Edinburgh EH9 3HJ Scotland U K IAU Symposium No 161 on Astronomy from Wide Field Imaging held in Potsdam Germany  
during 23 27th August 1993 was the first conference organised by the recently formed Working Group of IAU Commission 9  
on Wide Field Imaging This Working Group was instigated during the XXIst meeting of the General Assembly of the  
International Astronomical Union in Buenos Aires in 1991 and represented a merging of the former formal IAU Working  
Group on Astronomical Photography and the informal Digitised Optical Sky Surveys Working Group Dr Richard West was  
invited to be Chairperson and hence was given the daunting task of organising the Group from scratch The very fact that the  
first conference after only two years was a major IAU Symposium says much about the determination and enthusiasm of  
Richard West to fulfilling the aims of the new Working Group The siting of the conference in Potsdam in formerly East  
Germany provided an excellent opportunity to advantage from the political changes in Eastern Europe Good access to the  
meeting was possible by scientists from Eastern European countries allowing exchange of information on the very important  
Wide Field facilities in both East and West information on the rich archives of photographic plates that exist in both East and  
West and allowing discussions between scientists facing very similar problems in both East and West      Asteroids, Comets,  
Meteors 1993 A. Milani,Mario Badiale,A. Cellino,2012-12-06 THE MEETING The IAU Symposium 160 ASTEROIDS COMETS  
METEORS 1999 has been held at Villa Carlotta in Belgirate on the shore of Lago Maggiore Italy from June 14 to June 18 1993  
It has been organized by the Astronomical Observatory of Torino and by the Lunar and Planetary Institute of Houston It has  
been a very large meeting with 323 registered participants from 38 countries The scientific program included 29 invited  
reviews 106 oral communications and 215 posters The subjects covered included all the aspects of the studies of the minor  
bodies of the solar system including asteroids comets meteors meteorites interplanetary dust with special focus on the  
interrelationships between these The meeting was structured as follows 5 morning plenary sessions have been devoted to  
invited reviews on 1 search programs 2 populations of small bodies 3 dynamics 4 physical observations and modelling 5  
origin and evolution Two afternoon plenary sessions have been devoted to space missions to small bodies and to  
interrelationships between the different populations The afternoon parallel sessions have been devoted to dynamics of  
comets Toutatis Ida Gaspra physical processes in cometary comae and tails meteorites the cosmogonic message from

Restaino, William Junor, Nebojsa Duric, 1999 **The Stellar Populations of Galaxies** B. Barbuy, Alvio Renzini, 2012-12-06 One approach to learning about stellar populations is to study them at three different levels of resolution First in our own Galaxy secondly from nearby galaxies where stars can still be resolved and thirdly in remote galaxies in which the stellar population can only be studied in integrated light This IAU Symposium covered the entire range of galaxies in its study of their stellar populations Interspersed with theoretical papers the wealth of observational results provides an important state of the art presentation of the progress that has been made in this field Galactic Bulges Herwig Dejonghe, Harm J. Habing, 2012-12-06 In the early summer of 89 a very informal meeting on the bulge of our Galaxy was held in Leiden During that meeting Michael Rich proposed to hold a more properly organised symposium on Galactic Bulges in a few years time After some discussion a Scientific Organising Committee was founded and after some manoeuvring a chairman was chosen a local organiser was assigned and two editors were given instructions A good thing about the location of the meeting was that Ghent is a very beautiful city and had never before hosted an IAU symposium It could be that this plus the fact that he is a very keen amateur astronomer led H M the King of Belgium to offer his patronage to the meeting an offer that we gratefully and we hope gracefully accepted The meeting took place at a resort some 15 km outside Ghent Most participants were housed on the premises a very convenient situation This feeling of togetherness made up for the small shortcomings of the lecture room which is normally used as a sports hall The weather was fair except on the day of the barbecue when pouring rain forced us to go inside Index of Conference Proceedings British Library.
