Private Education in China Haitao Zhou, Qiang Liu, Jing Tian, Qian Li, 2018-08-13 This book takes an in depth look at the development of the private education sector in modern China Readers will find valuable data and materials never before presented in such an accessible and transparent way together with analyses of the major changes and challenges in the course of this development The book is organized both chronologically and by topic it employs a past present future order that unites the general arrangement at the same time each specific subject is approached historically not only to show the origins of the problem but also to link it with the historical comparative context in which the evaluation of alternative policy choices become highly viable Further the book provides a pioneering account of current problems adopting a fresh perspective to address the most important aspects of Chinese private education reform The elaboration on topics concerning private school assets property rights legal personality school operators entrepreneurship benefits and investment returns school autonomy and the development of teachers and students is both empirically rich and highly insightful The book s content is chiefly derived from years of fieldwork in private schools and from extensive interviews with hundreds of policy makers school operators managers teachers and students Since these people are self conscious about themselves as the actors in and witnesses to the development of Chinese private education over the past three decades the book places great emphasis on neutrality allowing the private education landscape to unfold in the context of the privatization of the socialist system after 1978 The book offers an essential guide for anyone who wishes to understand the transformation of Chinese education It is highly recommendable as a detailed introduction to Chinese education or as a resource for comparative research on private education from an international perspective

Property Ownership and Private Higher Education in China Spring Su, 2011-05-13 Recent decades have witnessed the proliferation in China of huge numbers of private universities and colleges in response to a wide ranging spectrum of socio economic and political demands under the country s flourishing market economy and its wholesale pursuit of decentralization This book explores the issue of property ownership an area which is regarded as an essential element in the attraction into the sector of local private institutions and foreign partnerships as well as in facilitating the future development of the country s existing institutions The focus throughout this book is primarily on the legal economic managerial and financial aspects of the relevant issues as well as other related topics such as consumer protections and fund raising activities A feasibility analysis and discussion is also provided on for profit universities and their potential market

niches in China in recognition of the fact that the current regulations which allow private universities to maintain a non profit status whilst actually enjoying profit returns clearly provides some legitimacy to the phenomenon of for profit in disguise It is argued in this book that such quasi profit regulations may further exacerbate profiteering behavior whilst it is also noted that in the short term there is a clear need to provide adequate protections within the apparent hybrid version of an ownership system a system characterized by a mix of capitalism and socialism through the adoption of a definitive legal framework within which economic actors can coordinate their efforts through a mutually understood framework of action Finally it is clear that in the transition from the rule of the people to the rule of law legislation practices and compliance do not always go hand in hand in China thus the healthy development of the educational sector will undoubtedly require some time as well as the introduction of complementary mechanisms for such legislation to be fully enforced in practice This book concludes
