Managing Emergent Phenomena Stephen J. Guastello, 2001-12 Chaos catastrophe self organization and complexity theories nonlinear dynamics now have practical and measurable roles in the functioning of work organizations Managing Emergent Phenomena begins by describing how the concept of an organization has changed from a bureaucracy to a humanistic and organic system to a complex adaptive system The dynamics concepts are then explained along with the most recent research methods for analyzing real data Applications include work motivation personnel selection and turnover creative thinking by individuals and groups the development of social networks coordination in work groups the emergence of leaders work performance in organizational hierarchies economic problems that are relevant to organizations techniques for predicting the future and emergency management Each application begins with a tight summary of standard thinking on a subject followed by the new insights that are afforded by nonlinear dynamics and the empirical data supporting those ideas Unusual concepts are also encountered such as the organizational unconscious collective intelligence and the revolt of the slaved variables The net results are a new perspective on what is really important in organizational life original insights on familiar experiences and some clear signposts for the next generation of nonlinear social scientists
