Institutions Federico Cosenz,2022-05-23 The fast changing evolutionary process of global Higher Education systems systematically poses new challenges related to the appearance of innovative elements that lead academic governing bodies to question current managerial structures and methods Due to this theory and practice have gathered multiple contributions and experiences to support and further develop this evolutionary pathway during the past decades Global competitiveness economic and social growth are driven worldwide by knowledge and innovation In this context Higher Education Institutions

play a crucial role as they primarily contribute to knowledge transfer and development and as a result foster regional development employment and economic wealth The relevance of this role leads Universities to explore alternative solutions for managing their performance according to a sustainable perspective This book draws on this flourishing debate on Higher Education policy and management and investigates an innovative systemic perspective to design and implement sustainable performance management systems for academic institutions The conditions for the success of Universities the critical issues underlying the creation of academic value the dynamic complexity characterizing academic governance settings the pluralistic audience of stakeholders and related expectations the causal interplays between organizational performance variables represent some of the central themes around which this work is developed More specifically the book suggests and discusses the adoption of a Dynamic Performance Management approach to frame the inherent organizational complexity of Higher Education Institutions thus supporting a strategic learning perspective to design and implement relevant performance measures This approach originates from the combination between conventional performance management and System Dynamics modeling Many research and practice contributions prove that this methodological combination can boost the understanding and interpretation of value creation processes by identifying and exploring the causal connections amongst strategic resource allocation and consumption corresponding performance drivers emerging outputs and outcomes To test the effectiveness of this approach in University settings a wide range of examples is offered in each book chapter This allows readers to explore the advantages limitations and practical implications of adopting Dynamic Performance Management in Higher Education Institutions as well as guide academic decision makers towards a more robust approach to design and implement strategic management mechanisms in Universities

The Collegial Tradition in the Age of Mass Higher Education Ted Tapper, David Palfreyman, 2010-07-20 Much of our writing reflects a long term commitment to the analysis of the collegial tradition in higher education This commitment is reflected most strongly in *Oxford and the Decline of the Collegiate Tradition* 2000 which we are pleased to say will reappear as a considerably revised second edition Oxford The Collegiate University Conflict Consensus and Continuity to be published by Springer in the near future To some extent this volume *The Collegial Tradition in the Age of Mass Higher Education* is a reaction to the charge that our work has been too narrowly focussed upon the Universities of Oxford and Cambridge Oxbridge Not surprisingly you would expect us to reject that critique while responding constructively to it The focus may be narrow and although the relative presence and more arguably the influence of Oxford and Cambridge may have declined in English higher education they remain important national universities Moreover as the plethora of so called world class higher education league tables would have us believe they also have a powerful international status This however is essentially a defensive response dependent upon the alleged reputations of the two universities This book is intent on making a more substantial argument To examine the collegial tradition in higher education means much more than presenting a nostalgic look at the past

The Enquiring University Rowland,

Stephen, 2006-10-01 What is the purpose of higher education How do teaching and research relate Are the intellectual purposes of higher education in need of restoration The Enquiring University explores the ways in which teaching research and learning are related to each other and to a wider social context one in which ideas about the nature of the university and knowledge are changing The book is readily accessible drawing upon insights that emerge from a wide range of disciplines Throughout the book Stephen Rowland develops a conception of enquiry which can play a central role in how we are to understand academic work It is a concept which values the academic tradition of a love for the subject while at the same time encouraging exploration across disciplinary and other cultural boundaries While such a notion of enquiry may seem to be under threat from many of the recent developments in higher education this book indicates ways in which the appropriate spaces can be opened up to enhance a spirit of enquiry amongst academic staff and their students The Enquiring University is key reading for university lecturers those studying for higher degrees in higher education and policy makers **Paths to a**

World-Class University Qi Wang, Ying Cheng, 2011-07-22 Within higher education world class universities are regarded as elite research universities and play a critical role in developing human resources and generating new knowledge in the context of a knowledge based economy Governments around the world have made the operation of their universities at the cutting edge of intellectual and scientific development their policy priority and top universities make every effort to compete at this global stage Paths to A World Class University provides insights into recent and ongoing experiences of building world class universities both at a national level and at an institutional level It collects fifteen essays most of which originated from papers presented at The Third International Conference on World Class Universities held in November 2009 in Shanghai China and organised by the Center for World Class Universities of Shanghai Jiao Tong University Divided into two parts the book focuses on the role of world class universities in national systems and looks at institutional experiences and lessons in building world class universities This book not only represents a contribution to the ongoing discussion on the topic of building world class universities but can be seen a continuation of the previous two volumes on this topic World Class Universities and Ranking Aiming beyond Status and The World Class University as Part of a New Higher Education Paradigm From Institutional Qualities to Systemic Excellence All three books will be useful reading for students and academics in higher education generally in addition to policy makers and informed practitioners **Teaching For Quality Learning At**

University Biggs, John, Tang, Catherine, 2011-09-01 A bestselling book for higher education teachers and administrators interested in assuring effective teaching *Artists in the University* Jenny Wilson, 2017-08-31 This book focuses on the relationship between the university and a particular cohort of academic staff those in visual and performing arts disciplines who joined the university sector in the 1990s It explores how artistic researchers have been accommodated in the Australian university management framework and the impact that this has had on their careers identities approaches to their practice and the final works that they produce The book provides the first analysis of this topic across the artistic disciplinary domain

in Australia and updates the findings of Australia's only comprehensive study of the position of research in the creative arts within the government funding policy setting reported in 1998 The Strand Report Using lived examples and a forensic approach to the research policy challenges it shows that while limited progress has been made in the acceptance of artistic research as legitimate research significant structural cultural and practical challenges continue to undermine relationships between universities and their artistic staff and affect the nature and quality of artistic work **Higher Education Management and Policy, Volume 17 Issue 3 Special Issue on Entrepreneurship** OECD, 2005-12-16 This special issue of Higher Education Management and Policy features seven articles on entrepreneurship in universities
