Despite their prominent role in poverty alleviation little is known about how these organizations function in developing countries This book charts a new path by considering the role of NGOs in African development and by using a number of new large scale representative data sets The book integrates a fragmented literature spanning many different disciplines by providing an overview of what is known about the sector This includes the growth and importance of the sector a cross country comparison of NGO sectors and various perspectives on the role of NGOs The book also looks at the shortcomings of the literature or what we do not know mapping and exploring the questions the literature has failed to answer such as what motivates NGOs how are they funded to whom are they accountable and what are the determinants of their growth and survival

broadly interested in the implementation of human rights coalition building scenarios and framing strategies Carlos Correa University of Buenos Aires Argentina This is a valuable corrective to a debate that is too often premised on the perspective of rich and developed countries Focussing on the network of NGOs that supports developing countries Duncan Matthews fills a major gap in the analysis of international disputes about intellectual property His analysis rightly demolishes the position that developing countries have remained helpless in the face of developments in the global governance of IPRs and helps explain how the global politics of IPRs is shifting Christopher May Lancaster University UK This insightful and important new book explores the role played by non governmental organizations NGOs in articulating concerns at the TRIPS Council the WIPO the WHO the CBD COP and the FAO that intellectual property rights can have negative consequences for developing countries Duncan Matthews describes how coalitions of international NGOs have influenced the way that the relationship between intellectual property rights and development is understood often framing the message as a human rights issue to emphasize these concerns and ensure that access to medicines food security and the rights of indigenous peoples over their traditional knowledge are protected Based on extensive research undertaken in Geneva and in developing countries the book also reveals how NGOs and broader social movements in Brazil India and South Africa have played a crucial role in addressing the negative impacts of intellectual property rights by using human rights law as a practical tool before national courts and when seeking to influence national legislation and government policy Intellectual Property Human Rights and Development will appeal to academics practitioners activists international negotiators and postgraduate students in intellectual property law human rights law the international political economy of intellectual property rights and development studies

Public Policy Toward Non-Governmental Organizations in Developing Countries William Jack, 2016 If a developing country government is not good at providing public services such as health care education and social protection would NGOs be better at doing so What advantages do NGOs have over for profit providers of publicly funded services And considering the importance of donor funding which is better for delivering such services an international NGO or a grassroots NGO Jack presents two descriptive models of nongovernmental organizations and poses normative questions about public policy toward NGOs In situations in which optimal government intervention in a distorted or inequitable economy employs an NGO like body he considers which kinds of NGO might be used First in many developing countries NGOs participate in the delivery of what are essentially private goods in particular health care and education In an economy without NGOs there may be good redistributive and efficiency reasons for the government to provide these goods in kind But if direct government provision of such services is ineffective or inefficient when is contracting out to an NGO like institution preferable to using a traditional for profit firm Another way to frame this is to ask What is the optimal taxation and regulation of private providers of publicly financed services NGOs also provide useful real and financial links with external

donors They are used to provide services the government favors and donors are willing to fund In this model the service provider is chosen to yield the best outcome for both government and donor In this context Jack compares an international NGO and a grassroots organization It may be more efficient to transfer donor funds through an international NGO than through a local NGO but when donor government cooperation fails a project implemented by an international NGO is effectively killed If a project implemented by a local organization can limp along this otherwise less efficient organization might be preferred This paper product of Public Service Delivery Development Research Group is part of a larger effort in the group to understand the role of NGOs in delivering basic public services The author may be contacted at wgj georgetown edu

Development JASID this book undertakes a review of Japan's economic development over the last 150 years and seeks to clarify Japanese priorities in domestic and foreign policy for the coming decades Can NGOs Make a Difference? Anthony J. Bebbington, Samuel Hickey, Diana C. Mitlin, 2008-06-15 Can non governmental organisations contribute to more socially just alternative forms of development Or are they destined to work at the margins of dominant development models determined by others Addressing this question this book brings together leading international voices from academia NGOs and the social movements It provides a comprehensive update to the NGO literature and a range of critical new directions to thinking and acting around the challenge of development alternatives The book's originality comes from the wide range of new case study material it presents the conceptual approaches it offers for thinking about development alternatives and the practical suggestions for NGOs At the heart of this book is the argument that NGOs can and must re engage with the project of seeking alternative development futures for the world's poorest and more marginal This will require clearer analysis of the contemporary problems of uneven development and a clear understanding of the types of alliances NGOs need to construct with other actors in civil society if they are to mount a credible challenge to disempowering processes of economic social and political development **International Environmental Law, Volume I** Paula M.
