Making Equity Planning Work:

Making Equity Planning Work Norman Krumholz, John Forester, 1990-05-18 From 1969 to 1979 Cleveland's city planning staff under Norman Krumholz's leadership conducted a unique experiment in equity oriented planning. Fighting to defend the public welfare while also assisting the city's poorest citizens, these planners combined professional competence and political judgment to bring pressing urban issues to the public's attention. Although frequently embroiled in controversy while serving three different mayors, the Cleveland planners not only survived but accomplished impressive equity objectives. In this book, Norman Krumholz and John Forester provide the first detailed personal account of a sustained and effective equity planning practice that influenced urban policy. Krumholz describes the pragmatic equity planning agenda that his staff pursued during the mayoral administrations of Carl B. Stokes, Ralph J. Perk, and Dennis J. Kucinich. He presents case studies illuminated with rich personal experience of the Euclid Beach development, the Clark Freeway, and the tax delinquency and land banking project that resulted in a change in the State of Ohio's property law, among others. In the second part of the book, John Forester explores the implications of this experience and the lessons that can be drawn for planning public management and administrative practice more generally. The SAGE Handbook of GIS and Society is a retrospective and prospective overview of GIS and Society research that provides an expansive and critical assessment of work in that field. Emphasizing the theoretical, methodological, and substantive diversity within GIS and Society research, the book highlights the distinctiveness and intellectual coherence of the subject as a field of study while also examining its resonances with and between key themes and among disciplines ranging from geography and computer science to sociology, anthropology, and the health and environmental sciences. Comprising 27 chapters, often with an international focus, the book is organized into six sections.

Earth's people, now urban dwellers and cities being the most efficient habitat for the utilisation of resources, it is imperative that we continue to support standards of living and efficiencies of urban areas. However, the urbanisation process has not been without its problems. While much has been done to address the original issues surrounding the quality of urban life, new challenges continue to arise. It is no longer sustainable to achieve improvements by means that require greater and greater energy consumption as we did in the past. Despite their complexity, however, cities are a great laboratory for architects, engineers, and other key professionals to apply new ideas and new technology to meet our requirements for more sustainable city environments. Containing papers presented at the latest in a series of conferences organised by the Wessex Institute of Technology, these proceedings split into two volumes address not just environmental, architectural, and engineering concerns but also quality of life, security, risk, and heritage. The diversity of topics and the case studies based on existing projects make the book an important contribution to the literature on urban planning.

The Affordable Housing Reader J. Rosie Tighe, Elizabeth J. Mueller, 2013. The Affordable Housing Reader brings together classic works and contemporary writing on the themes and debates that have animated the field of affordable housing policy, as well as the challenges in achieving the goals of policy on the ground. The Reader, aimed at professors, students, and researchers, provides an overview of the literature on housing policy and planning that is both comprehensive and interdisciplinary. It is particularly suited for graduate and undergraduate courses on housing policy offered to students of public policy and city planning. The Reader is structured around the key debates in affordable housing, ranging from the conflicting motivations for housing policy through analysis of the causes of and solutions to housing problems to concerns about gentrification and housing and race. Each debate is contextualized in an introductory essay by the editors and illustrated with a range of texts and articles. Elizabeth Mueller and Rosie Tighe have brought together for the first time into a single volume the best and most influential writings on housing and its importance for planners and policy makers.

Rethinking Administrative Theory Jong S. Jun, 2001-10-30. Eighteen leading international scholars evaluate public administration's historical development and explore the significance and value trends in public administration from a variety of cutting-edge theoretical and practical perspectives. Wassenhoven, 2022-03-28 The purpose of the book is to elaborate a planning theory which departs from the plethora of theories which reflect the conditions of developed countries of the North West The empirical material of this effort is derived from a country Greece which sits on the edge between North West and South East at the corner of Europe No doubt there is extensive international literature on planning theory in general from a bewildering variety of viewpoints The interested professional or student of urban and regional planning is certainly aware of the dizzying flood of books articles and research reports on planning theory and of their never ending borrowing of obscure concepts from more respectable scientific disciplines from mathematics to philosophy and from physics to economics human geography and sociology He or she probably observed that there is a growing interest in theoretical approaches from the viewpoint of the so called Global South The author of the present book has for many decades faced the impasse of attempting to transplant theories founded on the experience of the North West to countries with a totally different historical political social and geographical background He learned that the reality that planners face is unpredictable patchy and responsive to social processes frequently of a very pedestrian nature Planning strives to deal with private interests which planners are keen to envelop in a single public interest which is extremely hard to define The behaviour of the average citizen far from being that of the neoclassical model of the homo economicus is that of an individual a kind of homo individualis who interacts with the state and the public administration within a complex web of mutual dependence and negotiation The state and its administrative apparatus i e the key determinants and fixers of urban and regional planning policy bargain with this individual offer inducements exemptions derogations and privileges deviate unhesitatingly from their grand policy pronouncements but still defend the rationality and comprehensiveness of the planning system they have legislated and operationalized It is by and large a successful *modus vivendi* but only thanks to a constant practice of compromise Hence the term compromise planning which the author coined as an alternative to all the existing theoretical forms of planning This is the sort of planning and of the accompanying theory with which he deals in this book It is the outcome of experience and knowledge accumulated in a long personal journey of academic teaching in England

and Greece research and professional involvement **A Good Place to Do Business** Roger Biles, Mark H. Rose, 2022-10-28 This book looks at the politics of downtown business promotion as an urban renewal strategy from the end of World War II to the present with a focus on five case cities Philadelphia Chicago Detroit St Louis and Cleveland Community Planning Eric Damian Kelly, 2012-09-26 This book introduces community planning as practiced in the United States focusing on the comprehensive plan Sometimes known by other names especially master plan or general plan the type of plan described here is the predominant form of general governmental planning in the U S Although many government agencies make plans for their own programs or facilities the comprehensive plan is the only planning document that considers multiple programs and that accounts for activities on all land located within the planning area including both public and private property Written by a former president of the American Planning Association Community Planning is thorough specific and timely It addresses such important contemporary issues as sustainability walkable communities the role of urban design in public safety changes in housing needs for a changing population and multi modal transportation planning Unlike competing books it addresses all of these topics in the context of the local comprehensive plan There is a broad audience for this book planning students practicing planners and individual citizens who want to better understand local planning and land use controls Boxes at the end of each chapter explain how professional planners and individual citizens respectively typically engage the issues addressed in the chapter For all readers Community Planning provides a pragmatic view of the comprehensive plan clearly explained by a respected authority **Argument Turn Policy Anal Plan** Frank Fischer, 2002-09-11 First Published in 1993 Routledge is an imprint of Taylor Francis an informa company Big Plans Kenneth L. Kolson, 2003-11-03 This work springs from the idea that human aspirations for the city tend to overstate the role of rationality in public life The author explores the part serendipity plays in urban experience **Preserving the Vanishing City** Stephanie Ryberg-Webster, 2023-04-14 Chronicles the rise of historic preservation as a field of advocacy and practice in Cleveland during the 1970s and early 1980s comprehensively documenting the history of preservation within the context of one city s urban decline Critical Theory, Public Policy, and Planning Practice John Forester, 1993-01-01 Too often attacked as hopelessly abstract contemporary critical social theory can help us to understand both public policy and its analysis In this book John Forester shows how policy analysis planning and public administration are thoroughly political communicative practices that subtly and selectively organize public attention Drawing from Jürgen Habermas s critical communications theory of society Forester shows how policy developments alter the social infrastructure of society He provides a clear introduction to critical social theory at the same time that he clarifies the practical and political challenges facing public policy analysts public managers and planners working in many fields
