key to perform successfully within the new global context the author identifies primary motivations for universities to embrace this agenda and deconstructs the phenomenon into measurable dimensions and components Using extensive qualitative data from university leaders and practitioners this book analyses the global forces that shape the international education landscape and reviews the existing instruments for measuring internationalization In doing so the author proposes an integrated understanding of university internationalization and indicates benchmarks that can help to quantify and measure this phenomenon This book will be of interest and value to students and scholars of university internationalization

World Education Research Yearbook 2015 Lori Diane Hill, Felice J. Levine, 2015-05-15 The World Education Research Association WERA is an association of major national regional and international specialty research associations dedicated to advancing education research as a scientific and scholarly field WERA undertakes initiatives that are global in nature and thus transcend what any one association can accomplish in its own country region or area of specialization _____ Reflective of the latest trends in education research this inaugural volume of the World Education Research Yearbook captures the diverse concepts and various arenas of inquiry that are engaging education researchers across the globe Comprised of nine chapters the 2015 Yearbook brings together some of the most accomplished and emerging scholars in the field from a breadth of universities and research institutions in the United States Europe Australia Asia and South America The Yearbook opens with the Presidential Address given at the 4th WERA Focal Meeting by Yin Cheong Cheng who proposes a new paradigm of educational reform to address the challenges impressed upon educators by the increased globalization of the modern world Subsequent chapters make vivid the strengths of research with a broader work view Chapter contributions shift the discourse through a global lens addressing such topics as how international children s TV can be used to further global health education and awareness strategies for remedying low academic achievement among marginalized social and culture groups and a new global model designed to aid countries in developing more effective indicators of quality education The 2015 World Education Research Yearbook is a crucial and long awaited contribution to the field of education research Its relevance extends beyond the borders of any single country or continent to encompass a worldwide perspective on educational developments which are of great value to researchers educators and students alike Psycho-pedagogical research in a Double-degree programme Guido Benvenuto, Maria Serena Veggetti, 2020-03-31 In this volume we have collected the contributions of many colleagues from the teaching board of Double Degree Joint Master s Programme in Pedagogy and Educational Sciences and Training of Sapienza University of Rome and two prestigious universities of the Russian Federation Moscow Federal University for Psychology and Pedagogy MSUPE and North Caucasus Federal University NCFU at Stavropol The present anthology is meant to review the positions and studies that individual teachers from the different universities involved presented in recent years during online courses in the lecturing in the meetings and to discuss their possible opportunities The volume puts forward this programme to spread its structure the theoretical assumptions and

the various positions The contributions are meant to testify a keen interest in internationalization that Sapienza is carrying out The contributions collected give the reader a chance to share a common interest in the promising approach implied by the Historical cultural trend in Psychology and Pedagogy of the Vygotsky s thought which seems a must in psycho pedagogical reflections and in organizing and evaluating school activities

Europe's Lifelong Learning Markets, Governance and Policy Marcella Milana,Gosia Klatt,Sandra Vatrella,2020-07-20 This book explores European governance and policy coordination within lifelong learning markets Using an instruments approach the editors and contributors examine the ways in which governance mechanisms employed by the European Union influence policy to regulate lifelong learning and intervene in lifelong learning markets at both European and national levels Filling an important gap in the current literature this book examines how strengthened policy coordination at the EU level contributed to the blurring of boundaries between policy fields and the redefinition of the function of adult education after the 2008 recession Divided into three parts this book draws on a range of case studies from countries including Spain Denmark Bulgaria and the UK It will be of interest and value to students and scholars of education policy and governance adult education and lifelong learning

International Handbook of Educational Policy Nina Bascia,Alister Cumming,Amanda Datnow,Kenneth Leithwood,David

Livingstone,2008-05-14 Nina Bascia Alister Cumming Amanda Datnow Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research in over fty chapters written by nearly ninety leading researchers from a number of countries It is organized into ve broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters themselves are empirically grounded providing illustrations of the conceptual implications c tained within them as well as allowing for comparisons across them The se re exivity within chapters with respect to jurisdictional particularities and c trasts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in di erent times and places The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy They address in turn the contemporary strategic emphasis on large scale reform substantive emphases at several levels on leadership and governance improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding nally with a contrasting topic workplace learning which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy

Effective Assessment and the Improvement of Education Roger Murphy,Patricia Broadfoot,2017-09-29 Originally published in 1995 this volume brings together twenty classic contributions from the work of Desmond Nuttall as an educational researcher thinker and policy adviser A full commentary by two of his former colleagues who knew him well accompanies the text They have set out to explain and explore the essence of his contribution to others Much in the book is

as relevant today as when the articles were written put together they form a formidable collection The book was published in the year after Desmond s death It is hoped it will remain a fitting tribute to him It will remind his friends of his classic ideas and brings together in one volume contributions that students of education may have missed International Perspectives in Educational Effectiveness Research James Hall,Ariel Lindorff,Pamela Sammons,2020-08-10 This edited volume explores questions about what works how for whom when and why in education and considers how and to what extent such knowledge can be understood and extended across countries and different educational systems The book starts by presenting an overview of the history of educational effectiveness research and offers examples of current theories of educational effectiveness Next it provides exemplars of effectiveness studies that report on educational systems policies and practices from across six continents These studies vary in their research methods and outcomes illustrating a field of research that is conscious of its origins its agenda and its ambition to understand and improve the functioning of schools networks and education systems around the world The book brings these threads together within the final chapter and uses them to signpost directions for future research International Perspectives in Educational Effectiveness Research is an excellent and timely addition to the educational effectiveness literature It offers a rigorous and insightful range of international perspectives that will be of interest to researchers policy makers and students of the field Professor Christopher Chapman University of Glasgow UK President Elect of the International Congress for School Effectiveness and Improvement This important new volume brings up to date the contributions of educational effectiveness research to the development of policy and practice in the field over the last 50 years Drawing together the ideas of many of the major researchers in the field it provides a comprehensive analysis of these earlier contributions leading to critical commentaries that point to areas for future attention The editors make use of expertise from a range of disciplines to strengthen the themes that are addressed Most importantly the book emphasises the need to pay greater attention to the challenge of equity arguably the most significant challenge facing education systems internationally In this respect a particular strength of the book is the accounts provided from many different parts of the world These underline the importance of context a factor often previously overlooked in this field of research Given all of this I have no doubt that International Perspectives in Educational Effectiveness Research will become a major source for practitioners policy makers and researchers Professor Mel Ainscow Emeritus Professor of Education University of Manchester Professor of Education University of Glasgow UK **The International Handbook of Educational Research in the Asia-Pacific Region** J.P. Keeves,Ryo Watanabe,2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the

resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region
