Science & Technology in Fact and Fiction DayAnn M. Kennedy, Stella S. Spangler, Mary Ann Vanderwerf, 1990 Grade level 8 9 10 11 12 i s *Augmentation of Brain Function: Facts, Fiction and Controversy* Mikhail Lebedev, Ioan Opris, Manuel F. Casanova, 2018-09-14 Volume I entitled *Augmentation of Brain Functions* Brain Machine Interfaces is a collection of articles on neuroprosthetic technologies that utilize brain machine interfaces BMIs BMIs strive to augment the brain by linking neural activity recorded invasively or noninvasively to external devices such as arm prostheses exoskeletons that enable bipedal walking means of communication and technologies that augment attention In addition to many practical applications BMIs provide useful research tools for basic science Several articles cover challenges and controversies in this rapidly developing field such as ways to improve information transfer rate BMIs can be applied to the awake state of the brain and to the sleep state as well BMIs can augment action planning and decision making Importantly BMI operations evoke brain plasticity which can have long lasting effects Advanced neural decoding algorithms that utilize optimal feedback controllers are key to the BMI performance BMI approach can be combined with the other augmentation methods such systems are called hybrid BMIs Overall it appears that BMI will lead to many powerful and practical brain augmenting technologies in the future **Aliens, Robots & Virtual Reality Idols in the Science Fiction of H. P. Lovecraft, Isaac Asimov and William Gibson** John L. Steadman, 2020-10-30 Steadman's comprehensive guide wrestles with the concept of the alien applying cutting edge theoretical and philosophical ideas to the work of some of the greats of Science Fiction to arrive at a set of exciting new discoveries about what the genre says it means to be human Reading *Aliens Robots and Virtual Reality Idols* guarantees that you will never look at the writing of Lovecraft Asimov or Gibson in the same way again Dr David Simmons Senior Lecturer in English and Screen Studies University of Northampton H P Lovecraft's aliens are extra terrestrial terrestrial trans dimensional entities totally unlike any other aliens in science fiction literature In contrast Isaac Asimov's and William Gibson's aliens are human created positronic robots and virtual reality constructs or idols Lovecraft's great theme is alien indifferentism tinged with a malevolence that escalates into an existential apocalyptic threat against humankind while for Asimov and Gibson alien inclusionism is the norm The robots and the VR idols integrate into society and their influence appears to be beneficial But this is only on the surface In this book John L Steadman demonstrates that there is ultimately little difference between alien indifferentism and alien inclusionism in the fictional works of these three great writers For in fact the robots and the VR idols evolve into monsters whose actions bring about outcomes which are every bit as terrifying as anything in Lovecraft's work Humans tend to be isolates alien ated The reader is invited to question this and to consider the possibility that an alien perspective or platform might perhaps be crucial if we intend on seeing ourselves clearly and understanding exactly what it means to be human **Robots That Kill** Judith A. Markowitz, 2019-04-11 This book describes real world killer robots using a blend of perspectives Overviews of technologies such as autonomy and

artificial intelligence demonstrate how science enables these robots to be effective killers Incisive analyses of social controversies swirling around the design and use of killer robots reveal that science alone will not govern their future Among those disputes is whether fully autonomous robotic weapons should be banned Examinations of killers from the golem to Frankenstein's monster reveal that artificially created beings like them are precursors of real 21st century killer robots This book laces the death and destruction caused by all these killers with science and humor The seamless combination of these elements produces a deeper and richer understanding of the robots around us *An Anthropology of Robots and AI*

Kathleen Richardson, 2015-02-11 This book explores the making of robots in labs at the Massachusetts Institute of Technology MIT It examines the cultural ideas that go into the making of robots and the role of fiction in co constructing the technological practices of the robotic scientists The book engages with debates in anthropological theorizing regarding the way that robots are reimagined as intelligent autonomous and social and weaved into lived social realities Richardson charts the move away from the worker robot of the 1920s to the social one of the 2000s as robots are reimagined as companions friends and therapeutic agents

Apocalyptic AI: Visions of Heaven in Robotics, Artificial Intelligence, and Virtual Reality Robert M. Geraci, 2010-02-05 Apocalyptic AI the hope that we might one day upload our minds into machines or cyberspace and live forever is a surprisingly wide spread and influential idea affecting everything from the world view of online gamers to government research funding and philosophical thought In Apocalyptic AI Robert Geraci offers the first serious account of this cyber theology and the people who promote it Drawing on interviews with roboticists and AI researchers and with devotees of the online game Second Life among others Geraci illuminates the ideas of such advocates of Apocalyptic AI as Hans Moravec and Ray Kurzweil He reveals that the rhetoric of Apocalyptic AI is strikingly similar to that of the apocalyptic traditions of Judaism and Christianity In both systems the believer is trapped in a dualistic universe and expects a resolution in which he or she will be translated to a transcendent new world and live forever in a glorified new body Equally important Geraci shows how this worldview shapes our culture Apocalyptic AI has become a powerful force in modern culture In this superb volume he shines a light on this belief system revealing what it is and how it is changing society

Robot Facts Kai Turing, AI, 2025-02-18 Robot Facts explores the fascinating and rapidly advancing world of robotics moving beyond science fiction to examine the real world impact of these technologies The book delves into how Artificial Intelligence AI empowers robots with crucial decision making and adaptability while also tracing the development of humanoid robots machines designed to seamlessly integrate into human environments Discover how robots are revolutionizing industries by performing complex or dangerous tasks with unparalleled precision and understand the historical context that has shaped modern robotics from ancient automatons to today's sophisticated machines The book presents a comprehensive overview starting with the fundamentals of robotics and then progressing through key areas like the role of AI in machine learning the design and applications of humanoid robots and the transformative impact of industrial

robots on various sectors It further examines the ethical considerations surrounding robot deployment including potential job displacement and biases in AI algorithms Robot Facts adopts a balanced approach providing empirical data expert interviews and interdisciplinary connections to cognitive science ethics and economics ensuring the reader gains a well rounded perspective on this transformative technology *Robots That Fight* Raymie Davis,2021-07-15 Fighting robots are not a new concept Ever since the toy Rock Em Sock Em Robots made its debut in 1964 children and adults have had fun controlling robots as they fight each other However advancements in robotic technology have turned this whimsical pastime into a major sporting event As the popularity of the TV show Battlebots makes clear people love to watch robots fight Full color photographs fact boxes and exciting sidebars help immerse readers in the world of fighting robots while a list of discussion questions challenges them to think more deeply about this high interest STEM topic When a Robot Decides to Die and Other Stories Francisco García González,2021-11-15 A manufactured and pre programmed serial killer a suicidal robot a romantic necrophiliac and an archaeologist who feeds the perverse desires of aficionados of the apocalypse Francisco García González's stories map out literary and metafictional approaches to the sci fi universe in ways that echo the humor and violence of Miguel de Cervantes Mar a de Zayas Jorge Luis Borges Rosa Montero and Roberto Bola o With a scholarly introduction by translator Bradley J Nelson that introduces García González's oeuvre to contemporary readers and scholars of Spanish language literature this science fiction collection introduces Anglophones to this unique author García González turns a black mirror on contemporary society and its relation both to history and to the future His insightfulness and relevance draw comparisons with Margaret Atwood Neal Stephenson and China Mi ville though his verbal economy and elegance are more akin to Cormac McCarthy producing both disturbingly uncanny violence and unexpected comedy **Digital Media and Innovation** Richard A. Socially Intelligent Agents Kerstin Dautenhahn, Alan H. Bond, Lola Canamero, Bruce Edmonds, 2006-04-11 Socially situated planning provides one mechanism for improving the social awareness of agents Obviously this work is in the preliminary stages and many of the limitations and the relationship to other work could not be addressed in such a short chapter The chief limitation of course is the strong commitment to defining social reasoning solely at the meta level which restricts the subtlety of social behavior Nonetheless our experience in some real world military simulation applications suggest that the approach even in its preliminary state is adequate to model some social interactions and certainly extends the state of the art found in traditional training simulation systems Acknowledgments This research was funded by the Army Research Institute under contract TAPC ARI BR References 1 J Gratch Emile Marshalling passions in training and education In Proceedings of the Fourth International Conference on Autonomous Agents pages 325-332 New York 2000 ACM Press 2 J Gratch and R Hill Continuous planning and collaboration for command and control in joint synthetic battlespaces In Proceedings of the 8th Conference on Computer Generated Forces and Behavioral Representation Orlando FL 1999 3 B Grosz and S Kraus Collaborative plans for complex group action Artificial Intelligence 86 2 269-357 1996 4 A Ortony G L Clore and A Collins The Cognitive Structure of Emotions Cambridge University Press 1988 5 R W Pew and A S Mavor editors Modeling Human and Organizational Behavior
