Making Of The Second World War:

The Making of the Second World War Anthony P. Adamthwaite, 1992 First Published in 1979 Routledge is an imprint of Taylor Francis an informa company The Making of the Second World War Anthony P. Adamthwaite, 2013-08-21 First published in 1979 In this text the Adamthwaite aims at leading students through the maze of documentation surrounding the Second World War His book combines a critical assessment of recent research and writing with a painstaking selection of the key documents needed for a clear understanding of the policies that led to war It contains the first student selection of British French German Italian and Soviet documents many of which are translated for the first time Though emphasis falls on the years 1935-9 material is also included for the period 1929-35 Origins of the Second World War Victor Rothwell, 2001 Victor Rothwell examines the origins of World War II from the flawed peace settlement in 1919 to the start of the true world war at Pearl Harbor in 1941 He asks many important questions Why did the cause of peace advance in the 1920s only to be stopped in its tracks and threatened with reversal by the Great Depression what was the nature of Nazi thinking about war foreign policy and the policy of appeasement that sought to accommodate the Third Reich without again going to war He also examines the events in the Far East at the time and draws a contrast between the role of the US and the Far East throughout the 1930s Copyright Libri GmbH All rights reserved *Economic Diplomacy and the Origins of the Second World War* David E Kaiser, 2015-12-08 Although the political and military aspects of great power diplomacy in Eastern Europe during the interwar period have been studied extensively the economic aspects have been relatively neglected Drawing on documentary material that has only recently been made available David Kaiser redresses the balance in his discussion of the expansion of German trade with Eastern Europe during the 1930s and the British and French failure to respond to it Originally published in 1981 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Major Blunders of the Second World War** Andrew Sangster, 2024-12-30 A mistake is an error of judgement a blunder is a mistake caused by carelessness or ignorance implying incompetence Blunders are not always the result of incompetence a chess player may give a critical piece away being distracted by noise but in war it results in death with serious repercussions This book explores such errors during the Second World War some hardly known a few contentious many embarrassing An American destroyer which fired a live torpedo at a battleship carrying Roosevelt an American officer who unintentionally passed British information to Rommel and a German plane crash landing in neutral territory with plans for invasion are some little known incidents Overconfidence resulted in a Luftwaffe raid hitting exposed American gas shells killing Italian civilians British and American military Self assurance led to an American general

who lost men and tanks failing to rescue his son in law from a PoW camp Inadequate planning brought disaster in the raid on Dieppe Poor tactics deployed in the bombing of Monte Cassino was bad propaganda for the Allies but assisted the German defense There are some issues which remain disputed as with the British sinking the French Fleet but whether it was a blunder remains questionable There is the issue of the abdicated King Edward often accused of being a traitor which may not have stood a court case but possibly a Judas caused by immature naivety Finally D nitz was condemned at Nuremberg but his U boat warfare was no different from the Allies and at times almost chivalrous

Britain and the Cinema in the Second World War P. Taylor,1988-07-15 The essays which appear in this book for the most part originated as papers delivered at a conference on Britain and the cinema in the Second World War held in London in May 1985

U-boats of the Second World War: Their Longest Voyages Jak P. Mallmann Showell,2014-03-24 Ocean going U boats each one not much longer than four European articulated lorries with up to sixty men inside them sailed the far off seas to reap havoc in hot inhospitable waters The air forces and navies from Britain the United States and other colonial countries followed to make this a daring and death threatening venture The facts of what the U boats achieved against massive odds have been told before but U Boats of the Second World War Their Longest Voyages is different It concentrates more on how it was done How the men survived how they lived and died and how they still found time to carry out their orders The book is based on masses of previously unpublished documents from the German U boat Museum many of them written during or shortly after the war by men who survived this bitter conflict This is the story of how specially built long range ocean going U boats started out one step ahead of the Allied navies and air power how they fell one step behind and how they finally vanished into the depths of the biggest and deepest oceans This is a remarkable story of endurance courage and comradeship that terrified the world for the most critical period of the Second World War The author Jak P Mallmann Showell is the son of a U boat diesel mechanic who disappeared in those warm waters two months before the author was born

British Foreign Policy in the Second World War Ernest Llewellyn Woodward,1970

The Second World War John Keegan,2005-05-03 Praised as the best military historian of our generation by Tom Clancy John Keegan reconsiders his masterful study of World War II The Second World War with a new foreword Keegan examines each theater of the war focusing on five crucial battles and offering new insights into the distinctive methods and motivations of modern warfare In eloquent perceptive analyses of the airborne battle of Crete the carrier battle of Midway the tank battle of Falaise the city battle of Berlin and the amphibious battle of Okinawa Keegan illuminates the strategic dilemmas faced by the leaders and the consequences of their decisions on the fighting men and the course of the war as a whole An extraordinary definitive history The Second World War will be required reading for generations to come The Second World War merits the acceptance as the standard work that it will surely receive The Washington Post If you want to know how it happened read Keegan s thoughtful and elegant prose Los Angeles Times

Making Makers Michael P. M. Finch,2024-05-07 Making Makers presents a comprehensive history of a seminal work of

scholarship which has exerted a persistent attraction for scholars of war and strategy *Makers of Modern Strategy* It reveals the processes by which scholars conceived and devised the book considering both successful and failed attempts to make and remake the work across the twentieth century and illuminating its impact and legacy It explains how and why these influential volumes took their particular forms unearths the broader intellectual processes that shaped them and reflects on the academic parameters of the study of war in the twentieth century In presenting a complete genesis of the *Makers* project in the context of intellectual trends and historical contingency this book reflects on a more complex and nuanced appraisal of the development of scholarship on war In so doing it also offers contributions to the intellectual biographies of key figures in the history of war in the twentieth century such as Edward Mead Earle Peter Paret Gordon Craig and Theodore Ropp *Making Makers* contributes to an intellectual history of military history and contextualises the place of history and historians in strategic and security studies It is not only a history of the book but a history of the networks of scholars involved in its creation their careers and lines of patronage crossing international boundaries from Europe to the USA to Asia and Australia It is an investigation of ideas individuals and groups of work completed and scholarship produced as well as contingency and opportunities missed 1939 ,1973 Germany and the Second World War ,1990 This is the second in the comprehensive ten volume *Germany and the Second World War* The five volumes so far published in German take the story to the end of 1941 and have achieved international acclaim as a major contribution to historical study Under the auspices of the *Militargeschichtliches Forschungsamt* Research Institute for Military History a team of renowned historians has combined a full synthesis of existing material with the latest research to produce what will be the definitive history of the Second World War This volume surveys the first year of the war deliberately begun by Nazi Germany The authors examine the train of interconnected political and military events and set military operations against the background of Hitler's war policy and general aims both immediate and long term The authors show that the conflict took a course quite different from that which Hitler had intended but nevertheless resulted in a series of conquests for the Third Reich Making Connections Margaret Walsh,2017-05-15 This book argues that legal persuasion results from making and breaking mental connections To support this argument it follows a cognitive science roadmap while the authors road test the directions through rhetorical analysis By taking a rhetorical approach to persuasion the authors are able to integrate research from cognitive science with classical and contemporary rhetorical theory and then to apply both to the taking apart and the putting together of effective legal arguments The combination of rhetorical analysis and cognitive science yields a new way of seeing and understanding legal persuasion one that promises theoretical and practical gains The work has three main functions First it brings together the leading models of persuasion from cognitive science and rhetorical theory blurring boundaries and leverage connections between the often separate spheres of science and rhetoric Second it illustrates this persuasive synthesis by working through concrete examples of persuasion from real life legal contexts In this way the book demonstrates the advantages of a deeper

and more nuanced understanding of persuasion Third the volume assesses and explains why how and when certain persuasive methods and techniques are more effective than others The book is designed to appeal to scholars in law rhetoric persuasion science and psychology to students learning the practice of law and to judges and practicing lawyers who engage in persuasion

Institute for Military History a team of renowned historians has combined a full synthesis of existing material with the latest research to produce what will be the definitive history of the Second World War from the German point of view The comprehensive analysis based on detailed scholarly research is underpinned by a full apparatus of maps diagrams and tables Intensively researched and documented Germany and the Second World War is an undertaking of unparalleled scope and authority It will prove indispensable to all historians of the twentieth century *Building the Navy's Bases in World War II* United States. Bureau of Yards and Docks,1947 **Building Dutch Air Power in World War II** Nicholas Michael Sambaluk,2025-01-17 During World War II the United States earned the nickname the arsenal of democracy due to its sheer productive output which included over 3 000 000 trucks and jeeps 86 000 tanks 6 750 naval platforms 300 000 aircraft of all types It was also the arsenal of democracy in a second sense as a large portion of that hardware was supplied to countries fighting fascism When Franklin D Roosevelt introduced the Lend Lease Act Allied countries of the antifascist coalition were supplied with aid hardware and food Beyond material aid the United States also hosted and trained over 20 000 foreign pilots and aircrew between 1941 and 1945 This book presents the history of one such training program where 532 Dutch pilots crew and other personnel were trained on United States soil over 21 months With the Japanese army intent on invading the Netherlands East Indies it was critical that the Dutch army strengthen their air power When resistance fell on the NEI island of Java and Australia became the new front line Dutch authorities were forced to relocate their training program to Jackson Mississippi where they christened the Royal Netherlands Military Flying School From there they trained on bases in over a dozen states representing a high point for the Dutch air force during a grueling time After their training the RNMFS participated in the liberation of NEI from Japanese occupation This history presents in full context the training of Dutch air personnel on U S soil under the Lend Lease Act their easy rapport with their American hosts and their efforts to establish the Netherlands as an integral part of the Allied cause Grandeur And Misery Anthony Adamthwaite,2014-03-04 A central question in European history is how did a great power pre eminent in 1918 lie defeated by the same enemy less than 20 years later Until recently the explanation has been sought in fundamental weaknesses that could only leave the French of 1940 hamstrung and demoralized Recent studies have challenged that view and now for the first time the revisionist approach is displayed in a single volume both summarizing the research of others and drawing on the author s own work in the archives The book is about as far from dry as dust diplomatic history as it s possible to get Its very readable and the author manages to show with the telling anecdote that even a serious subject has its comic side that for instance the French High Command kept forces stationed in the Alps for seven years because no one in the foreign service had thought to pass on news about a secret treaty between Italy and France in 1902 or that after a particularly stressful meeting Andrew Bonar Law the British prime minister mouth to Poincar the French president through the closed carriage window of his train and you go to hell all the while smiling and exuding affability Such episodes are not the substance of the book but they oil its progress
