Prisons A Study Of Vulnerability:

Vulnerability and Incarceration Elizabeth Victor, 2019-07-09 In light of a history of exploitation by researchers most of the limited scholarship on prisoners in medical ethics is focused on precaution and protections Vulnerability and Incarceration Evaluating Protections for Prisoners in Research explores the best ways for researchers to balance these concerns with the rights of incarcerated persons to both participate in medical research and benefit from medical and scientific progress The book examines the historical and contemporary regulatory landscape governing prisoner participation in research and the concept of vulnerability in play when classifying prisoners as vulnerable Elizabeth Victor discusses how this concept might preclude a prisoner's positive right to participate in research from being acknowledged She also addresses the differences in oversight between public and private prisoners and how the shift to privatized prisons compounds the vulnerability of prisoners in the United States

Prisons, Punishment, and the Family Rachel Condry, Peter Scharff Smith, 2018 Every year millions of families are affected by the imprisonment of a family member Children of imprisoned parents alone can be counted in millions in the USA and in Europe It is a bewildering fact that while we have had prisons for centuries and the deprivation of liberty has been a central pillar in the Western mode of punishment since the early nineteenth century we have only relatively recently embarked upon a serious discussion of the severe effects of imprisonment for the families and relatives of offenders and the implications this has for society This book draws together some of the excellent research that addresses the impact of criminal justice and incarceration in particular upon the families of offenders It assembles examples of recent and ongoing studies from eight different countries in order to not only learn about the secondary effects and collateral consequences of imprisonment but also to understand what the experiences and lived realities of prisoners families means for the sociology of punishment and our broader understanding of criminal justice systems While punishment and society scholarship has gained significant ground in recent years it has often remained silent on the ways in which the families of prisoners are affected by our practices of punishment This book provides evidence of the importance of including families within this scholarship and explores themes of legitimacy citizenship human rights marginalization exclusion and inequality

Prison Violence Kimmet Edgar, Ian O'Donnell, Carol Martin, 2014-02-04 Prisons are dangerous places and assaults threats theft and verbal abuse are pervasive attributable both to the characteristics of the captive population and to an institutional sub culture which promotes violence as a means of resolving conflicts Yet the crimes perpetrated by prisoners on other prisoners have attracted little interest and criminological research has contributed little to an understanding of situations in which violence arises in penal institutions This book seeks to remedy this and to address and answer a number of key questions how do features of the prison social setting shape conflicts what social norms guide the decision to use violence what are the personal and social consequences of spending months or years in places where distrust and anxiety are normal how do staff respond to the dangers that are part of daily life in many prisons is it possible to identify

factors associated with risk and resilience and what methods of handling conflicts do prisoners use that could prevent violence Prison Violence adopts a distinctive approach to answering these questions and is based on extensive research including interviews with both victims and perpetrators of prison violence it pioneers a conflict centred approach seeking to understand the pathways into and out of situations where there is potential for violence focusing on interpersonal and institutional dynamics rather than on individual psychological factors
