Health Insurance Reforms in Asia Sabrina Luk, 2014-03-26 This book empirically examines health care financing reforms and popular responses in three major cities in East Asia Shanghai Singapore and Hong Kong It adopts a new revised version of the theory of historical institutionalism to compare and explain the divergent reform paths in these three places over the past three decades It also examines forces that propel institutional change The book provides three detailed case studies on the development of health care financing reforms and the politics of implementing them It shows that health care systems in Shanghai Singapore and Hong Kong were the products of Western presence in the nineteenth century It illustrates how greater attention is paid to the roles played by ideas actors and environmental triggers without abandoning the core assumptions that political institutions and policy feedback remain central to impact health care financing reforms It shows that health care financing reform is shaped by a complex interplay of forces over time It also provides the most updated material about health care financing reforms in Shanghai Singapore and Hong Kong The central argument of this book is that health care financing reform is both an evolving process responding to changing circumstances and a political process revealing an intricate interplay of power relationships and diverse interests It shows that institutional changes in health care financing system can be incremental but transformative in nature It argues that social policies will continue to develop and welfare states will continue to adapt and evolve in order to cope with new risks and needs This book sheds new lights on understanding the politics of health care financing reform and sources and modes of institutional change

Health Care Reform Around the World Andrew Twaddle,2002-06-30 Health care reforms around the world from Europe and North America to Africa Latin America and Asia seem to all be market oriented reforms driven by international business interests and right wing political parties There seems to be a sudden and broad concern with the efficiency of medical care with the assertion that democratically or professionally run systems are inherently inefficient Far less concern is evident for the more traditional values held regarding medical care effectiveness or quality and equity The fact is that we have little good cross national research that systematically addresses the reform issue This book addresses that problem and attempts to look at health care reforms in a number of countries representing as wide a spectrum as possible and using a common conceptual framework that allows for comparable information to be gathered and presented on each despite differing levels of socio economic development The authors agreed on a set of models that were thought to provide reasonable guidance in answering the questions of the source of pressures for reform the alternative modes of organization that have been found in the world in recent years and the direction of change among those alternatives *An Introduction to Healthcare Organizational Ethics* Robert T. Hall,2000-06-15 This is a lucid readable discussion of ethical questions in health care as they arise on the business or organizational level an effort to spell out an ethical perspective for healthcare organizations It will be of use to students in health services management programs health care professionals healthcare administrators and members of healthcare ethics committees Hall begins with the ethical analysis of decision making in the management of healthcare organizations and then addresses some of the questions of organizational ethics through an analysis of corporate social responsibility in for profit and not for profit organizations and of the problem of uncompensated care Later chapters take up patient development community relations diversity employee relations governmental relations regulatory compliance and medical records The author s analysis focuses on healthcare institutions as business organizations with many of the

problems faced by corporate management in other fields but with the difference that health care holds a special place among human needs and has traditionally been viewed from an altruistic perspective He gives special attention to the new standards on organizational ethics promulgated by the Joint Commission on Accreditation of Healthcare Organizations and includes many case studies not only to illustrate the main points but also to direct the reader's attention to peripheral aspects that can complicate these issues
