

# How Stone Age Humans Made Hand Axes

1. The process started with a large piece of rock.

2. The humans roughly shaped the rock with a stone hammer.

3. Using a hammer made of wood, stone, or antler, they sharpened the edge.

4. They trimmed the edge by prying off tiny flakes with a pointed stick.

*Ancient Building Technology, Volume 3: Construction (2 Vols)* G.R.H. Wright, 2009-11-23 Building construction is the subject of this third part of the Ancient Building Technology set dealing with the history of building and building materials Beginning with the formulation of a project it goes on to discuss preliminary site surveying and setting out followed by building site development and its attendant installations and then examines the disposition of the various building materials in building construction from pre history to the end of antiquity

### **Ancient Building Technology, Vol. 2: Materials**

G.R.H. Wright, 2023-03-20 This summary study deals with building material which together with construction and structures forms one of the three aspects of building or equally one of the three factors which constitute the nature of a building Unlike existing manuals on ancient building this offers an analytic presentation and the subject matter extends across all ages and regions The treatment of materials is set out according to a paradigm of nature manufacture and use so as to facilitate direct comparison between different modes of the one material as also between different materials and between different building traditions This second part is published in two volumes the first containing texts the second more than 300 illustrations The print edition is available as a set of two volumes 9789004140073

### **The Bronze Age Towers at Bat, Sultanate of Oman**

Christopher P. Thornton, Charlotte M. Cable, Gregory L. Possehl, 2016-11-17 In the third millennium B C E the Oman Peninsula was the site of an important kingdom known in Akkadian texts as Magan which traded extensively with the Indus Civilization southern Iran the Persian Gulf states and southern Mesopotamia Excavations have been carried out in this region since the 1970s although the majority of studies have focused on mortuary monuments at the expense of settlement archaeology While domestic structures of the Bronze Age have been found and are the focus of current research at Bat most settlements dating from the third millennium B C E in Oman and the U A E are defined by the presence of large circular monuments made of mudbrick or stone that are traditionally called towers Whether these so called towers are defensive agricultural political or ritual structures has long been debated but very few comprehensive studies of these monuments have been attempted Between 2007 and 2012 the University of Pennsylvania Museum of Archaeology and Anthropology conducted excavations at the UNESCO World Heritage Site of Bat in the Sultanate of Oman under the direction of the late Gregory L. Possehl The focus of these years was on the monumental stone towers of the third millennium B C E looking at the when how and why of their construction through large scale excavation GIS aided survey and the application of radiocarbon dates This has been the most comprehensive study of nonmortuary Bronze Age monuments ever conducted on the Oman Peninsula and the results provide new insight into the formation and function of these impressive structures that surely formed the social and political nexus of Magan's kingdom

**Ancient Building Technology** George R. H. Wright, 2000 The wealth of excavation of ancient buildings in the past 50 years and the resulting flood of publications has created a demand for a survey of building practice in antiquity This two volume work deals with the techniques of setting together the fabric of ancient

buildings the manual and mechanical operations involved the materials tools and equipment used Ancient here means from very first beginnings origins to the end of Late Antiquity i e about 600 A D as manifested geographically in the Old World of Europe and the Middle East not sub Saharan Africa Further Asia the Far East or New World Building the product and the process is limited to architectural building and looks at the technology of civil engineering only where it introduces novelties Technology here means the system of techniques used in the process of building construction rather than the science or theory of building The 10 chapters of this first volume are intended to give a general perspective of animal building in the light of evolutionary biology then of building in the Palaeolithic Neolithic Mesopotamian Egyptian Levanto Aegean Achaemenid Greek Roman Late Antique Early Christian Byzantine Sassanian contexts with a weighting towards the lesser known prehistoric beginnings and late antique end The second volume will focus on the technical details materials of construction structural systems principles of construction and forms of construction

**Technology and Urbanism in Late Bronze Age Egypt** Anna K. Hodgkinson, 2018 This study examines the distribution of high status materials in addition to archaeological evidence of their production in the settlements known as royal cities during the New Kingdom in ancient Egypt c 1550 1069 BC The research focuses on the site sites of Amarna Gurob and Malqata but incorporates Qantir Pi Ramesse for comparison

**Stone Vessels and Values in the Bronze Age Mediterranean** Andrew Bevan,2007-08-13 The societies that developed in the eastern Mediterranean during the Bronze Age produced the most prolific and diverse range of stone vessel traditions known at any time or anywhere in the world Stone vessels are therefore a key class of artefact in the early history of this region As a form of archaeological evidence they offer important analytical advantages over other artefact types virtual indestructibility a wide range of functions and values huge variety in manufacturing traditions as well as the subtractive character of stone and its rich potential for geological provenancing In this 2007 book Andrew Bevan considers individual stone vessel industries in great detail He also offers a highly comparative and value led perspective on production consumption and exchange logics throughout the eastern Mediterranean over a period of two millennia during the Bronze Age ca 3000-1200 BC

Stone Vessels in the Levant RachaelThyrza Sparks,2017-07-05 Examining stone vessels in the Levant during the 2nd millennium BC the author explores the links between material culture and society through a comprehensive study of production and distribution Extensively illustrated with 100 drawings maps and charts this volume includes a full object catalogue This study represents the first comprehensive overview of the stone vessel assemblages of the Levant in this period a time which fed by an increase of wealth and interregional trade saw a growth in the popularity and variety of such vessels Previously our understanding of the varied functions and forms of these diverse vessels has been relatively underdeveloped In this volume the author attempts to address this problem by creating a typological framework

though which we can analyse variability and define essential characteristics of local stone vessel workshops Only once this has been achieved is it possible to look at stone vessel production in its wider cultural context Subsequent chapters explore broader themes beginning within the workshops themselves examining the links between craftsmen their sources of raw materials and the authorities that controlled and distributed their output Considerations of the geographical and chronological distribution of such goods are then used to provide a regional perspective for the operation of these workshops connections between them and further insights into the nature of local and international trade Finally the objects themselves can be used to assess the impact of trends such as the growing Egyptianization of the ruling classes of the Levant at this time
