that research seems to have been concentrated on the twin subjects of family and fertility. Certain areas are yet to be tapped and recorded but the bibliography by identifying what already exists points to areas where material is lacking.

Women's Education in the Third World David H. Kelly, Gail P. Kelly, 2017-05-18

Originally published in 1989, this detailed bibliography focuses on women's education in the developing nations of Asia, Africa, Latin America and the Caribbean and the Middle East. It contains annotations for about 1200 published works in English, French, Spanish, Portuguese and German. The entries include extensive research, journal, monograph and book literature items including chapters hidden in books that don't have women or education as their main theme. The citations are organised thematically but with geographic divisions within each of the 15 sections and each entry has a decently detailed summary. It is prefaced by a useful article written by Gail Kelly on the directions in research at the time and the development of women centric approaches.

Ideal for researching the status and activities of Third World women. For quick reliable coverage of women's issues in developing countries, here is a concise reference work written by a team of more than 80 international experts. The Encyclopedia comprises 68 essays that cover the entire Third World from Africa to Asia, from the Near East to South and Central America, from the South Pacific to the Caribbean. The women authors are acknowledged experts from Harvard University, the World Bank, the United Nations Development Fund for Women, the University of Nairobi, the International Labor Organization and other institutions who summarize the most recent scholarship on a wide range of important subjects. Thoroughly indexed and cross referenced, the Encyclopedia is an ideal starting point for in depth research in such areas as recent developments in the prevention of violence against women, the conditions of women's lives across regions and countries, women's participation in government, science and technology, hidden curriculum issues in higher education, an overview of women's experiences as small scale entrepreneurs. A feminist viewpoint enhances the coverage. Informed throughout by a feminist perspective, the Encyclopedia focuses on traditional women's concerns such as political participation, human rights, nutrition, housework, the family, equality, health and more. But the coverage also extends to such issues as domestic and sexual violence, creation of women friendly cities, patriarchal ideologies as religious beliefs, the needs of older women, new jobs and exploitation in industrial production, AIDS, the gender consequences of ecological devastation, movements for change and other areas of increasing awareness. Geographical entries cover all the major regions and countries and discuss conditions and issues in each area. Spotlights the newest and best sources. The Encyclopedia brings together information that has been widely scattered in sources from many disciplines. An introduction by the editor illuminates the most important issues faced by Third World women today and
