Sousa, 2006-03-07 Oil and Terrorism in the New Gulf examines the national security implications of U S energy security policies in the Middle East and the emerging U S involvement in oil exploration and extraction in West Africa Similar political social and economic challenges _poverty corruption lack of infrastructure and weak governments_ are seen in the oil producing states of both the Middle East and Africa Drawing comparisons between these two regions allows Forest and Sousa to formulate policy recommendations for how to handle foreign policy toward Africa in the future based on lessons learned from past interaction with the Middle East Oil and Terrorism in the New Gulf promises to inform a lively debate over the future of U S foreign policies toward Africa and is a valuable resource for policymakers and the academic community that should be approached in a coherent integrated fashion to ensure the success of the United States energy and national

security agendas *Marketing Peace* Paromita Goswami, 2017-08-21 Religious terrorism accounted for 66% of all deaths from terror attacks in 2013 Using religion as a trump card for justification of violence has increased sharply since 2000 significantly overtaking political and nationalist separatist movements There has however been no serious attempt to understand how peace can be offered as an alternative product to violence if it was handled by commercial marketers If a presidential candidate sportsperson detergents or banking services can be marketed can peace be marketed too This book argues that social marketing which uses commercial marketing principles for social good may make a significant contribution to encouraging peace The book unearths the subconscious metaphorical frames utilised by Christians in their conceptualisations of Muslims in the US and vice versa through a two fold approach Firstly ethnographic field work is used to gain the trust of the community and to understand the lived in experience of community members in their natural social setting Secondly the Zaltman Metaphor Elicitation Technique ZMET is adopted as a tool to discern the metaphorical lens that Christians and Muslims use to view each other The study suggests how this metaphorical lens of framing may help in designing more effective interventions that would fundamentally alter the mechanism of contact between rival majority and minority religious groups in conflict The Terrorism Lectures James Forest, 2013-12-13 The authoritative compendium for students of terrorism and counterterrorism Targeting Top Terrorists Bryan C. Price, 2019-01-15 When President Barack Obama announced the assassination of Osama bin Laden many Americans hoped the killing of al Qaida s leader would sound the death knell for the organization Since 9 11 killing and capturing terrorist leaders has been a central element in U S counterterrorism strategy This practice known as leadership decapitation is based on the logic that removing key figures will disrupt the organization and contribute to its ultimate failure Yet many scholars have argued that targeted killings are ineffective or counterproductive questioning whether taking out a terror network s leaders causes more problems than it solves In *Targeting Top Terrorists* Bryan C Price offers a rich data driven examination of leadership decapitation tactics providing theoretical and empirical explanations of the conditions under which they can be successful Analyzing hundreds of cases of leadership turnover from over two hundred terrorist groups Price demonstrates that although the tactic may result in short term negative side effects the loss of top leaders significantly reduces terror groups life spans He explains vital questions such as What factors make some terrorist groups more vulnerable than others Is it better to kill or capture terrorist leaders How does leadership decapitation compare to other counterterrorism options With compelling evidence based on an original dataset along with an in depth case study of Hamas *Targeting Top Terrorists* contributes to scholarship on terrorism and organizational theory and provides insights for policy makers and practitioners on some of the most pressing debates in the field **Pirates, Terrorists, and Warlords** Jeffrey H. Norwitz, 2009-07-01 Pirates warlords guerillas criminal organizations drug cartels apocalyptic religious extremists police agencies terrorists these are classic insurgents whose past present and future is dissected in this important book Contributing writers including Martha Crenshaw T X Hammes Russell

Howard Gene Cristy Yosef Kuperwasser and academics from Naval War College Marine Corps War College and Stanford University explore important insurgency related issues such as domestic terrorism globalization of armed groups children on the battlefield religious influence on armed fights and more This rich anthology offers scholars and citizens a new way to think about national and international security as it stands today and its future *From Pablo to Osama* Michael

Kenney,2010-11 *From Pablo to Osama* is a comparative study of Colombian drug smuggling enterprises terrorist networks including al Qaeda and the law enforcement agencies that seek to dismantle them Drawing on a wealth of research materials including interviews with former drug traffickers and other hard to reach informants Michael Kenney explores how drug traffickers terrorists and government officials gather analyze and apply knowledge and experience The analysis reveals that the resilience of the Colombian drug trade and Islamist extremism in wars on drugs and terrorism stems partly from the ability of illicit enterprises to change their activities in response to practical experience and technical information store this knowledge in practices and procedures and select and retain routines that produce satisfactory results Traffickers and terrorists learn building skills improving practices and becoming increasingly difficult for state authorities to eliminate The book concludes by exploring theoretical and policy implications suggesting that success in wars on drugs and terrorism depends less on fighting illicit networks with government intelligence and more on conquering competency traps traps that compel policy makers to exploit militarized enforcement strategies repeatedly without questioning whether these programs are capable of producing the intended results **Eco-Warriors, Nihilistic Terrorists, and the Environment** Lawrence E.

Likar,2011-04-07 The first book to thoroughly address the topic this volume examines the ideologies tactics and goals of environmental terrorists and offers a security planning methodology to defend against their attacks To counter eco terrorism we must understand why it occurs *Eco Warriors Nihilistic Terrorists and the Environment* is a comprehensive examination of the vulnerability of the natural environment of its nexus with the strategic goals of terrorists and of a security planning methodology that can prevent or ameliorate environmentally linked attacks The first book to comprehensively address the prevention of environmentally focused terrorism this work looks at the environment and the private and government facilities that impact it as assets to be protected Focusing on the capability of lone wolf terrorists and small self radicalizing cells to commit effective violent acts security expert Lawrence E Likar furnishes personality and operational profiles of both nihilistic and eco warrior terrorists showcasing an essential component of the behavioral science based security planning methodology he promotes Most critically the book addresses the gap in current security planning methodology and literature and it reveals novel intelligence gathering techniques operational procedures and countermeasures designed to defend against attacks **Understanding Violent Radicalisation** Magnus Ranstorp,2010-01-21 This is the first book to address in depth

the interplay between radicalisation and political violence in Europe as well as the effectiveness of counter measures As evidenced from the multitude of intercepted plots across several European cities since 2001 the threat level and the intensity

of the desire to perpetrate mass casualty attacks within Europe is not diminishing While violent radicalization has gradually moved to the top of the EU counterterrorism agenda it has been accompanied by a relatively embryonic understanding about the processes and interplay of factors that contribute to radicalization which are played out differently in cities like Paris Rome London and Copenhagen Undoubtedly there are common factors at the global and regional levels that facilitate radicalization but it is also clear that radicalization is very context dependent This book provides crucial insights into different ways to understand violent radicalization within national contexts and the challenges addressing the many pathways into terrorism inspired by al Qaeda and other forms of Islamic extremism This book will be of great interest to students of terrorism studies and political violence counter terrorism EU politics security studies and IR in general Magnus Ranstorp is Research Director of the Center for Asymmetric Threat Studies at the Swedish National Defence College and a Member of EU Expert Groups on Violent Radicalisation He has twenty years of experience in research on counterterrorism issues and testified at the 9 11 Commission Hearing Weaponized Words Kurt Braddock,2020-04-16 Discover theories of persuasion that show how terrorist messages promote radicalization and how counter messages fight terrorist propaganda
