New Dimensions To Energy Policy:

New Dimensions to Energy Policy Robert M. Lawrence, 1979 Energy policy in the local state and regional context Energy policy in the national context New Dimensions to Energy Policy Robert M. Lawrence, 1979 Energy policy in the local state and regional context Energy policy in the national context **Energy Policy Making in the EU** Jale Tosun, Sophie Biesenbender, Kai Schulze, 2015-01-05 The book adopts an innovative analytical approach to agenda setting by not only presenting successful cases in which energy issues were addressed by means of public policy but by also analyzing failed attempts to make issues part of the European policy agenda Another outstanding feature of the book is its use of the latest empirical data on a broad range of energy issues When are energy issues likely to find their way to the agenda of European policymakers This is the key research question guiding this collection of empirical studies which will shed light on both successful and unsuccessful attempts to include energy issues in the European agenda The multi level political system of the European Union represents a particularly fruitful setting for addressing this question due to the multiple institutional access points it provides for different groups of actors The book has three key benefits First it provides a theory informed analysis of agenda setting processes in general and in the European Union in particular Second it presents an overview of the most important and emerging dimensions on European energy policy and third it helps to develop a research agenda for future research in the field Energy Joseph Russell Rudolph, 1995 A road map for the novice researcher contemplating the broad field affected by and concerned with energy **Energy Education Materials Inventory: August 1979** University of Houston. Energy Institute, 1978 **EU Leadership in Energy and Environmental Governance** Jakub M. Godzimirski, 2016-02-25 This edited collection focuses on the impact of the changing global distribution of power on the EU s energy policy and ability to project its approach to energy related issues abroad It maps the EU s changing position on global energy the impact of various factors on its energy policy and its relations with Russia China the USA and Brazil Energy Education Materials Inventory , 1979 Energy Security in Times of Economic Transition Yao Lixia, 2021-01-20 This book provides a quantitative framework for evaluating China s energy security in the economic transition period and comprehensively explains how China s macroeconomic reforms have impacted on its energy sector **Final Report on New Dimensions in Energy Policy and Organization** Donald E. Cunningham, University of Denver. Center for Public Issues, 1978 **Russia's Energy Policies** Pami Aalto, 2012-01-01 Russia is an increasingly important player in global energy markets yet its policies are under researched and little understood This collection represents an important and sophisticated contribution to the debate While much of the commentary on Russian energy consists of generalizations about Russia s political strategy this work lifts the lid and looks inside the process through which Russian energy policies are designed and implemented It brings together essays by top specialists in the field and makes a conscious effort to integrate the various disciplines of politics economics and geography by developing a model of the cognitive frames through which the policy

process is shaped It addresses both domestic and international dimensions of the problem and gives equal weight to traditional customers in Europe and new markets in Asia Peter Rutland Wesleyan University US The book explains Russian energy policies instead of a policy It portrays a picture with multiple policy drivers including institutional regional and federal environmental and commercial The study markedly improves our understanding of the multifaceted nature of Russian energy policy a topical and complex issue This is a highly commendable book that should be included in the reading lists of anyone with an interest in the role of energy in Russia s political economy or energy matters more generally Kim Talus University College London Australia Russia s vast energy reserves and its policies towards them have enormous importance in the current geopolitical landscape This important book examines Russia s energy policies on the national interregional and global level It pays particular attention to energy policy actors ranging from state federal and regional actors to energy companies and international financial actors and organizations The book models the formation of Russia s energy policies in terms of how energy policy actors perceive and map their policy environment The case studies cover federal regional and environmental aspects of Russian energy policy Russia s energy relations with Europe and the CIS North East Asia the globalization of Russian oil companies and the political economy of Russian energy It is found that there are several concurrent energy policies in contemporary Russia and that this situation is likely to continue These policies are conducted primarily from the business frame perspective while notions of energy superpower Russia are found more ambiguous Russia s Energy Policies will benefit advanced master s level students doctoral students researchers policy makers and practitioners The book will be a great resource for advanced international relations political economy international business and globalisation courses alongside energy policy courses as well as area studies courses on Russian post Soviet and European politics and environmental politics

China, India,

and East and Southeast Asia: Assessing Sustainability Ray C. Anderson, Sam Geall, Jingjing Liu, Sony Pellissery, E. N. Anderson, Joel R. Campbell, Joanna I. Lewis, Muhammad Aurang Zeb Mughal, Mark Wilson, 2012-11-01 China India and East and Southeast Asia Assessing Sustainability provides unprecedented analyses by regional experts and scholars elsewhere in the world on China India and their neighbors Despite growing demands internally on their natural resources China and India alone are home to more than one third of the world s population the expanding global economic influence of this region makes these countries vital players in a sustainable future for all citizens of the Earth Regional coverage includes topics such as business and commerce environmental and corporate law and lifestyles and values **Energy Security and Climate Change** Artur Gradziuk, Ernest Wyciskiewicz, 2009 *The Politics of Deregulation* Martha Derthick, Paul J. Quirk, 2001-06-07 The standard wisdom among political scientists has been that iron triangles operated among regulatory agencies the regulated industries and members of Congress all presumably with a stake in preserving regulation that protected the industries from competition Despite almost unanimous agreement among economists that such regulation was inefficient it seemed highly unlikely that deregulation could occur Yet between 1975 and 1980 major deregulatory changes that strongly favored competition did take place in a wide range of industries The results are familiar to airline passengers users of telephone service and trucking freight shippers among others Martha Derthick and Paul J Quirk ask why this deregulation happened How did a diffuse public interest prevail over the powerful industry and union interests that sought to preserve regulation Why did the regulatory commissions which were expected to be a major obstacle to deregulation instead take the initiative on behalf of it And why did influential members of Congress push for even greater deregulation The authors concentrate on three cases airlines trucking and telecommunications They find important similarities among the cases and discuss the implications of these findings for two broader topics the role that economic analysis has played in policy change and the capacity of the American political system for transcending narrow interests Research Handbook on EU Energy Law and Policy Rafael Leal-Arcas, Jan Wouters, 2017-10-27 This authoritative Research Handbook presents for the first time a comprehensive overview of the most important research and latest trends in EU energy law and policy It offers high quality original contributions that provide state of the art research in this rapidly evolving area situated in the broader context of international economic law and governance **Perspectives on Management Capacity Building** Beth Walter Honadle, Arnold M. Howitt, 1986-01-01 Perspectives on Management Capacity Building provides a lively spectrum of views on the problems and prospects of improving the management and performance of municipal governments in the United States Leading specialists in public administration probe the management needs of local governments and explore ways in which they can improve their capacity to manage Today state and local governments are caught in the transition between the expansionism of the post World War II years and the retrenchment era of the late seventies and eighties Improved management capacity has emerged as the most effective way for local governments to ride out the economic and political

pressures confronting them This book first investigates the meaning of the term management capacity It then considers how management needs have changed in the post war period and how these needs vary among large cities suburbs and rural communities Two of the contributions explore the organizational politics of management improvement while others look at the functional areas of computers and financial management The book also addresses human resource problems such as labor relations management development and training of municipal legislators and concludes with several viewpoints on federal efforts to improve local management capacity
