Principles of Mining Herbert C. Hoover, 2015-08-05 Excerpt from Principles of Mining Valuation Organization and Administration Copper Gold Lead Silver Tin and Zinc This volume is a condensation of a series of lectures delivered in part at Stanford and in part at Columbia Universities It is intended neither for those wholly ignorant of mining nor for those long experienced in the profession The bulk of the material presented is the common heritage of the profession and if any one may think there is insufficient reference to previous writers let him endeavor to find to whom the origin of our methods should be credited The science has grown by small contributions of experience since or before those unnamed Egyptian engineers whose works prove their knowledge of many fundamentals of mine engineering six thousand eight hundred years ago If I have contributed one sentence to the accumulated knowledge of a thousand generations of engineers or have thrown one new ray of light on the work I shall have done my share I therefore must acknowledge my obligations to all those who have gone before to all that has been written that I have read to those

engineers with whom I have been associated for many years and in particular to many friends for kindly reply to inquiry upon points herein discussed About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Principles of Mining** Herbert Clark Hoover, Herbert Hoover, 1909
