Effective writing in English Mike Hannay,J. Lachlan Mackenzie,Herman Wekker,2013-11-11 We learn to speak and understand our native language without any great effort for these are natural aspects of the maturation of every human being The skills of reading and writing by contrast have to be learned usually in an educational context Now when it comes to a foreign language all the skills speaking understanding reading and writing have to be learned nothing can be acquired without considerable effort This learning process does not take place in a vacuum it is heavily influenced by our previous experience of acquiring our native language and learning to read and write it These facts have been taken as the background to this book We aim this book at native speakers of Dutch who have learned to read and write their own language and who now wish to add skill in writing English to their repertoire Since this is our well defined target group we will be continually pointing to those aspects of written English which differ from comparable aspects of written Dutch while also giving a complete guide to the writing process There are two matters concerning the presentation of information in this book that require clarification in advance Firstly the book contains hundreds of numbered examples

Hasan,Peter Howard Fries,1995 The ten papers in this volume focus on Subject and Theme Theme began its life as a semantic notion in the work of Vil m Mathesius while Subject has traditionally been seen as just a syntactic entity More recently two related perspectives on these concepts have attracted linguists attention the formal criteria for their recognition and the relations between the two concepts Using the systemic functional model as their point of departure the papers in the present volume consider the two notions in a wider context by relating them to the interpersonal and textual metafunctions of language By contrast with the current linguistic approaches the primary focus here is neither simply on formal recognition criteria nor on the relation of these elements to each other instead the notions of Subject and Theme are examined from the point of view of their function in the economy of discourse with studies of their significance in English and French as well as in a range of non Indo European languages Definitions of the concepts are offered on the basis of their discourse functions which are also important in selecting the formal recognition criteria and in understanding their mutually supportive role vis vis each other Most of the papers in the volume are a selection from presentations made at the 19th International Systemic Functional Congress at Macquarie University **ENGLISH PROSE AND WRITING SKILL** Dr. S.
