Scientific Elite, Scientific Elite is about Nobel prize winners and the well defined stratification system in twentieth century science It tracks the careers of all American laureates who won prizes from 1907 until 1972 examining the complex interplay of merit and privilege at each stage of their scientific lives and the creation of the ultra elite in science The study draws on biographical and bibliographical data on laureates who did their prize winning research in the United States and on detailed interviews with forty one of the fifty six laureates living in the United States at the time the study was done Zuckerman finds laureates being successively advantaged as time passes These advantages are producing growing disparities between the elite and other scientists both in performance and in rewards which create and maintain a sharply graded stratification system

maintain a sharply graded stratification system **Bulletin of the Atomic Scientists** ,1979-01 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world Nobel Laureates in Chemistry, 1901-1992 James K. Laylin,1993-10-30 Through new perspectives from a mix of original monographs biographies autobiographical memoirs edited collections of essays and documentary sources translations classic reprints and pictorial volumes this series will document the individuals ideas institutions and innovations that have created the modern chemical sciences *China's Scientific Elite* Cong Cao,2004-07-31 China s Scientific Elite is a study of those scientists holding China s highest academic honour membership of the Chinese Academy of Sciences Having carried out extensive systematic data collection of CAS members Cao examines the social stratification system of the Chinese science community and the way in which politics and political interference has effected the stratification The book then goes on to compare the Chinese system to the stratification of the US scientific elite The conclusions are fascinating not least because one national elite resides in a democratic liberal social system and the other in an authoritarian social system Bulletin of the Atomic Scientists ,1979-01 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Europe's New Scientific Elite** Barbara Hoenig,2017-04-21 Winner of the Harald Kaufmann Prize for Senior Researchers 2018 This book examines the question of whether the process of European integration in research funding has led to new forms of oligarchization and elite formation in the European Research Area Based on a study of the European Research Council ERC the author investigates profound structural change in the social organization of science as the ERC intervenes in public science systems that until now have largely been organized at the national level Against the background of an emerging new science policy Europe s New Scientific Elite explores the social mechanisms that generate reproduce and modify existing dynamics of stratification and oligarchization in science shedding light on the strong normative impact of the ERC s funding on problem choice in science the cultural legitimacy and future vision of science and the building of new research councils of national European and global scope A comparative theory driven investigation of European research funding this book will appeal to social scientists with interests in the sociology of knowledge **The Scientific Attitude** Frederick Grinnell,1992-03-06 THE SCIENTIFIC ATTITUDE presents a systematic account of the cognitive and social features of science Written by an experimental biologist actively engaged in research the work is unique in its attempt to understand science in terms of day to day practice The book goes beyond the traditional description of science that focuses on method and logic to characterize the scientific attitude as a way of looking at the world Professor Grinnell uses examples from biomedical research to describe science at three interdependent levels At the first level the individual scientist makes observations formulates hypotheses and does experiments The scientist s thought style

determines what can be seen and what it will appear to mean At the second level scientists participate in social institutions such as graduate programs research groups journal editorial boards and grant review panels Each of these institutions tries to promote its own distinctive collective thought style Finally at the third level scientists participate in the world of everyday life beyond science a world that continuously influences and is influenced by the activities and discoveries of science
