**Industrial Peace & Role of Trade Unions In India** Dr Bhim Singh,2014-01-01

The economic development of a country is largely dependent upon the industrial growth and development It is in this context that industrial peace acquires significance Disturbed and non conducive industrial environment proportionately affects the industrial growth adversely And therefore the relationship obtainable in any industry is a matter of great concern Industrial environment is the outcome of the interaction among the actors of industrial relations In this context trade union leaders become a very significant actor as the activities of their followers which build the industrial environment is the outcome of their actions Industrial peace has to be established by all means and that is the need of the hour This cannot be achieved without positive and constructive role of the trade union leaders Trade union leaders have been viewed by authors as agents of adversarialism and it has been pronounced that they cannot imagine themselves making common cause with capital or even recognise that they have shared interest Such impressions have been perceived by assessing the actions of their followers i e the workers It is also argued that the leaders are not at all sensitive about their social responsibilities The actions of workers or the followers of trade union leaders are directly proportional to the faith and confidence the followers have in their leaders It is therefore very apt to assess and gauge the impression carried by the followers about their leaders In the present scenario it is desirable that the leaders and their followers understand each other and their mutual relationship is harmonized to the maximum extent A leader must have the capability to get himself acquainted with the

developments taking place and communicate and direct his followers accordingly The followers desire that their leader should rise from the level of fairly good to the level of exceptionally good This maiden attempt of the author Dr Bhim Singh automatically gains significance and importance as he has been able to correlate the followers perceptions about leadership qualities desired by the followers and its linkage with creation of industrial peace INDUSTRIAL PEACE ROLE OF TRADE UNIONS IN INDIA by DR BHIM SINGH Authored by Dr Bhim Singh this book may focus on the concept of industrial peace and the role played by trade unions in India s labor landscape It is likely to explore the dynamics of labor relations and conflict resolution Key Aspects of the Book INDUSTRIAL PEACE ROLE OF TRADE UNIONS IN INDIA by DR BHIM SINGH Labor Relations The book may provide insights into the complexities of labor relations in India including challenges and opportunities Trade Unionism It likely discusses the historical and contemporary roles of trade unions in safeguarding workers rights and interests Conflict Resolution INDUSTRIAL PEACE ROLE OF TRADE UNIONS IN INDIA may address strategies for achieving industrial peace and harmony in the workplace Dr Bhim Singh is likely an author and scholar specializing in labor studies and industrial relations in India      Methods of Industrial Peace Nicholas Paine Gilman,1904

Towards Industrial Peace League of Nations Union,1927      **Manufacturing Knowledge** Richard Gillespie,1993-05-28  
What motivates workers to work harder What can management do to create a contented and productive workforce  
Discussion of these questions would be incomplete without reference to the Hawthorne experiments one of the most famous pieces of research ever conducted in the social and behavioral sciences Drawing on the original records of the experiments and the personal papers of the researchers Richard Gillespie has reconstructed the intellectual and political dynamics of the experiments as they evolved from the tentative experimentation to seemingly authoritative publications Manufacturing Knowledge raises fundamental questions about the nature of scientific knowledge and about the assumptions and evidence that underlay debates on worker productivity      *The Changing of Organizational Behavior Patterns* Paul R. Lawrence,1991-01-01 Many companies today are either undergoing drastic organizational changes or are faced with the prospect of having to make these changes in the near future The need for change may arise from internal sources growth in the size of the company the problem of aging or more frequently from external sources changes in the nature of markets in the technology of the industry or even cultural beliefs about the proper rewards of work and behavior for employers and employees This book is concerned with the process of change by which organizations achieve their purposes and meet the needs of their individual and group contributors Lawrence s study is centered on a medium sized supermarket chain in which several important management functions were being shifted from the home office to newly created store managers The origin and reasoning behind these organizational changes the methods of introducing them the process of shifting the roles of key individuals and the consequences of the changes are considered in detail The author s inquiry proceeds from four essential research questions What is the nature of the basic behavior patterns in this organization What are the key factors

involved in changing those patterns Did significant measurement change occur If so how was it accomplished This volume first published in 1958 broke new ground in devising techniques to measure changes in behavior patterns of individuals in focusing attention on the behavior patterns of individuals at the management levels of an organization and in clarifying the stubborn facts of human behavior involved in changing administrative patterns The book will be of continuing interest to managers and administrators concerned with making key changes in customary supervisory practices and to sociologists for the way the book addresses the general issue of the conflicts between the shifting demands of large organizations and the integrity of the individual The new 1990 introduction by the author nicely illustrates his belief that the process of organizational change remains a central issue for American society   **Aspects of Industrial Relations in ASEAN** Basu Sharma,1985 This study discusses the emerging trends in industrial relations systems in the ASEAN countries and inter country variations in the systems practised in these countries   **The Road to Industrial Peace** Carlton Koepke,1953

Hybridization of MNE Subsidiaries F. Becker-Ritterspach,2008-12-03 MNEs setting up subsidiaries in emerging markets face the ongoing question to what extent they can transfer their home grown or global organizational models This book looks at how the cross border transfer of production models in MNEs is related to strategic choices of firms and different kinds of contextual differences between countries   **Economics of Arms Reduction and the Peace Process** W. Isard,C.H.

Anderton,2014-06-28 The subject of peace economics and its ramifications are comprehensively and deeply attacked in this book First of all the book presents a compact survey of significant contributions already made and then it provides a broad theoretical background for examining the subject by evaluating four different approaches those of 1 neoclassical welfare theory 2 Keynesian and modern versions of macroeconomics 3 modern growth theory and 4 political choice theory A number of contributions deal with major questions on issues such as the impact of military cutbacks in the Eastern European economies upon their growth trade between nations arms trade nuclear defense and the benefits and costs of war as highlighted by the recent Gulf War Issues of a more general nature but equally significant are also discussed including the age old negotiations problem of two mature political leaders of major powers in conflict the determinants of military expenditures and the problems of developing countries In the last chapter the findings of the studies reported in the book are summarized and key directions for further research are identified This book is indispensable for any economist or analyst conducting research on peace economics and the peace process or concerned with the impacts of recent arms reduction and conversion by the major powers and the escalation of military expenditures elsewhere   **A Bibliography of Industrial Relations** G.
