Decision and Intelligence Igor. Aleksander,1987-06-30 **Decision and Intelligence** Aleksander Farreny,2013-03-09 *Decision and Intelligence* Igor. Aleksander,2013-03-09 Applied mechanics reviews ,1948 *Developments Of Artificial Intelligence Technologies In Computation And Robotics - Proceedings Of The 14th International Flins Conference (Flins 2020)* Zhong Li,Chunrong Yuan,Jie Lu,Etienne E Kerre,2020-08-04 FLINS an acronym introduced in 1994 and originally for Fuzzy Logic and Intelligent Technologies in Nuclear Science is now extended into a well established international research forum to advance the foundations and applications of computational intelligence for applied research in general and for complex engineering and decision support systems The principal mission of FLINS is bridging the gap between machine intelligence and real complex systems via joint research between universities and international research institutions encouraging interdisciplinary research and bringing multidiscipline researchers together FLINS 2020 is the fourteenth in a series of conferences on computational intelligence systems *Robot Intelligence Technology and Applications* Jong-Hwan Kim,Hyung Myung,Seung-Mok Lee,2019-04-12 This book constitutes revised selected papers from the 6th International Conference on Robot Intelligence Technology and Applications RiTA 2018 held in Putrajaya Malaysia in December 2018 The 20 full papers presented in this volume were carefully reviewed and selected from 80 submissions The papers present studies on machine learning optimization modelling and simulation path planning neural networks landmark recognition and reinforcement learning *Robot Intelligence Technology and Applications 4* Jong-Hwan Kim,Fakhri Karray,Jun Jo,Peter Sincak,Hyun Myung,2016-07-08 This book covers all aspects of robot intelligence from perception at sensor level and reasoning at cognitive level to behavior planning at execution level for each low level segment of the machine It also presents the technologies for cognitive reasoning social interaction with humans behavior generation ability to cooperate with other robots ambience awareness and an artificial genome that can be passed on to other robots These technologies are to materialize cognitive intelligence social intelligence behavioral intelligence collective intelligence ambient intelligence and genetic intelligence The book aims at serving researchers and practitioners with a timely dissemination of the recent progress on robot intelligence technology and its applications based on a collection of papers presented at the 4th International Conference on Robot Intelligence Technology and Applications RiTA held in Bucheon Korea December 14 16 2015 For better readability this edition has the total of 49 articles grouped into 3 chapters Chapter I Ambient Behavioral Cognitive Collective and Social Robot Intelligence Chapter II Computational Intelligence and Intelligent Design for Advanced Robotics Chapter III Applications of Robot Intelligence Technology **Machine Intelligence A.** Gomersall,2013-03-14 In 1981 Robotics Bibliography was published containing over 1 800 references on industrial robot research and development culled from the scientific literature over the previous 12 years It was felt that sensors for use with industrial robots merited a section and accordingly just over 200 papers were included It is a sign of the increased research

into sensors in production engineering that this bibliography on both the contact and non contact forms has appeared less than three years after that first comprehensive collection of references appeared In a review in 1975 Professor Warnecke of IPA Stuttgart drew attention to the lack of sensors for touch and vision Since then research workers in various companies universities and national laboratories in the USA the UK Italy Germany and Japan have concentrated on improving sensor capabilities particularly utilising vision artificial intelligence and pattern recognition principles As a result many research projects are on the brink of commercial exploitation and development This bibliography brings together the documentation on that research and development highlighting the advances made in vision systems but not neglecting the development of tactile sensors of various types No bibliography can ever be comprehensive but significant contributions from research workers and production engineers from the major industrialised countries over the last 12 years have been included

EU Policy and Legal Framework for Artificial Intelligence, Robotics and Related Technologies - The AI Act Nikos Th.

Nikolinakos, 2023-07-06 Artificial Intelligence AI can benefit our society and economy but also brings with it new challenges and raises legal and ethical questions According to the author of this comprehensive analysis it is imperative to ensure that AI is developed and applied in an appropriate legal and regulatory framework that promotes innovation and investment and at the same time addresses the risks associated with certain uses of AI related technologies Essential to understanding the relationship between policy and law this book traces the evolution of EU policy on artificial intelligence and robotics focusing in particular on the EU's ethical framework for AI which defines trust as a prerequisite for ensuring a human centric approach The main part of the book provides a thorough and systematic analysis of the Commission's 2021 proposed AI Act which establishes harmonised rules for the development placement on the market and use of AI systems in the EU The author painstakingly compares the Commission's proposed AI Act with the numerous compromise proposals of the Council of the European Union leading to the final version of the Council's AI Act general approach and its formal adoption on 6 December 2022 The author also examines with extraordinary detail the amendments proposed by the relevant committees and political groups of the European Parliament revealing the position the Parliament is likely to adopt in the forthcoming negotiations with the Commission and the Council on the text of the AI Act Numerous legislative and policy documents are presented in detail while the analysis also considers the comments made by all interested parties e.g. the European Commission Council of the European Union European Parliament governmental organisations national competent authorities and stakeholders actors with different conflicting interests such as corporations business and consumer associations civil society and other non profit organisations In the course of its in depth analysis this book will provide readers with crucial insight into the reasons behind the European Institutions different approaches and the often contradictory interests of stakeholders Because the policy arguments are carefully balanced and drafted with scrupulous care this volume will establish itself as a reference resource to be consulted for years to come
