Materson, 2018-09-04 From the first European encounters with Native American women to today's crisis of sexual assault The Oxford Handbook of American Women's and Gender History boldly interprets the diverse history of women and how ideas about gender shaped their access to political and cultural power in North America Over twenty nine chapters this handbook illustrates how women's and gender history can shape how we view the past looking at how gender influenced people's lives as they participated in migration colonialism trade warfare artistic production and community building Theoretically cutting edge each chapter is alive with colorful historical characters from young Chicanas transforming urban culture to free women of color forging abolitionist doctrines Asian migrant women defending the legitimacy of their marriages and transwomen fleeing incarceration Together their lives constitute the history of a continent Leading scholars across multiple generations demonstrate the power of innovative research to excavate a history hidden in plain sight Scrutinizing silences in the historical record from the inattention to enslaved women's opinions to the suppression of Indian women's involvement in border diplomacy the authors challenge the nature of historical evidence and remap what counts in our interpretation of the past Together and separately these essays offer readers a deep understanding of the variety and centrality of women's lives to all dimensions of the American past even as they show that the boundaries of women American and history have shifted across the centuries

Mechanisms of Immigration Control Grete

Brochmann,Tomas Hammar,2020-06-03 Perhaps the most vexing question facing Europe today is what to do about asylum seekers and people in search of work who arrive daily some escaping nations where poverty and persecution are for them facts of life Given its costs both human and economic immigration policy has understandably become a highly politicized issue With the abolition of internal borders within the EU new controls are needed to stop immigration and to prevent non citizens from working illegally New external policies are being used such as early warning systems and visa controls with the long term aim of reducing emigration from poor and war ridden nations Europe has also intensified its control of internal aliens But there are limits to how tight a control can be made without violating the norms and values of the democratic state where human rights should be valid for citizens and non citizens alike However free immigration is not in the interests of the European states It might undermine labour and housing markets make planning impossible and alter the preconditions for welfare states This timely book addresses the politics and mechanisms of immigration control in Europe in an effort to unravel its complexities and propose sensible solutions It covers recent events including racist and populist party politics as well as changes in the international setting such as the development within the European Union and Schengen and the recent refugee crisis in the former Yugoslavia It will be essential reading for anyone interested in immigration studies European politics international relations anthropology and sociology

Gun Control and the Constitution Robert J.

Cottrol,2023-06-14 First Published in 1993 This volume is a collection of legal and historical material of the second amendment that includes court cases and decisions law review articles and gives a balanced view of both sides of the debate

Birth Control United States. Congress. Senate. Committee on the Judiciary,1934 Considers legislation to repeal the prohibition on the mailing or shipment of birth control information and contraceptive devices by or to physicians druggists and medical institutions

Crimmigration under International Protection Rottem Rosenberg-Rubins,2023-03-23 By exploring crimmigration at its intersection with international refugee law this book exposes crimmigration as a system focused on the governance of territorially present migrants which internalizes the impracticability of removal and replaces expulsion with domestic policing The convergence of criminal law and immigration law known as crimmigration has become perhaps the paradigmatic model for governing migration in the age of globalization This book offers a unique way of understanding crimmigration as a system of governmentality the primary target of which is the population its principal form of knowledge being political economy and its essential mechanism being the apparatus of security It does so by characterizing a particular model of crimmigration termed crimmigration under international protection which targets refugees and asylum seekers who are principally undeportable under international law The book draws on comparative

research of such models implemented worldwide combined with a detailed case study of the immigration detention system instigated in Israel for coping with asylum seekers specifically and exclusively These models demonstrate that at its core crimmigration is not a system of outright social exclusion focused on the expulsion of undesirable migrants but rather one focused on the management classification and policing of domestic populations It is argued that under crimmigration regimes criminal law becomes instrumental in the facilitation of gradual assimilation by shifting immigration enforcement from the margins of the state to the daily supervision of territorially present migrants The book illustrates this point by focusing on three main themes crimmigration as domestication crimmigration as civic stratification and crimmigration as a mechanism coined by Foucault as the apparatus of security and by Deleuze as the society of control By exploring these themes the book offers a comprehensive framework for understanding the rise of crimmigration and the particular ways in which it targets resident migrants The book will be of interest to researchers and academics working in the areas of criminal law and criminology immigration law citizenship studies globalization studies border studies and critical refugee studies

Modes of Migration Regulation and Control in Europe Jeroen Doomernik, Michael Jandl, 2025-10-01 In Europe immigration is a politically burning issue especially when it comes to the arrival of asylum seekers and illegal labour migrants Governments want to keep them under control in order to limit their numbers Yet traditionally there were strong differences between European states in the extent to which they sought to do so and the instruments employed to that end Currently the contours become visible of a common approach towards notably irregular migration This becomes clear from the country studies comprising this volume
