Pests Bethany Brookshire, 2022-12-06 An engrossing and revealing study of why we deem certain animals pests and others not from cats to rats elephants to pigeons and what this tells us about our own perceptions beliefs and actions as well as our place in the natural world A squirrel in the garden A rat in the wall A pigeon on the street Humans have spent so much of our history drawing a hard line between human spaces and wild places When animals pop up where we don't expect or want them we respond with fear rage or simple annoyance It is no longer an animal It is a pest At the intersection of science history and narrative journalism Pests is not a simple call to look closer at our urban ecosystem It is not a natural history of the animals we hate Instead this book is about us It is about what calling an animal a pest says about people how we live and what we want It is a story about human nature and how we categorize the animals in our midst

including bears and coyotes sparrows and snakes Pet or pest In many cases it s entirely a question of perspective Bethany Brookshire s deeply researched and entirely entertaining book will show readers what there is to venerate in vermin and help them appreciate how these animals have clawed their way to success as we did everything we could to ensure their failure In the process we will learn how the pests that annoy us tell us far more about humanity than they do about the animals themselves
