St Andrews in Focus *Army, Empire, and Cold War* David French, 2012-01-26 The veterans of the Fourteenth Army who fought in Burma between 1942 and 1945 called themselves the forgotten army But that appellation could equally well be applied to the whole of the British army after 1945 Histories of Britain's post war defence policy have usually focused on how and why Britain acquired a nuclear deterrent David French takes a new look at these policies by placing the army centre stage Drawing on archival sources that have hardly been used by historians he shows how British

governments tried to create an army that would enable them to maintain their position as a major world power at a time when their economy struggled to foot the bill. The result was a growing mismatch between the military resources that the government thought it could afford on the one hand and a long list of overseas commitments in Europe, Africa, the Middle East and the Far East that it was reluctant to surrender. The result was that the British created a Potemkin army, a force that had an outwardly impressive facade but that in reality had only very limited war-fighting capabilities. Army, Empire and Cold War will interest not only historians of the British army but also those who are trying to understand Britain's role in the Cold War and how and why the British came to surrender formal rule over their empire.
