Population and world politics M. Leroy, 2012-12-06

The Politics of the Final Hundred Years of Humanity (2030-2130) Ian Cook, 2020-02-04 This book is the first book that looks at both the politics of

maintaining the trajectory toward humanity's final hundred years and the politics of those final hundred years. It is the first book to take up theoretical and practical aspects with respect to both the movement toward and events during these final hundred years. As a result, it is the first book that attempts to provide a more complete picture of the politics of catastrophic human-caused environment change. The fact that the book provides a way into the variety of policy problems that catastrophic human-caused environment change is creating means that it is also important to those in Public Policy. The book also raises a series of philosophical and ethical questions associated with human rights, which are significant to those who study Political Philosophy and some of those who study Law, international action to mitigate the effects of climate change, the nature of science, and the limitations of political institutions.

The Politics of Reproduction Katherine Paugh, 2017-04-21

Many British politicians, planters, and doctors attempted to exploit the fertility of Afro-Caribbean women's bodies in order to ensure the economic success of the British Empire during the age of abolition. Abolitionist reformers hoped that a homegrown labor force would end the need for the Atlantic slave trade. By establishing the ubiquity of visions of fertility and subsequent economic growth during this time, *The Politics of Reproduction* sheds fresh light on the oft-debated question of whether abolitionism was understood by contemporaries as economically beneficial to the plantation colonies. At the same time, Katherine Paugh makes novel assertions about the importance of Britain's Caribbean colonies in the emergence of population as a political problem. The need to manipulate the labor market on Caribbean plantations led to the creation of new governmental strategies for managing sex and childbearing, such as centralized nurseries, discouragement of extended breastfeeding, and financial incentives for childbearing that have become commonplace in our modern world. While assessing the politics of reproduction in the British Empire and its Caribbean colonies in relationship to major political events such as the Haitian Revolution, the study also focuses in on the island of Barbados. The remarkable story of an enslaved midwife and her family illustrates how plantation management policies designed to promote fertility affected Afro-Caribbean women during the late eighteenth and early nineteenth centuries. *The Politics of Reproduction* draws on a wide variety of sources, including debates in the British Parliament and the Barbados House of Assembly, the records of Barbadian plantations, tracts about plantation management published by doctors and plantation owners, and missionary records related to the island of Barbados.

Environmental Politics in the International Arena Sheldon Kamieniecki, 1993-01-01. The environmental movement is having a marked impact on national and international politics. This book examines the dominant ethics, attitudes, and moral values behind the international environmental movement and analyzes how it has influenced national policies around the world. In addition, it assesses the effectiveness of international law and international organizations in improving natural resource conservation.

Political Demography Jack A. Goldstone, Eric P. Kaufmann, Monica Duffy Toft, 2012-08-16. The field of political demography, the politics of population change, is dramatically underrepresented in political science. At a time when demographic changes—aging in the rich world, youth bulges in the developing world, ethnic and religious shifts

migration and urbanization are waxing as never before this neglect is especially glaring and starkly contrasts with the enormous interest coming from policymakers and the media Ten years ago demography was hardly on the radar screen remarks Richard Jackson and Neil Howe of the Center for Strategic and International Studies two contributors to this volume Today they continue it dominates almost any discussion of America s long term fiscal economic or foreign policy direction Demography is the most predictable of the social sciences children born in the last five years will be the new workers voters soldiers and potential insurgents of 2025 and the political elites of the 2050s Whether in the West or the developing world political scientists urgently need to understand the tectonics of demography in order to grasp the full context of today s political developments This book begins to fill the gap from a global and historical perspective and with the hope that scholars and policymakers will take its insights on board to develop enlightened policies for our collective future

Politics and Planning in the Holy City Gedalia Auerbach,Ira Sharkansky,2011-12-31 Jerusalem is not just another city that illustrates the conflict between interests of professional planners and competing political perspectives It is the Holy City with a history of some 3 000 years Moreover numerous layers of historical remains have importance for intense and competitive religious and national interests Israelis claim it as the capital of their country and Palestinians want it or part of it as the capital of their not yet created state Jerusalem is also a place where more than 700 000 people live and the center of a metropolitan area with more than twice that number Along with religious and national interests there are the customary conflicts between what various groups property developers politicians professional planners neighborhood residents and environmental activists want to do with the land *Politics and Planning in the Holy City* describes and analyzes the tensions between politics and planning The authors tackle the economic social and political contexts that shape conflicts Such problems include deciding what should be called Jerusalem and difficulties surrounding the construction of a defense barrier to protect Israelis from Palestinian terrorists in the framework of a multicultural city where 30 to 40 percent of its residents are Palestinians There is dissent over locating rail lines to the city as some interests want them here there or nowhere and over building a light rail line within a city already crowded and beset with conflicting interests The creation of a football stadium is another venue for conflict as many religious Jews view sports as a threat to their way of life Issues include locating a site for housing new immigrants as few Jerusalemites want large numbers of newcomers in their neighborhoods and deciding which sites merit preservation in a city with many deserving candidates but severely limited resources This volume will attract urban specialists as well as those concerned with larger political issues

Tadeusz Kugler,2023-05-01 Demographic changes directly affect political and socioeconomic dynamics Whether they are the nationalities of migrating refugees the percentage of women in the workforce or aging as a phenomenon population decline age of marriage number of children or the resources of youth demographics can change the political dynamics of a country creating in some cases increased freedoms but also potentially causing conflict or civil war *Power to the Population* is a

comprehensive guide to predicting and evaluating different possible futures for humanity These differing scenarios are of particular importance to decision makers and Tadeusz Kugler focuses on the optimism of what can be created by and for the population The book investigates the dynamic relationship between political choices and changing populations Kugler explores how government policies seemingly focused on localized power and economic development profoundly shape the demographic makeup on local and global scales The demographic future of a population not only regarding numbers but also in its diversity and how historically marginalized communities are undermined is not merely about one place time or people Demography has the potential to change the economic and political future of the world **The Political Geographies of**

Pregnancy Laura R. Woliver, 2010-10-01 A searing study of how modern reproductive politics shapes women's bodily agency Pregnancy indisputably takes place within a woman's body But as reproductive power finds its way into the hands of medical professionals lobbyists and policymakers the geographies of pregnancy are shifting and the boundaries need to be redrawn argues Laura R Woliver The Political Geographies of Pregnancy is a vigorous analysis of the ways modern reproductive politics are shaped by long standing debates on abortion and adoption surrogacy arrangements new reproductive technologies medical surveillance and the mapping of the human genome Across a politically charged backdrop of reproductive issues Woliver exposes strategies that claim to uphold the best interests of children families and women but in reality complicate women's struggles to have control over their own bodies Utilizing feminist standpoint theory and promoting a feminist ethic of care Woliver looks at abortion politics modern adoption laws that cater to male headed families regulations that allow the state to monitor pregnant women but not always provide care for them and the power structures behind the seemingly benign world of egg selling and surrogate parenting She also considers the potentially staggering political implications of mapping the human genome and the exclusion of women's perspectives in discussions about legislation and advancements in reproductive technologies Human Population and the Environmental Crisis Ben

Zuckerman, David Jefferson, 1996 Discusses environmental problems policies ethical and scientific concerns arising from the impact of overpopulation on our planet The Law and Politics of Unconstitutional Constitutional Amendments in Asia Rehan Abeyratne, Ngoc Son Bui, 2021-11-29 This book explains how the idea and practice of UCA are shaped by and inform constitutional politics through various social and political actors and in both formal and informal amendment processes across Asia This is the first book length study of the law and politics of unconstitutional constitutional amendments in Asia Comprising ten case studies from across the continent and four broader theoretical chapters the volume provides an interdisciplinary comparative perspective on the rising phenomenon of unconstitutional constitutional amendments UCA across a range of political legal and institutional contexts The volume breaks new ground by venturing beyond the courts to consider UCA not only as a judicial doctrine but also as a significant feature of political and intellectual discourse The book will be a valuable reference for law and political science researchers as well as for policymakers and NGOs working in

related fields Offering broad coverage of jurisdictions in East Asia Southeast Asia and South Asia it will be useful to scholars and practitioners within Asia as well as to those seeking to better understand the law and politics of the region Hearings, Reports and Prints of the Senate Committee on Government Operations United States. The rhetoric of armed social welfare has become prominent in military and counterinsurgency circuits with profound consequences for the meanings of democracy citizenship and humanitarianism in conflict zones By focusing on the border district of Kargil the site of India and Pakistan s fourth war in 1999 this book analyses how humanitarian policies of healing and heart warfare infused the logic of democracy and militarism in the post war period Compassion became a strategy to contain political dissension regulate citizenship and normalize the extensive militarization of Kargil s social and political order The book uses the power of ethnography to foreground people s complex subjectivities and the violence of compassion healing and sacrifice in India s disputed frontier state Based on extensive research in several sites across the region from border villages in Kargil to military bases and state offices in Ladakh and Kashmir this engaging book presents new material on military civil relations the securitization of democracy and development and the extensive militarization of everyday life and politics It is of interest to scholars working in diverse fields including political anthropology development and Asian Studies

The Rise of Political Intellectuals in Modern China Shakhar Rahav,2015-02-17 The May Fourth movement 1915 1923 is widely considered a watershed in the history of modern China This book is a social history of cultural and political radicals based in China s most important hinterland city at this pivotal time Wuhan Current narratives of May Fourth focus on the ideological development of intellectuals in the seaboard metropolises of Beijing and Shanghai And although scholars have pointed to the importance of the many cultural political societies of the period they have largely neglected to examine these associations seeing them only as seedbeds of Chinese communism and its leaders like Mao Zedong This book by contrast portrays the everyday life of May Fourth activists in Wuhan in cultural political societies founded by local teacher and journalist Yun Daiying 1895 1931 The book examines the ways by which radical politics developed in hinterland urban centers from there into a nation wide movement which ultimately provided the basis for the emergence of mass political parties namely the Nationalist Party Guomindang and the Chinese Communist Party CCP The book s focus on organizations everyday life and social networks provides a novel interpretation of where mechanisms of historical change are located The book also highlights the importance of print culture in the provinces It demonstrates how provincial print culture combined with small local organizations to create a political movement The vantage point of Wuhan demonstrates that May Fourth radicalism developed in a dialogue between the coastal metropolises of Beijing and Shanghai and hinterland urban centers The book therefore charts the way in which seeds of political change grew from individuals through local organizations into a nation wide movement and finally into mass party politics and subsequently revolution The book thus connects everyday

experiences of activists with the cultural political ferment which gave rise to both the Chinese Communist party and the Nationalist Party *The Oxford Handbook of Environmental Political Theory* Teena Gabrielson, Cheryl Hall, John M. Meyer, David Schlosberg, 2016-01-07 Set at the intersection of political theory and environmental politics yet with broad engagement across the environmental social sciences and humanities *The Oxford Handbook of Environmental Political Theory* defines illustrates and challenges the field of environmental political theory EPT Featuring contributions from distinguished political scientists working in this field this volume addresses canonical theorists and contemporary environmental problems with a diversity of theoretical approaches The initial volume focuses on EPT as a field of inquiry engaging both traditions of political thought and the academy In the second section the handbook explores conceptualizations of nature and the environment as well as the nature of political subjects communities and boundaries within our environments A third section addresses the values that motivate environmental theorists including justice responsibility rights limits and flourishing and the potential conflicts that can emerge within between and against these ideals The final section examines the primary structures that constrain or enable the achievement of environmental ends as well as theorizations of environmental movements citizenship and the potential for on going environmental action and change
