1 THE INTERNATIONAL CONTEXT In many countries there are recurring periods of national concern about the low standards of calculation skills shown by children in primary elementary schools Recently these concerns have become more urgent and more political with the publication of international comparisons of mathematical achievement first at secondary and more recently at primary level e g Lapointe Mead Mullis et al 1997

The Cambridge Primary Review Research Surveys Robin Alexander, Christine Doddington, John Gray, Linda Hargreaves, Ruth Kershner, 2012-08-06 The Cambridge Primary Review Research Surveys is the outcome of the Cambridge Primary Review England's biggest enquiry into primary education for over forty years Fully independent of government it was launched in 2006 to investigate the condition and future of primary education at a time of change and uncertainty and after two decades of almost uninterrupted reform Ranging over ten broad themes and drawing on a vast array of evidence the Review published thirty one interim reports including twenty eight surveys of published research provoking media headlines and public debate before presenting its final report and recommendations This book brings together the twenty eight research surveys specially commissioned from sixty five leading academics in the areas under scrutiny and now revised and updated to create what is probably the most comprehensive overview and evaluation of research in primary education yet published A particular feature is the prominence given to international and comparative perspectives With an introduction from Robin Alexander the Review's director the book is divided into eight sections

covering children's lives and voices school home and community children's development learning diversity and needs aims values and contexts for primary education the structure and content of primary education outcomes standards and assessment in primary education teaching in primary schools structures and processes teaching in primary schools training development and workforce reform policy frameworks governance funding reform and quality assurance The Cambridge Primary Review Research Surveys is an essential reference tool for professionals researchers students and policy makers working in the fields of early years primary and secondary education Teaching: Professionalisation, Development and Leadership David Johnson, Rupert Maclean, 2008-06-04 Harry Judge It is doubly fortunate that a foreword is not an introduction Since it is mercifully brief it should not be expected to mention respectfully each of the distinguished contributions which constitute the word before which it modestly stands as herald For the same reason it cannot be expected to constrain within one overarching framework contributions which are essentially varied in subject matter and method The brief of a foreword writer might indeed be compared to that of a musician commissioned to write an overture to an opera which he had not written To write such a piece for a volume devoted to Eric Hoyle is nevertheless a privilege as well as a pleasure Partly of course because this volume celebrates a long and distinguished career devoted to the application of intelligence and less assertively theory to the improvement of practice And partly because this abbreviated overture is privileged by being placed before a set of virtuoso performances throughout which consistent and coherent themes do insistently resonate Those themes are the very same that distinguish Eric Hoyle's own work **Improving Children's Learning** Joan Dean, 2003-09-02 How can teachers improve what they do in the primary classroom Which teaching methods will help you and your pupils to perform effectively These are the questions that every teacher will be asking him or herself in today's climate of targets and tables Much research over recent years has focused on the role of the teacher and how effective classroom practice is achieved The book discusses many areas of topical importance including teaching methods motivating learners and matching work to children how to structure children's learning classroom control and organisation teaching literacy teaching children with special education needs working with parents It also looks at the increasing role of the teacher as a researcher and how collaborative practices are providing a way for teachers to appraise both their own progress and that of their colleagues This book should be of particular interest to the classroom teacher who is looking for ways to develop his or her teaching but has limited time to explore the research It sets out to translate the findings of research into practical terms which teachers can easily use
