Making Of The Crofting Community:

The Making of the Crofting Community James Hunter, 2018-05-17 This book has been seminal in bringing to the fore the injustices that have been inflicted on the Highlands in the name of government and landlord injustices often lost in the name of dry statistics and academic balance Written by a man who has gone on to become both an award winning historian of the Highlands and a leading figure in the public life of the region The Making of the Crofting Community has attracted praise inspired debate and provoked outrage and controversy over the years This book remains necessary to challenge standard academic interpretations of the Highland past Having long been one of the classics of Birlinn's John Donald list this revised and updated new edition includes a substantial new preface and an extensive reworking of the existing text **The Making of the Crofting Community, 1746-1930** James R. Hunter, 1974 **The People of Glengarry** Marianne McLean, 1993 McLean works in the manuscript division of the National Archives of Canada and draws extensively on unpublished sources to present a new interpretation of Scottish migration to Canada Showing how the traditional clan society in western Inverness was disrupted by capitalism she documents the emigration of nine coherent groups and their attempts to recreate Highland culture in Glengarry County in Ontario Annotation copyrighted by Book News Inc Portland OR *The Making of the Crofting Community, 1746-1930* James R. Hunter, 1974 *The People's Clearance* J.M. Bumsted, 1982-01-15 This is a revisionist account of Highland Scottish emigration to what is now Canada in the formative half century before Waterloo

The Highland Clearances Eric Richards, 2012-11-05 The Highland Clearances stands out as one of the most emotive chapters in the history of Scotland This book traces the origins of the Clearances from the eighteenth century to their culmination in the crofting legislation of the 1880s In considering both the terrible suffering of the Highland people as well as the stark choices that faced landowners during a period of rapid economic change it shows how the Clearances were one of many attempted solutions to the problem of how to maintain a population on marginal and infertile land and were in fact part of a wider European movement of rural depopulation In drawing attention away from the mythology to the hard facts of what actually happened The Highland Clearances offers a balanced analysis of events which created a terrible scar on the Highland and Gaelic imagination Sutherland Estate, 1850-1920 Annie Tindley, 2010-06-30 From the mid nineteenth century until the end of World War I the Sutherland Estate was the largest landed estate in western Europe at 1.1 million acres the ducal family owned almost the entire county of Sutherland as well as a further 30 000 acres in England The estate was owned by the dukes of Sutherland who were among the richest patrician landowners of the period from the early nineteenth century however the family were shadowed by their reputation as great clearance landlords something that would come back to haunt them throughout the coming decades *Class and Community in Provincial Ireland, 1851-1914* Brian Casey, 2018-04-26 This book explores the experience of small farmers labourers and graziers in provincial Ireland from the immediacy of the Famine until the eve of World War One During this period of immense social and political change they came

to grips with the processes of modernisation By focusing upon east Galway it argues that they were not an inarticulate mass but rather they were sophisticated and politically aware in their own right This study relies upon a wide array of sources which have been utilised to give as authentic a voice to the lower classes as possible Their experiences have been largely unrecorded and this book redresses this imbalance in historiography while adding a new nuanced understanding of the complexities of class relations in provincial Ireland This book argues that the actions of the rural working class and nationalists has not been fully understood supporting E P Thompson s argument that their aspirations were valid in terms of their own experiences Improvement and Romance Peter Womack,1989-06-18 An attempt to trace the origins of the romantic image of the Highlands by examining the economic military and ideological circumstances of the region s subjugation by the British state It combines literary criticism and cultural history to produce a case study of the making of the myth **Radical Human Ecology** Rose Roberts,2016-04-08 Human ecology the study and practice of relationships between the natural and the social environment has gained prominence as scholars seek more effectively to engage with pressing global concerns In the past seventy years most human ecology has skirted the fringes of geography sociology and biology This volume pioneers radical new directions In particular it explores the power of indigenous and traditional peoples epistemologies both to critique and to complement insights from modernity and postmodernity Aimed at an international readership its contributors show that an inter cultural and transdisciplinary approach is required The demands of our era require a scholarship of ontological depth an approach that can not just debate issues but also address questions of practice and meaning Organized into three sections Head Heart and Hand this volume covers the following key research areas Theories of Human Ecology Indigenous and Wisdom Traditions Eco spiritual Epistemologies and Ontology Research practice in Human Ecology The researcher researched relationship Research priorities for a holistic world With the study of human ecology becoming increasingly imperative this comprehensive volume will be a valuable addition for classroom use

Landscapes of Clearance Angele Smith,Amy Gazin-Schwartz,2016-06-03 This volume examines landscapes that have been cleared of inhabitants for economic environmental or socio political reasons by choice or by force and the social impacts of clearance on their populations Using cases from five continents and ranging from prehistoric through colonial and post colonial times the contributors show landscapes as meaningful points of contestation when populations abandon them or are exiled from them Acts of resistance and revitalization are also explored demonstrating the social and political meaning of specific landscapes to individuals groups and nations and how they help shape cultural identity and ideology Sponsored by the World Archaeological Congress *Common Land in Britain* Angus J. L. Winchester,2022 The first authoritative survey of the history of common land in Great Britain from the medieval period to present day More than a million hectares of Britain has the status of common land most of it consisting of semi natural environments of mountain moorland wetland or heath Formerly much more extensive common land was and in many places remains an integral part of the pastoral economy Even

where it is no longer used by farmers it plays an increasingly important role in modern life as recreational space and for its value for nature conservation This book provides for the first time an authoritative survey of the history of common land across all three nations of Great Britain from medieval times to the present day It charts how commons have been viewed and valued across the centuries how they have been used and how their vegetation has changed highlighting parallels and differences between the histories of common land in England Scotland and Wales It traces the distinctive legal status of common land and the management regimes which regulated the exercise of common rights considers the role of commons as spaces for communal gatherings and as a resource for the poor charts the loss of common land but also its persistence during the era of enclosure in the century 1760 1860 and explores the changing conceptions of the value and right use of commons since the nineteenth century and the impact this has had on their ecological character Eight case studies of individual commons illustrate the richness of common landscapes and their history at local level They include crofters common grazings in Sutherland mountain commons in the Lake District and Snowdonia lowland commons in Co Durham Herefordshire and the New Forest turbary allotments in Lincolnshire and the urban commons of Wimbledon and Putney Heath

Reimagining Culture Sharon Macdonald, 2020-05-15 Since the 1960s policies to revive minority cultures and languages have flourished But what does it mean to have a cultural identity And are minorities as deeply attached to their languages and traditions as revival policies suppose This book is a sophisticated analysis of responses to the Gaelic renaissance in a Scottish Hebridean community Its description of everyday conceptions of belonging and interpretations of cultural policy takes us into the world of Gaelic playgroups crofting local history religion and community development Historically and theoretically informed this book challenges many of the ways in which we conventionally think about ethnic and national identity This accessible and engaging account of life in this remote region of Europe provides an original and timely contribution to questions of considerable currency in a broad range of social science disciplines

Landscapes of Protest in the Scottish Highlands after 1914 Iain J.M. Robertson, 2016-04-15 In November 1918 the implementation of agrarian change in the Scottish Highlands threatened another wave of unemployment and eviction for the land working population which led to widespread and varied social protest Those who had been away on war service and their families faced returning to exactly the same social and economic conditions in the Scottish Highlands they had hoped they had left behind in the struggle to make a land fit for heroes Widespread and varied social protest rapidly followed It argues that previously there has been a failure to capture fully the geography chronology typology and rate of occurrence of these events The book not only offers new insights and a greater understanding of what was happening in the Highlands in this period but illustrates how a range of forms of protest were used which demand attention not least for the fact that these events unlike most of the earlier Land Wars period were successful There are functioning townships in the Highlands today that owe their existence to the land invasions of the 1920s The book innovatively concentrates on formulating explanation and interpretation from within and looks to the crofting

landscape as base means and motive to disturbance and interpretation It proposes that protest is much more convincingly understood as an expression of environmental ethics from the bottom up coming increasingly into conflict with conservationist views expressed from the top down It focuses on individual case studies in order to engage more convincingly with an important evidential base that of popular memory of land disturbances and to adopt a frame and lens through which to explore the fluid and contingent nature of protest performances Based upon the belief that in the study of landscapes of social protest the old shibboleth of space as solely passive setting and symbolic register is no longer tenable is paid here to nature culture interactions to vernacular ecological b

Land Agent Lowri Ann Rees, 2018-06-08 This book brings together leading researchers of British and Irish rural history to consider the role of the land agent or estate manager in the modern period Land agents were an influential and powerful cadre of men who managed both the day to day running and the overall policy direction of landed estates As such they occupy a controversial place in academic historiography as well as popular memory in rural Britain and Ireland Reviled in social history narratives and fictional accounts the land agent was one of the most powerful tools in the armoury of the British and Irish landed classes and their territorial political and social dominance By unpacking the nature and processes of their power The Land Agent explores who these men were and what was the wider significance of their roles thus uncovering a neglected history of British rural society
