Encyclopedia of Violence, Peace, and Conflict Lester R. Kurtz, Jennifer E. Turpin, 1999-08-10 The Encyclopedia of Violence Peace and Conflict a three volume set written by more than 200 eminent contributors from around the world takes advantage of increasing worldwide awareness in the public private commercial and academic sectors about manifestations of violence in all segments of society While the contributors do not use these volumes to make specific arguments they do describe and clarify the developments in thought that have led to current theories about and positions on violence and peace Our reviewers consistently note that while many in depth studies of war peace and aggression exist the attendant specialization keeps scholars from learning about related fields No publication competing with the Encyclopedia of Violence Peace and Conflict can satisfy their need for a vast introductory work to such a diverse and socially important field This major work includes more than 190 multidisciplinary articles with over 1 000 cross references and more than 2 000 bibliography entries for further reading which are arranged alphabetically for easy access More than 190 multidisciplinary articles with over 1 000 cross references Article outline and glossary of key terms begin each article Entries arranged alphabetically for easy access Three volume set with subject index of over 750 entries Articles written by more than 200 eminent contributors from around the world

Cosmopolis Danilo Zolo, 2013-05-31 This volume makes a challenging critique of the idea of Cosmopolis that is the idea of world or global government In recent years this idea has been put forward as a way of averting the threat of war and international disorder and as a way of avoiding the destruction of the

planet Proponents of this idea call for a radical reform of the United Nations which aims to legitimize this institution as an international police force and as a provider of global justice Zolo criticizes this new cosmopolitan philosophy and rejects the idea of trying to eliminate international conflict through the use of centralized and superior military force He seeks instead to develop a conception of international relations which takes account of their pluralistic dynamic and conflictual nature This conception moves away from the logic of hierarchical centralization which so dominates the UN Charter and towards the logic of weak interventionism and weak pacifism which relies on self organization co ordination and negotiation Timely provocative and iconoclastic Cosmopolis is an important contribution to current debates in politics international relations and social and political theory **The Workbook** ,1985 **An Introduction to Strategic Studies** Barry Buzan,1987-09-04 An Introduction to Strategic Studies addresses some of the major questions that govern both international relations and human survival This book provides a comprehensive introduction to the core concepts of contemporary strategic thinking It argues that strategic studies is about the impact of military technology on relations between states and that its specialised contribution must always be seen within the broader context of international economic and political relations
