### **Habitat, Population Dynamics, and Metal Levels in Colonial Waterbirds** Joanna Burger, Michael

Gochfeld, 2016-07-06 This book is a result of the authors more than 40 years of study on the behavior populations and heavy metals in the colonial waterbirds nesting in Barnegat Bay and the nearby estuaries and bays in the Northeastern United States From Boston Harbor to the Chesapeake based on longitudinal studies of colonial waterbirds it provides a clear picture

**Biology of Marine Birds** E. A. Schreiber, Joanna Burger, 2001-08-16 Biology of Marine Birds provides the only complete summary of information about marine birds ever published It analyzes their breeding biology ecology taxonomy evolution fossil history physiology energetics and conservation The book covers four orders of marine birds in detail and includes two summary chapters that address the biology of shorebirds and wading birds and their lives in the marine environment Summary tables give detailed information on various aspects of their life histories breeding biology physiology and energetics and demography It provides a guide to ornithologists and students for research projects

**A Naturalist Along the Jersey Shore** Joanna Burger, 1996 Come for a journey along the Jersey shore with naturalist and ecologist Joanna Burger In these deeply felt closely observed personal essays Burger invokes the intertwined lives of naturalist and wild creatures at the ever changing edge of ocean and land Discover with her the delicate mating dances of fiddler crabs the dangers to piping plovers the swarming of fish communities into the bays and estuaries the trilling notes of Fowler's toads and the subtle green grays of salt marshes Joanna Burger knows the shore through all its seasons the first moment of spring when the herring gulls arrive on ice gouged salt marshes the end of spring when the great flocks of shorebirds come to feed on horseshoe crab eggs at Cape May the summer when the peregrine hunts its prey the fall when the migrations of hawks and monarch butterflies attract watchers from around the world and the depths of winter when a lone snowy owl sweeps across snow covered dunes and frozen bay This is a book that anyone who loves the Jersey shore will cherish And because so many of these wonderful creatures live all along the Atlantic coast it will be of equal interest to beach lovers naturalists bird watchers fishermen and coastal and marine scientists from North Carolina to Maine

**Behavioural Ecotoxicology** Giacomo Dell'Omo, 2002-05-22 Behavioural ecotoxicology is an emerging field dealing with the effects of environmental pollutants on the behaviour of animals Behavioural techniques derived from experimental psychology behavioural pharmacology and neurotoxicology are applied to detect and characterise changes in animals living in the environment exposed to various pollutants Behavioural effects are then interpreted in an ecological context considering the long term relevance of these changes at both the individual and population level

**Current Ornithology** Richard Johnston, 2012-12-06 Volume 5 of this series continues its coverage of currently active research fields in ornithology Because an editor can never be a disinterested observer of his or her own editorial efforts any claim for superiority of this volume is not without conflict of interest

Even so Volume 5 has certain merits that even a parent should acknowledge and I find the current chapters not merely timely and authoritative but compelling in their demand for a reader's attention Wolfgang and Roswitha Wiltschko provide a perceptive review of magnetic orientation in birds a piece dedicated to Fritz Merkel the pioneer in studies of magnetic orientation Sergei Kharitonov and Douglas Siegel Causey are concerned with the behavioral ecology of seabird coloniality emphasizing their field experiences in the USSR and the United States Ted Miller examines the application of studies of bird behavior to comparative biology pursuing the interface of behavior and evolutionary biology adumbrated by Konrad Lorenz in the 1930s Jeremy Raynor gives us a summary of the work over the past decade on bird flight which is not by turns as complex or as simple as we had formerly believed Carrol Henderson describes recent developments in nongame bird conservation based on his pioneering work in the State of Minnesota Alan Kamil discusses optimal experimental design for research in ornithology a field in which experimental work is frequently difficult to pursue

The Common Tern Joanna Burger, Michael Gochfield, Michael Gochfeld, 1991 For more than twenty years the authors studied the complex breeding and social behavior of colonies of terns A significant dynamic of their social behavior is their mobbing behavior when they aggressively defend their nests against predators and will attack intruders including human beings Analysis of this and other behaviors as they affect breeding and population provide fascinating insights in the study of birds

**Feminism and Evolutionary Biology** Patricia Gowaty, 2012-12-06 Standing at the intersection of evolutionary biology and feminist theory is a large audience interested in the questions one field raises for the other Have evolutionary biologists worked largely or strictly within a masculine paradigm seeing males as evolving and females as merely reacting passively or carried along with the tide Would our view of nature red in tooth in claw be different if women had played a larger role in the creation of evolutionary theory and through education in its transmission to younger generations Is there any such thing as a feminist science or feminist methodology For feminists does any kind of biological determinism undermine their contention that gender roles purely constructed not inherent in the human species Does the study of animals have anything to say to those preoccupied with the evolution and behavior of humans All these questions and many more are addressed by this book whose contributing authors include leading scholars in both feminism and evolutionary biology Bound to be controversial this book is addressed to evolutionary biologists and to feminists and to the large number of people interested in women s studies
