Muslims Making British Media Carl Morris, 2022-11-17 Drawing on original fieldwork Carl Morris examines Muslim cultural production in Britain with a focus on the performance based entertainment industries music comedy film television and theatre It is a seminal study that charts the growing agency and involvement of British Muslims in cultural production over the last two decades Morris sets this discussion within the context of wider religious social and cultural change with important insights concerning the sociological profile religious lives and public visibility of Muslims in contemporary Britain Morris draws on theoretical considerations concerning the mediatization of religion and cosmopolitanization in a globally connected world He argues that a new generation of media savvy and internationalist Muslim cultural producers in Britain are constructing counter narratives in the public sphere and are reshaping everyday religious lives within their own communities This is having a profound impact upon areas that range from Islamic authority and religious practice to political and public debate and understandings of Muslim identity and belonging

The UK's Changing Democracy Patrick Dunleavy, Alice Park, Ros Taylor, 2018-11-01 The UK's Changing Democracy presents a uniquely democratic perspective on all aspects of UK politics at the centre in Westminster and Whitehall and in all the devolved nations The 2016 referendum vote to leave the EU marked a turning point in the UK's political system In the previous two decades the country had undergone a series of democratic reforms during which it seemed to evolve into a more typical European liberal democracy The establishment of a Supreme Court adoption of the Human Rights Act Scottish Welsh and Northern Irish devolution proportional electoral systems executive mayors and the growth in multi party competition all marked profound changes to the British political tradition Brexit may now bring some of these developments to a juddering halt The UK's previous exceptionalism from European patterns looks certain to continue indefinitely Taking back control of regulations trade immigration and much more is the biggest change in UK governance for half a century It has already produced enduring crises for the party system Parliament and the core executive with uniquely contested governance over critical issues and a rapidly changing political landscape Other recent trends are no less fast moving such as the revival of two party dominance in England the re creation of some mass membership parties and the disruptive challenges of social media In this context an in depth assessment of the quality of the UK's democracy is essential Each of the 2018 Democratic Audit's 37 short chapters starts with clear criteria for what democracy requires in that part of the nation's political life and outlines key recent developments before a SWOT analysis of strengths weaknesses opportunities and threats crystallises the current situation A small number of core issues are then explored in more depth Set against the global rise of debased semi democracies the book's approach returns our focus firmly to the big issues around the

quality and sustainability of the UK's liberal democracy The Making of the UK Richard Allison, Carole Brown, 1990

The Road to War in Iraq: Comparative Foreign Policy Analysis Chris Featherstone, 2025-04-09 This book combines three Foreign Policy Analysis (FPA) models to explain both how and why the US and UK decided to invade Iraq in 2003. These three FPA models each examine a different but closely related aspect of the individual level of decision making. Firstly, Groupthink examines how pathologies of small group decision making affected the processes in the US and UK decision to invade Iraq. Secondly, the Leadership Style framework examines how the individual leader's style of exercising their leadership affected the navigation of the decision making process. Thirdly, analogical reasoning examines how decision makers frame their actions both in their own decision making and in how they present their decision to the wider public. By achieving these objectives, *The Road to War* contributes to the field of FPA and to our understanding of how the decision to invade Iraq was taken. The comparative use of these FPA models within a single framework means that this book responds to the calls for multifactorial research within FPA, proposing and testing a framework that provides more complex answers through adopting a multifactorial framework. These more nuanced complex answers then reveal more about the role of the individuals involved in the decision to invade Iraq and how their cognition affected the process that led to the decision to invade.

Governance Models for Creating Public Value in Open Data Initiatives Manuel Pedro Rodríguez Bolívar, Kelvin Joseph Bwalya, Christopher G. Reddick, 2019-05-07 This book relies on the conceptual model of Open Government (OG) focusing on transparency and concretely in open data initiatives at the local government context with the aim of improving participation and collaboration. Most Open Government models are centered on three pillars: transparency, participation, and collaboration. Transparency is a crucial ingredient of OG and applied to data openness means to ensure that the data are well known, comprehensible, easily accessible, and open to all. New governance models based on different open data models have not been proposed up to now. The chapter authors seek to contribute recent research to the discussion on governance models of open data initiatives to support Open Governments with the aim of creating public value. It includes both theoretical and empirical studies on governments' models in open data initiatives.

UK Communication Strategies for Afghanistan, 2001-2014 Thomas W. Cawkwell, 2016-03-09 The war in Afghanistan came to an end in 2014 after nearly thirteen years of conflict. Throughout that period, British officials have described UK operations there in various conflicting and often contradictory ways as a counter-terrorism mission, a stabilisation mission, and a counter-narcotics mission, respectively. This book investigates how the war was sold to the British public and how Britain's transnational foreign and defence policy impacted on the unfolding of UK strategy in Afghanistan and the way it was communicated. It argues that because the UK's foreign and defence policy is transnationally oriented, meaning that it is foundationally aimed at maintaining alliance with the United States and the institutional coherence of NATO, UK strategy is contingent upon collective security and crucially is fundamentally concerned with the means of policy maintaining alliances over the ends.

using alliances to effect change Explaining the inalienability of collective security systems to national security is no easy task however and when faced with the adversities of Afghanistan the UK state has since 2008 instead opted to describe the significance of Afghanistan in narrow nation centric counter terrorist concerns in order to maintain public support for collective security operations there whilst paradoxically framing the conflict in a manner that avoids talking about the transnational structure and purpose of the mission This kind of strategic communication is increasingly becoming a focus of the UK state as it faces a transnational dilemma of maintaining its collective security bonds whilst facing a public increasingly sceptical of liberal interventionism Introduction to the English Legal System 2019-2020 Martin
